

School of Civil and Environmental Engineering Term 2, 2020 CVEN4003/9000 DESIGN PRACTICE B

COURSE DETAILS				
Units of Credit	6			
Contact hours	5 hours per week			
Class	Monday, 10:00 – 11:00 ONLINE via Blackboard Ultra link in and			
	Tuesday, 09:00 – 11:00	ONLINE via Blackboard Ultra link in Moodle		
Workshop	Thursday, 12:00 – 14:00ONLINE via Blackboard Ultra link in MoodOrWorkshop 1- 12 noon - 2pm ThursdaysThursday, 14:00 – 16:00Workshop 2- 12 noon - 2pm ThursdaysWorkshop 3- 2pm - 4pm ThursdaysWorkshop 4- 2pm - 4pm Thursdays			
Course Coordinator and Lecturer	Dr James McDonald email: jamesmcdonald@unsw.edu.au office: Vallentine Annexe (H22) room 113			
Secondary Course Coordinator	Dr Adele Jones email: adele.jones1@unsw.edu.au office: Vallentine Annexe (H22) roo	om 133B		

INFORMATION ABOUT THE COURSE

Design practice is a final year course intended to enable students to integrate material learnt in several subdisciplines of civil or environmental engineering. Working in groups, students undertake a multi-disciplinary real world design project. The objective is to develop the students' self-directed learning, design, teamwork and managerial skills. The projects assigned to the groups focus on urban water systems particularly relating to drinking water supply, stormwater and wastewater management, bioremediation of urban runoff and improvement of recreational water quality.

The philosophy of this course is to promote engagement and understanding of the learning outcomes by challenging students to solve applied and practical real world problems. Therefore, the course is structured with a large proportion of self-directed work supported by close interaction with demonstrators in workshops and assessments intended to promote a deep understanding of the learning outcomes. In addition, lectures are provided in separate streams to expose students to relevant specialist knowledge and also refresh students understanding of core design, communication and project management skills. Students doing

CVEN4003 must have completed CVEN4002. Students doing CVEN9000 should be enrolled in Program 8621.

HANDBOOK DESCRIPTION

https://www.handbook.unsw.edu.au/undergraduate/courses/2020/CVEN4003/

or

https://www.handbook.unsw.edu.au/postgraduate/courses/2020/CVEN9000/

OBJECTIVES

This course aims:

- To stimulate the intellectual curiosity of students so that they will be motivated to undertake independent learning as a lifelong skill
- To teach students how to define, analyse and solve problems clearly and logically and in doing so be able to find, evaluate, interpret and collate information
- To develop independent critical thought within students so that when necessary they will be able to challenge current knowledge and thinking
- To encourage proactive behaviour in students and to give them the associated entrepreneurial skills necessary to develop evidenced based and profitable outcomes
- To promote a respect within students for individual human rights and dignity, particularly when it relates to members of the public or other people who will be affected by the projects that they design and execute
- To acquaint students with their social, cultural, legal and environmental responsibilities as professional engineers and to generate within them the ability to make ethical decisions with Integrity
- To nurture the skills required for effective leadership including an ability to manage and deliver projects, an understanding of the social dynamics of group performance and the ability to value diverse backgrounds and opinions and function effectively in multidisciplinary teams
- To assist students with development of good oral and written communication skills and the ability to negotiate and persuade
- To instil in students the principles of sustainable design and development
- To foster effective self-management skills and
- To develop skills for collaborative and multi-disciplinary work

TEACHING STRATEGIES

One of the main aims of this practice course is to give students the opportunity for self-directed learning. It will be necessary for the student project teams to make decisions in difficult circumstances and perhaps with insufficient data. Incidences of poor quality or insufficient data often occur in real life and professional engineers need to develop and refine their critical thinking and strategic problem solving skills to find solutions to real world problems, even in the face of uncertainty. To meet this challenge, students are encouraged to collect as much relevant data as possible and make educated decisions, remembering that the ultimate responsibility for any decision rests with the decision maker (even when incorrect advice may have been received). To achieve the learning outcomes of this course, the class will be divided into small groups and assigned different projects. Project briefs will be available for review on the Moodle page prior to, and discussed in the first lecture of the course.

Private Study	 Independent and group research (e.g. literature searching and data gathering) and self-directed learning Work with your group-develop effective relationships in meeting task deliverables and deadlines Review lecture material 	
	Download and read materials from Moodle	
	Keep up with notices and find out marks via Moodle	
Lectures	 Find out what you must research and deliver as a group 	
	Learn to use online tools and develop research skills	
	Hear announcements on course changes	
Workshops	Address group management and set individual tasks	
	Ask your demonstrators to review the team work in progress ideas and outputs	
	Maintain timesheets and meeting minutes	
	Ask questions	
Assessments	Demonstrate your knowledge and skills	
	Demonstrate higher understanding and problem solving	
	Demonstrate the ability to work in a team	
	Demonstrate time management	
	Demonstrate oral and written technical communication skills	

EXPECTED LEARNING OUTCOMES

The expected learning outcomes for this course are to gain practical knowledge on how to manage projects, work independently and within a team, the development of communication skills and to apply contemporary sustainable planning theory in a practical situation.

