

# The actuarial role in promoting universal health coverage

Roseanne Harris July 2023

# What is Universal Health Coverage?

Universal health coverage means that all people have **access to the health services they need**, when and where they need them, **without financial hardship**. It includes the full range of essential health services, from health promotion to prevention, treatment, rehabilitation, and palliative care

UHC **does not mean free access** to every possible health service for every person. Every country has a different path to achieving UHC and deciding what to cover based on the needs of their people and the resources at hand.

Half of the world's population do not have access to the health care they need

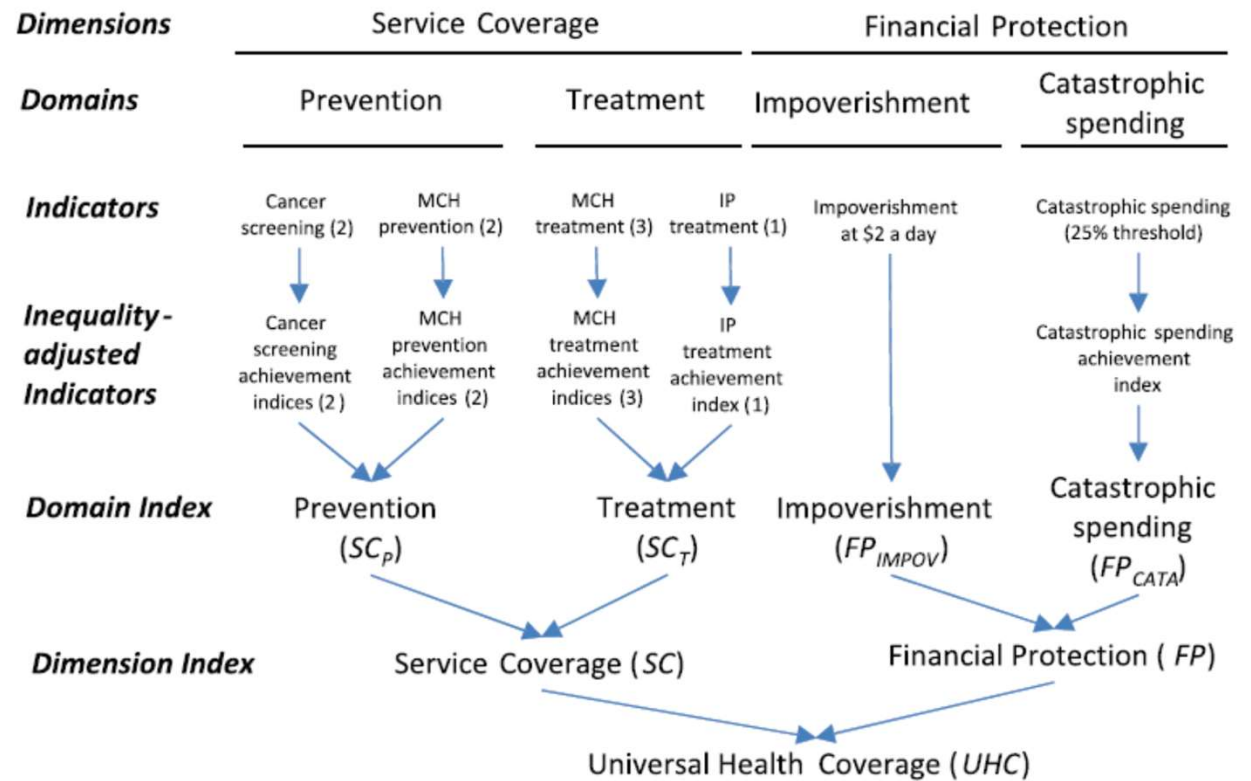

100 million people are driven into poverty each year through out of pocket health spending

Over 930 million people spend at least 10% of their household income on health care

75% of national health policies strategies and plans are about moving to UHC

# The UHC Index

Figure 1: The principles underlying the UHC Index

## UHC measurement:

- Access rather than (theoretical) provision

# 4 radical shifts required to achieve Universal Health Coverage worldwide

- 1 Primary care – investment in health promotion and disease prevention
- 2 Health workforce transformation – transform and invest in workforce training and delivery models based on a sustainable skills mix
- 3 Price transparency for medicine – ensure universal essential drug availability
- 4 Emphasis on equity – requires new and data-driven approaches to reaching vulnerable groups

