Quick Guide of DJI P4Pro+ Mapping
(with built-in screen controller)

Y. Zhou (SAGE @ CVEN @ UNSW)

1. *Third party app (e.g. Pix4Dcapture) installation*

   1) *Update P4Pro firmware to the latest version.*
   2) *Download the pix4dcapture APK and Ctrl DJI APK to a micro SD card on a computer or in a web browser in the controller;*
   3) *If the apps are downloaded into a SD card, Insert the micro SD card in the RC;*
   4) *Install both the pix4dcapture APK and Ctrl DJI APK apps;*
   5) *Use a micro USB cable to "shortcut" the micro USB port and the USB2 port on the back of the controller (see the photo below);*
   6) *Run Crtl DJI to check if it can connect to the drone. If not, go to settings -> apps menu on the RC to stop DJI GO 4, and then run the ctrl+dji app;*

   NOTE: Alternatively, download APKpure apk first and install it. After that to download Pix4d capture and ctrl+DJI via APKpure appInsert the micro SD card in the RC;
