SUMMARY OF COURSE

One of the central needs of a teacher is to understand how their students learn. In this course, you will learn about how people learn generally, the degree to which people differ in how they learn, and the strategies required to teach them effectively. You will study core educational psychology topics—including development, cognition, and motivation—and observe them in action in classrooms. In assessment, you will articulate these issues, and report on observations of teaching in a way that bridges theory, research, and practice.

THE MAIN WAYS IN WHICH THE COURSE HAS CHANGED SINCE LAST TIME AS A RESULT OF STUDENT FEEDBACK:

- Last year we trialed delivering a portion of the course online. The blended mode of delivery was very popular so it will be rolled out as a permanent arrangement this year.
- Provided more scaffolding and support for the first part of the assessment.

Understanding of adolescent learning and development is essential for successful teaching and productive teacher-student relations in secondary schools. The course focuses on providing pre-service teachers with an understanding of the complexity and diversity of adolescents in Australian secondary schools and the qualities of peer and teacher relations that promote students' social and academic wellbeing. The course is necessary for meeting the requirements of the New South Wales Institute of Teachers. It complements other courses designed to enable pre-service students to successfully complete their Professional Experience practice teaching and meet all the requirements of the New South Wales Institute of Teachers professional Teaching Standards for Graduate Teachers.

5. TEACHING STRATEGIES

Teaching strategies in this course reflect as much as possible the principles explained in the course itself, including in explicit instruction, guided teaching, opportunities for practice, and group discussions, across lectures, tutorials, and online components.
