

# 3773 – Engineering (Honours) / Engineering Science Electrical Engineering / Mechatronic Engineering

Students are required to complete 12 UoC of free electives. These can be used to take Engineering or non-engineering courses.

Where students meet all the requirements for both degrees in less than 240 UoC, students must complete additional elective courses to bring the total to 240 UoC. These electives must be taken from the Faculty of Engineering. This has been factored in to the below plan.

Within the 3706 specialisations, there are 18 UoC of common Lvl 1 core courses. There are 12 UoC of common Lvl 2 core courses. This has been factored in to the below plan with the additional elective requirement. If students choose to take independent core subjects within the 3706 specialisations, the elective configuration will be different than the below outline. The list of subjects can be found in the handbook.

Due to the 30 UoC of common courses within these specialisations, the below plan has been designed to add up to the total program UoC of 240.