# Health expenditure in sub-Saharan Africa

Current health expenditure (CHE) as % of GDP	4.92	<p>SA = 1 156.66</p> <p>Zimbabwe = 118.13</p>
Per capita (US\$ PPP)	188.17	
% OOP of current health expenditure	30.35%	
Gov expenditure as % of CHE	41.52%	
Gov health expenditure as a % of total Gov exp	2.11% to 15.29%	

<https://data.worldbank.org/>

In 2001, African Union countries set a target of allocating at least 15% of their budget each year to the health sector, known as **the Abuja Declaration**.  
 As recently as February 2023, African leaders recommitted to implementing the Abuja Declaration Target.  
 In 2020, only South Africa met the target.

# Finding the balance

WHO Health Expenditure database 2015

Healthcare financing (PPP per capita)

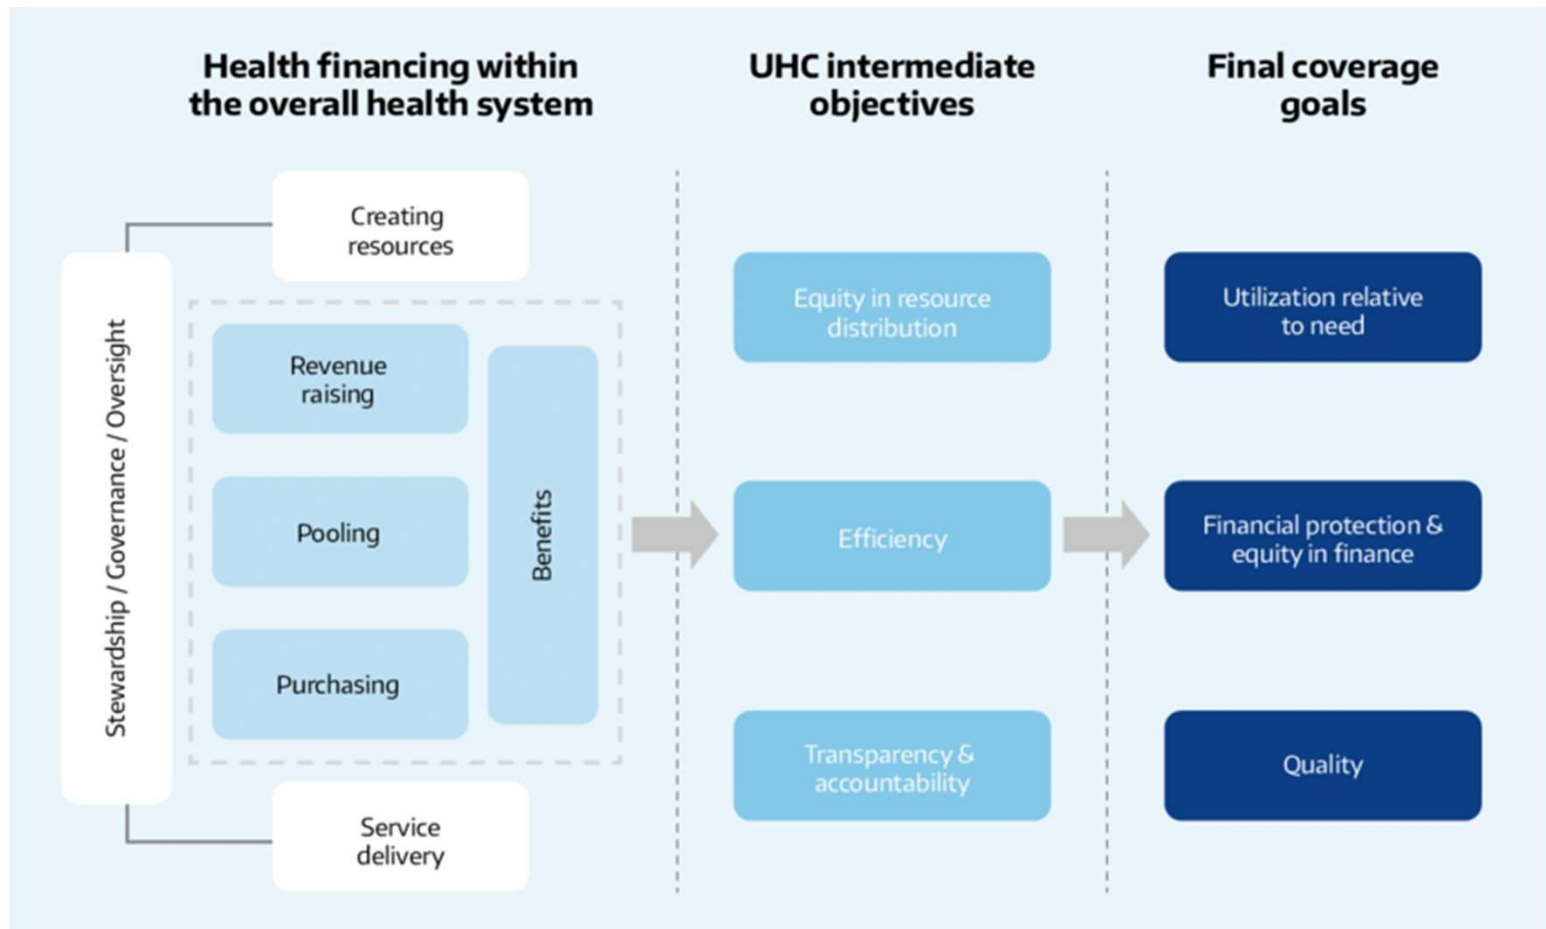

Healthcare financing (% allocation)

- Compulsory private insurance schemes
- Government schemes
- Household out-of-pocket payment
- Non-resident schemes
- Voluntary health schemes

- Compulsory private insurance schemes
- Government schemes
- Household out-of-pocket payment
- Non-resident schemes
- Voluntary health schemes

payments

# Challenges and opportunities

Figure 3: Income distribution and medical scheme membership

## Challenges

- Affordability
- Out of pocket funding
- Human resources for health
- Infrastructure
- Fragmentation and maldistribution

## Opportunities

- Organised employment platforms
- Resourced private sector
- Risk management expertise
- Digital health developments

# What have we learnt from Covid ?

## Collective approach to Covid management

- Importance of disease burden
- Funding model
- Enhancing state capacity
- Regulatory changes
- Interconnectedness of sectors

## Vaccine roll-out

- Public-private collaboration for vaccine procurement
- Unitary approach to vaccine access
- EVDS as single data collection tool
- Private sites to bolster access

## And as a profession

- Identify trusted data sources
- Need for reliance on other experts
- Agility and open mindedness as the information changes
- Sensitivity to the impact of risk
- Diversity of thought and respectful engagement yields the best outcomes

# No single model for delivering UHC – and private provision CAN support UHC

## Health Coverage Around the World

Who is covered, and how?

### Universal coverage with single-payer system

Everyone is covered by a national health-care plan that is fully funded by the government, the "single payer."

### Universal coverage with multi-payer system

Everyone is covered under a national health system that has competing insurers, with private options available for those who can afford them.

### Multi-payer system with no universal coverage

Not everyone has coverage. Those who do have insurance are covered either through specialized government programs or private insurers.

