Summary of the Course

How do primary-aged students develop and learn? What, and who, informs their learning? What is the role of cognition, motivation, identity, language, gender, culture, and ability? Using educational psychology as a foundation, you will explore psychological and social perspectives on child development and learning during the primary years of schooling. In order to develop your understanding of young students and how they learn, this course will focus on integrating research findings, theoretical positions, and practical aspects of child development. Specifically, you will be challenged to consider critical developmental issues in relation to your within-school experiences. Completion of this course will enable you to link learning theories and educational practice as a basis for ongoing professional reflection and development of effective primary school pedagogy.

Course Learning Outcomes

1. Describe the social, ethnic, linguistic, cultural and religious composition of primary schools in Australia and explain how such family and societal factors may affect learning
2. Describe the ways in which physical, social and intellectual factors, including socio-emotional, linguistic and cultural factors, impact on student learning in the primary years
3. Identify and critically evaluate the key implications of a range of research findings about child development for student learning
4. Draw on a range of research-based strategies to assess the specific learning needs of a diverse range of primary aged students, and identify their implications for teaching

Teaching Strategies

Teaching strategies: You can expect a combination of lectures and tutorial activities designed to provide opportunities for critical study and reflection on research literature and related issues. Face-to-face lectures will include explicit instruction and a range of interactive activities to help you clarify, apply, and explore key themes experienced in your school settings. Since research shows that learning is best activated by interaction (and not passive consumption), attendance and participation in the lecture discussions will provide the foundation for your own understanding and development in this course. In addition, online tutorial material will help foster interest and support your learning within small peer communities of practice.

Rationale: Primary-aged students bring with them a broad range of developmental considerations that impact learning. As a teacher, your own life experiences and perspectives on learning impact your interactions and teacher-student relationships. Understanding child development through psychological and social lenses as well as through the filter of your own background can help promote students' academic and non-academic successes. Given this awareness, it is critical that teachers draw upon a developmental framework. The content and teaching approach of this course will help you frame your own practice in a developmental way – one that can promote further focus, refinement, and reflection throughout your teaching career.

Academic Honesty and Plagiarism

Plagiarism is using the words or ideas of others and presenting them as your own. It can take many forms, from deliberate cheating to accidentally copying from a source without acknowledgement.

UNSW groups plagiarism into the following categories:

Copying: Using the same or very similar words to the original text or idea without acknowledging the source or using quotation marks. This includes copying materials, ideas or concepts from a book, article, report or other written document, presentation, composition, artwork, design, drawing, circuitry, computer program or software, website, internet, other electronic resource, or another person's assignment without appropriate acknowledgement.

Inappropriate paraphrasing: Changing a few words and phrases while mostly retaining the original information, structure and/or progression of ideas of the original without acknowledgement. This also applies in presentations where someone paraphrases another's ideas or words without credit and to piecing together quotes and paraphrases into a new whole, without appropriate referencing.

Collusion: Working with others but passing off the work as a person's individual work. Collusion also includes providing your work to another student for the purpose of them plagiarising, paying another person to perform an academic task, stealing or acquiring another person's academic work and copying it, offering to complete another person's work or seeking payment for completing academic work.

Inappropriate citation: Citing sources which have not been read, without acknowledging the "secondary" source from which knowledge of them has been obtained.

Duplication ("self-plagiarism"): Submitting your own work, in whole or in part, where it has previously been prepared or submitted for another assessment or course at UNSW or another university.

Correct referencing practices

The UNSW Academic Skills support offers resources and individual consultations. Students are also reminded that careful time management is an important part of study. One of the identified causes of plagiarism is poor time management. Students should allow sufficient time for research, drafting and proper referencing of sources in preparing all assessment items.

UNSW Library has the ELISE tool available to assist you with your study at UNSW. ELISE is designed to introduce new students to studying at UNSW but it can also be a great refresher during your study. Completing the ELISE tutorial and quiz will enable you to:

- analyse topics, plan responses and organise research for academic writing and other assessment tasks
- effectively and efficiently find appropriate information sources and evaluate relevance to your needs
- use and manage information effectively to accomplish a specific purpose
- better manage your time
- understand your rights and responsibilities as a student at UNSW
- be aware of plagiarism, copyright, UNSW Student Code of Conduct and Acceptable Use of UNSW ICT Resources Policy
- be aware of the standards of behaviour expected of everyone in the UNSW community
- locate services and information about UNSW and UNSW Library