This course is designed to address the learning outcomes below and the corresponding Engineers Australia (EA) Stage 1 Competency Standards for Professional Engineers as shown. The full list of Stage 1 Competency Standards may be found in Appendix A. After successfully completing this course, you should be able to:

Lea	arning Outcome	EA Stage 1 Competencies
1.	Gain in-depth knowledge of relevant discipline and its interdisciplinary context	PE1.3, PE2.3
2.	Develop ability to incorporate social, political, environmental and economic issues within an engineering based solution to community sensitive projects	PE1.5, PE1.6, PE3.1, PE3.4
3.	Develop the capacity for analytical and critical thinking and its application in creative problem solving	PE2.1, PE2.2
4.	Ability to engage independent and reflective learning	PE3.3
5.	Develop communication, negotiation and advocacy skills	PE1.5, PE3.2
6.	Develop skills for collaborative and multi-disciplinary projects	PE2.4, PE3.5, PE3.6
7.	Engage in leadership and member roles in group related professional engineering project completion	PE3.5
8.	Undertake and execute self-contained applied research report	PE1.4, PE3.2
9.	A respect for ethical practice and social responsibility	PE1.5, PE3.1

For each hour of contact it is expected that you will put in at least 1.5 hours of private study.

COURSE PROGRAM

A table of lecture content and workshop activities for each week is included below.

Term 2 2020

Date	Lecture	Lecture	Suggested workshop activities
	Monday 10– 11 am	Tuesday 9 - 11 am	Thursday
	ONLINE via Blackboard	ONLINE via Blackboard	12 – 2 pm or 2 – 4 pm
	Ultra link in Moodle	Ultra link in Moodle	ONLINE via Blackboard Ultra link in Moodle
01/06/2020 (Week 1)	 Course overview Project description Assessments 	Guest Lecture: Water Sensitive Urban Design.	Review assessment timeline, meet your group and plan the Term.
		Dr Kefeng Zhang and Dr Veljko Prodanovic, Water Research Centre	
08/06/2020 (Week 2)	No lecture – Queens Birthday	Referencing and research skills	Finalise Assessment 1 – Project Proposal, get feedback on drafts from demonstrators.
		Dr Adele Jones, Water Research Centre	
15/06/2020 (Week 3)	Introduction to water quality in urban systems	Guest Lecture: Australian Rainfall and Runoff Handbook and Modelling	Work on Assessment 2 – Annotated Bibliography get feedback from demonstrators on search terms, ideas and review
	Research Centre	Dr Chris Chen, Water Research Centre	journal articles. Install freeware GIS software for Thursday Week 4 lecture.
22/06/2020 (Week 4)	Guest Lecture: Sydney Water	Guest Lecture: Using GIS in urban design	Finalise Assessment 2 – Annotated Bibliography: Last chance to get feedback from
	Robert Allen	Philippa Higgins and Johan Visser	demonstrators on search terms, ideas and review journal articles.
29/06/2020 (Week 5)	Guest Lecture: Life Cycle Assessment	Guest Lecture: What does good community engagement look like?	Draft your presentation and Share your ideas with the demonstrators. Write report.
	Clare Bales	Dr Matthew Kearnes	
		Guest Lecture: Stopping Pollution Entering Our Waterways	
		Blake Allingham from Ocean Protect	
06/07/2020 (Week 6)	Non-teaching week for all courses	Non-teaching week for all courses	No Workshop
13/07/2020 (Week 7)	Presentation Techniques (Adele)	No Lecture: practice presentations	Give Assessment 3 – Team Presentation: Thursday 12–4pm 16/07/2020
			Present online via blackboard in workshops

Date	Lecture	Lecture	Suggested workshop activities
	Monday 10– 11 am	Tuesday 9 - 11 am	Thursday
	ONLINE via Blackboard	ONLINE via Blackboard	12 – 2 pm or 2 – 4 pm
	Ultra link in Moodle	Ultra link in Moodle	ONLINE via Blackboard Ultra link in Moodle
20/07/2020	Guest Lecture: TBA	Guest Lecture: TBA	Review presentation feedback
(Week 8)			and plan to incorporate it into the report
27/07/2020	Guest Lecture: TBA	Guest Lecture: TBA	Work on project report: get
(Week 9)			demonstrator feedback on framework and draft sections.
03/08/2020	No Lecture	No Lecture	Finalise Assessment 4 - Project
(Week 10)			Report: last chance for demonstrator feedback.

ASSESSMENT

To the extent appropriate at university, assessments will reflect the kinds of deliverables expected at the professional level in such industries as environmental engineering consulting and government public works. The final mark for each student will be determined by a combination of individual and group contributions. Each group will consist of 5-7 members and groups will be responsible for assigning roles and individual tasks within the team.