### No national health-care infrastructure (fully out of pocket)

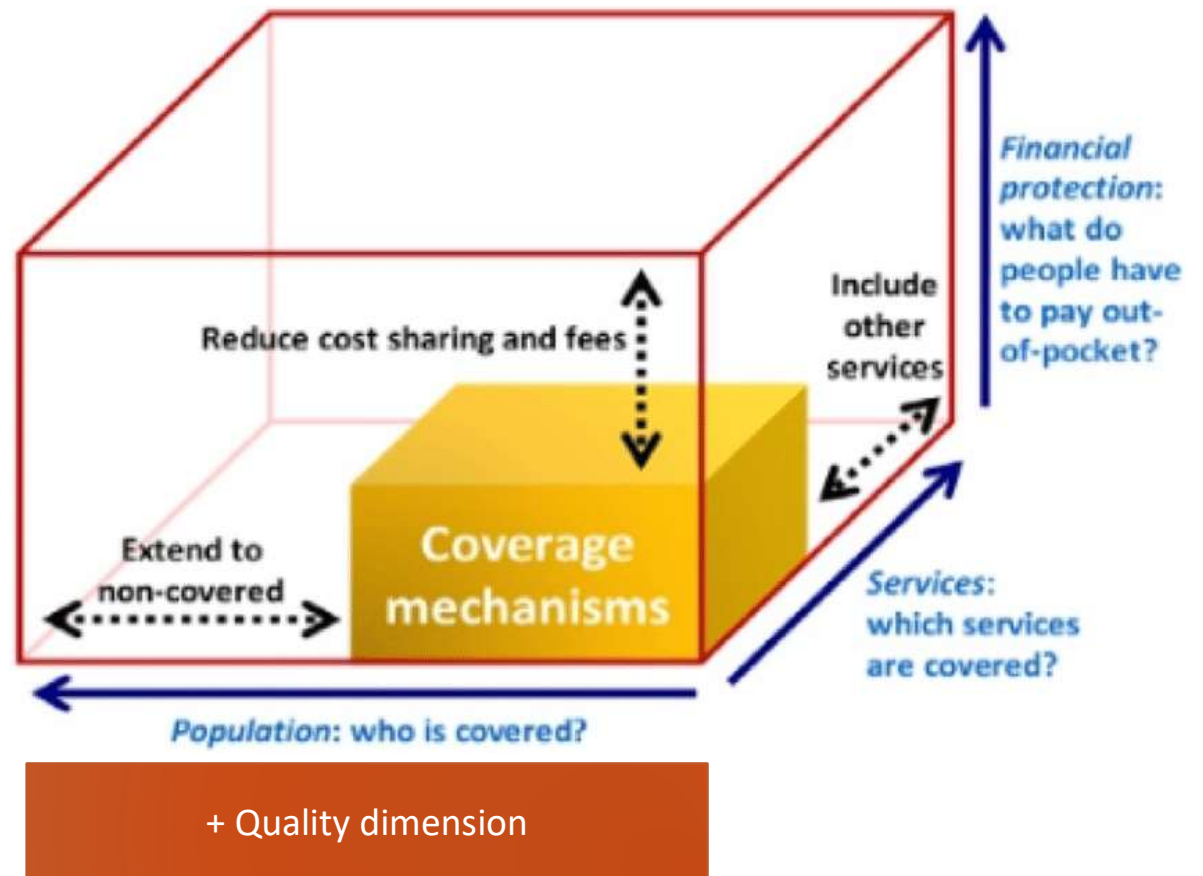

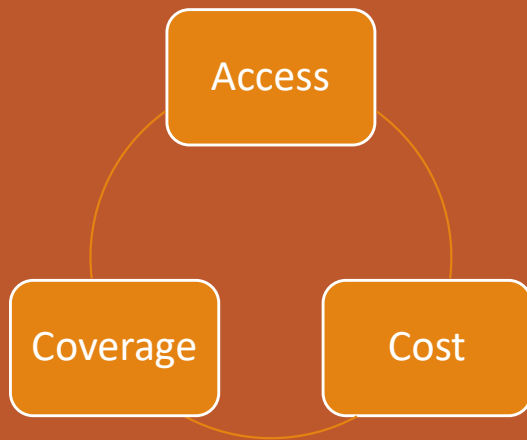

No government options exist to offer people coverage. Individual care providers and aid organizations offer specific health services, but access is limited.

World101

## Tough choices for UHC:

Nnaji et al. (2021). Implementation research approaches to promoting universal health coverage in Africa: a scoping review. BMC Health Services Research. 21. 10.1186/s12913-021-06449-6.

---

## Funding

- Gov funding priorities and fiscal constraints
- Employers' willingness to pay
- Citizens – tax base, progressive approach

## Pooling

- Social solidarity pooling
- Equity and variations in utilisation
- Impact of burden of disease

## Provision

- Availability of health professionals
- Infrastructure and support
- Sourcing supplementary capacity

Integrated  
approach to health  
system  
strengthening and  
sustainable UHC

---

# Private primary care cover to support UHC

---

The introduction of primary care cover will allow South Africa to accelerate its progress towards universal health coverage (UHC)

Enabling lower income lives to purchase private cover alleviates pressure on State funds

Public resources can be directed on interventions targeting the poor.

Enhanced primary care access improves health status and productivity.

Supports the drive towards UHC

---

# Building a resilient health system

---

- Needs to be able to mitigate, adapt to and recover from shocks and stresses (USAID)
- Works across public and private sectors and involves communities
- Appropriately trained and equipped workforce
- Responsive to population health needs – tracks threats
- Ensures quality health services, efficient use of resources
- Realistic financing model – harnessing public and private funding
- Integrates with global co-ordination and support

Underpinned by sound and responsive governance framework
