

Our Industry Advisory Panel

Purpose

AATX's Industry Advisory Panel is our central channel through which we engage with our key industry stakeholders. One of the main purposes of the Industry Advisory Panel is to draw on the collective knowledge and experiences of an esteemed group of successful alumni and other professionals to:

- Build stronger links, and improve mutual engagement with stakeholders across professional services, business, government, and related sectors.
- Explore high impact research opportunities and partnerships.
- Inspiring improvements to our curriculum to meet the needs of today's accounting professionals;

Industry Advisory Panel members also act as AATX ambassadors, advocating the profile and standing of our School across the business community.

Membership

Our Advisory Panel comprises up to 25 members, by invitation from our Head of School. Members include accounting, auditing and taxation leaders in professional services, the professional bodies, finance, business, and government.