Each group member will be assessed individually on the above roles and will also be required to submit his/her own assessment of the other individual contributions within the group. On the basis of these peer evaluations the mark for each group member will be adjusted into an individual contribution to determine the final mark. There will be no written examination or quiz in this subject. An outline of the course assessment is set out below. Detail of each assessment including the submission date, marks assigned and the general criteria by which marks are assigned will be found in Moodle and in the table in the assessment overview section of this document. The course coordinator reserves the right to adjust the final scores by scaling if agreed with the Head of School.

There will be NO formal examination. The final marks for the course will be determined based on the scores from each of the 4 assessment tasks. Each group task will include a peer evaluation component that transforms the group mark into a final individual mark.

Assessment 1 Project Proposal and Risk Assessment:	15%
Assessment 2 Annotated Bibliography:	20%
Assessment 3 Presentation:	20%
Assessment 4 Final Report:	45%

PENALTIES

In keeping with real-world expectations, each project task should be completed within the specified time period and by the due date. Late submissions will attract a penalty of **20% of the assessment task value per day**. Students who are impacted by short term events beyond their control must notify course coordinators as soon as an issue arises and fill out a formal application for special consideration:

https://student.unsw.edu.au/special-consideration

ASSESSMENT OVERVIEW

The table below contains details of all assessments and due dates planned for the CVEN4003/9000 course in Term 2 2020.

Item	Length	Weighting	Learning outcomes	Assessment Criteria	Due date and submission	Deadline for absolute fail	Marks returned
			assessed		requirements		
1. Project Proposal and risk assessment	< 5 pages + HS017 form	15%	2, 3, 5, 6 and 7	This is a group assessment; peer evaluation will be used to determine an individual mark. Students are expected to display an understanding of the key issues of the project. Demonstrate an ability to plan and describe decision making processes and assess risk of field work involved in the project.	Friday 8 pm 19/06/2020 (Week 3) Submit online via Moodle	Wednesday 24/06/2020 (Week 4)	Friday 27/06/2020 (Week 4) via Moodle
2. Annotated bibliography	< 10 pages	20%	1, 4 and 8	This is an individual assessment. Students are expected to display evidence of in-depth understanding of the topic. Provide evidence of ability to research and synthesise information. Students will be marked on presentation, clarity, organisation and depth of research and demonstration of critical analysis of source content.	Friday 8 pm 03/07/2020 (Week 5) Submit online via Moodle	Tuesday 07/07/2020 (Week 5)	Monday 13/07/2020 (Week 7) via Moodle
3. Presentation	18 minutes + 5 minutes questions	20%	1, 3, and 5	This is a group assessment; peer evaluation will be used to determine an individual mark. Each student will be marked on both content and presentation technique. Students are expected to display a knowledge of their topic and communicate their findings clearly.	Thursday 12– 4pm 16/07/2020 Present online via blackboard (Week 7 workshops)	Students must present on the due date	Friday 24/07/2020 (Week 8) via Moodle
4. Final Report	< 100 pages	45%	1, <u>2</u> , <u>3</u> , <u>5</u> , <u>6</u> , 7, <u>8</u> , <u>9</u>	This is a group assessment; peer evaluation will be used to determine an individual mark. Students will be expected to display and communicate in- depth knowledge of their project issues and solutions. Evidence of analytical thinking and problem solving as well as organisation and presentation of the report will be assessed.	Friday 8 pm 07/08/2020 (Week 10) Submit online via Moodle	Wednesday 12/08/2020 (Week 11)	Monday 24/08/2020 (Week 13) via Moodle

PLAGIARISM

Beware! An assignment that includes plagiarised material will receive a 0% Fail, and students who plagiarise may fail the course. Students who plagiarise are also liable to disciplinary action, including exclusion from enrolment.

Plagiarism is the use of another person's work or ideas as if they were your own. When it is necessary or desirable to use other people's material you should adequately acknowledge whose words or ideas they are and where you found them (giving the complete reference details, including page number(s)). The Learning Centre provides further information on what constiWorkshopes Plagiarism at:

Appendix A: Engineers Australia (EA) Competencies

Stage 1 Competencies for Professional Engineers

	Program Intended Learning Outcomes
0	PE1.1 Comprehensive, theory-based understanding of underpinning fundamentals
	PE1.2 Conceptual understanding of underpinning maths, analysis, statistics, computing
owledg II Base	PE1.3 In-depth understanding of specialist bodies of knowledge
E1: Kno nd Skil	PE1.4 Discernment of knowledge development and research directions
	PE1.5 Knowledge of engineering design practice
	PE1.6 Understanding of scope, principles, norms, accountabilities of sustainable engineering practice
g ty	PE2.1 Application of established engineering methods to complex problem solving
PE2: Engineerin Application Abilit	PE2.2 Fluent application of engineering techniques, tools and resources
	PE2.3 Application of systematic engineering synthesis and design processes
	PE2.4 Application of systematic approaches to the conduct and management of engineering projects
	PE3.1 Ethical conduct and professional accountability
al utes	PE3.2 Effective oral and written communication (professional and lay domains)
PE3: Professiona and Personal Attrib	PE3.3 Creative, innovative and pro-active demeanour
	PE3.4 Professional use and management of information
	PE3.5 Orderly management of self, and professional conduct
	PE3.6 Effective team membership and team leadership
