1. Staff contact details

Contact details and consultation times for course convenor

Name: Dr David C. Kellermann

Tel: (02) 9161 9714

Email: d.kellermann@unsw.edu.au (Please ALWAYS include ENGG2400 in the subject line)

Moodle: <https://moodle.telt.unsw.edu.au/course/view.php?id=52472>

Microsoft Teams Video Chat Hours: Immediately after the lectures, and Office Hours TBA.

Queries and consultation

For queries and consultation, proceed in the following order:

- 1) Ask your peers
- 2) Post to Teams: [download Teams app](#)
- 3) Ask your demonstrators during the PSS
- 4) Use Teams chat or email to contact your head demonstrator
- 5) Use Teams chat to contact your lecturer
- 6) Arrange for a consultation time with your lecturer

If you email/message your head demonstrator or lecturer, please include all information in the message: for example, rather than saying “in Question 5 of the problem set”, take a screenshot or photo of Question 5 so we can answer your question on the spot.

3. Course details

Credit points

This is a 6 unit-of-credit (UoC) course and 6-7 hours per week (h/w) of scheduled online contact.

The normal workload expectations of a student are approximately 25 hours per term for each

UOC, including class contact hours, other learning activities, preparation and time spent on all assessable work.

You should aim to spend about 10-12 h/w on this course. The additional time should be spent in making sure that you understand the lecture material, completing the set assignments, further reading, and revising for any examinations.

Contact hours

	Day	Time	Delivery Mode
Lectures	Monday	9:00 – 11:00am	Teams meeting
	Tuesday	4:00 – 6:00pm	Teams meeting
Problem Solving Sessions (PSS)	Thursday and Friday W1-10	See: https://my.unsw.edu.au/	Microsoft Teams Chat Channel
Lab	N/A		Mixed Reality in Teams
Block Tests Weeks 4,7,10	Friday	6:00pm - 7:00pm	Microsoft Teams

All classes in T2 2020 will be online. Please consult this course’s Moodle module for details about delivery.

Summary and Aims of the course

Mechanics of Solids is a foundational subject for all engineers- essentially, it is the extension of engineering mechanics from rigid bodies to deformable bodies and the associated stress, strain and deformations. This is a second-year undergraduate course, worth 6 Units of credit. It builds on the statics component of ENGG1300 Engineering Mechanics 1, and some of the concepts from that course are amplified here. This course, together with its successor, MMAN3400 Mechanics of Solids 2, provide the foundations for subsequent structural design courses MECH3110 Mechanical Design 1, MECH4100 Mechanical Design 2, AERO4410 Advanced Aerospace Structures and Vibrations and so on.

Aims of the course

The aim of this course is to study the relationships between the *external* loads applied to deformable body and the intensity of *internal* forces or *stresses* acting within the body. It also involves the study of deformations or *strains* caused by external loads.

Based on linear elastic material behaviour, you will be given sufficient understanding of the relationships between stress and strain in two and three dimensions.

Student learning outcomes

This course is designed to address the learning outcomes below and the corresponding Engineers Australia Stage 1 Competency Standards for Professional Engineers as shown. The full list of Stage 1 Competency Standards may be found in Appendix A.

After successfully completing this course, you should be able to:

Learning Outcome		EA Stage 1 Competencies
LC1.	Recognise the fundamentals of Solid Mechanics	PE1.1, 1.2
LC2.	Demonstrate the fundamentals of stresses and strains	PE1.3
LC3.	Identify and express the principles of Solid Mechanics in obtaining the solutions for applications in real life engineering problems	PE1.3
LC4.	Identify and express the principles of Solid Mechanics in obtaining the solutions for applications in real life engineering problems	PE1.3
LC5.	Create and Develop “engineers’ eyes”	PE2.1, 2.2, 2.3

4. Teaching strategies

This course will be delivered both in the classroom and online. Full participation in the class means that you will participate fully in both arenas. That is, you will be held accountable for all content, instructions, information, etc. that is delivered either in class or online. There will also be laboratory or practical exercises that you may have to complete during your self-study time.

Online: The online forum for participation in this class is the Teams Platform. All official online interactions will take place or be linked clearly and appropriately from this site.

There are three live activities in a typical week, which we refer to as the Monday Lecture, Tuesday Lecture and Problem Solving Session based on the timetable above.

Both the online and in-class segments of this course are organised on the following principles:

- 1. Learning:** Student learning is the first priority - teaching and assessment are secondary concerns. Learning here is defined as gaining new ways of seeing the world, not as being filled with information. We are trying to transform you into engineers and critical thinkers in the discipline.
- 2. Peer Interaction:** Learning is a social activity, and research shows that you will learn most and best when you are actively taught by your peers and, in turn, when you teach them.
- 3. Authenticity:** We will have as much authenticity of engineering practice as is possible within the constraints of the course and where it does not restrain your learning.

4. **High standards:** We will have high standards for achievement in the course, and everyone (including staff) will be accountable for putting in the effort to get you to the standard.
5. **Openness:** As much of the course as possible will be conducted in the open where all participants can be aware of it and comment upon it.
6. **Process:** The focus of the course will be on processes, not outcomes. The right outcomes will be a by-product of following the correct processes.

5. Course schedule

	Week	Topic	Quiz	Assignment, Lab work or Block Test	Suggested Readings	
Block 1	Weeks 1-3	1: Stress and Strain: Equilibrium of deformable bodies. Normal and shear stress and strain			Hibbeler Ch.1-2	
		2: Mechanical properties of materials and geometric properties	Quiz 1		Hibbeler Ch.3, Appendix	
		3: Axial loading, statically indeterminate loading	Quiz 2		Hibbeler Ch.4	
Block 2	Weeks 4-6	4: Torsion, angular deformation, torque	Quiz 3	Week 4: Torsion lab opens	Hibbeler Ch.5	
		5: Beam bending, flexural rigidity of beams	Quiz 4		Week 4: Block Test 1	Hibbeler Ch.6
		6: Transverse shear and shear flow Combined loading, thin-walled pressure vessels	Quiz 5	Week 6: <i>Torsion report due</i>	Hibbeler Ch.7-8	
Block 3	Weeks 7-9	7: Stress and strain transformation, plane stress/strain, Mohr's circle, rosettes	Quiz 6	Week 7: Block Test 2	Hibbeler Ch.9-10	
		8: Deflection of beams, statically indeterminate beam bending	Quiz 7		Week 7: Beam deflection lab opens	Hibbeler Ch.11,12
		9: Energy Methods, strain energy functions	Quiz 8		Week 9: <i>Beam deflection report due</i>	Hibbeler Ch.14
	10	Exam revision	Quiz 9	Week 10: Block Test 3		

6. Assessment

Assessment overview

Assessment task	Length	Weight	Learning outcomes assessed	Assessment criteria	Due date, time	Deadline for absolute fail	Marks returned
3 x Block Tests	45 mins each	27% (9 marks each)	1, 2, 3, 4	Demonstrating ability under exam conditions	Friday 6-7pm in weeks 4, 7, 10	N/A	Within 2 weeks after each test
9 x Weekly PSS and online quiz	Weekly	19% (1+1 marks each week) +1 activity	1, 2, 3, 4	Weekly problem solving attempts, continued learning.	PSS: WK X+1 Quiz: 7pm Tuesday after, weeks 2-10	PSS: WK X+2 Quiz: No late submissions	Same day
2 x Individual Laboratory Reports	8 pages max	18% (9 marks each)	1, 3, 4, 5	Correctness, completeness, professionalism of report	5pm Friday, weeks 6, 9.	5pm the Monday after	Within 2 weeks after the due date
Final exam	2 hours	36%	1, 2, 3, 4	Understanding of all course content	Exam period, date TBA.	N/A	Upon release of final results

This course will include the following hurdle requirements that are closely linked to a set of learning outcomes which demonstrate that you have acquired the required skills and competencies within this discipline:

- Students must demonstrate understanding of the theoretical basis for each topic. A minimum mark of 50% must be obtained for the final exam in order to pass this course. A minimum mark of 50% must be obtained for the final exam in order to pass this subject. Failure to achieve this minimum mark will result in an unsatisfactory fail (UF) grade, regardless of the performance in the rest of the course.

Assignments

Presentation

All submissions are expected to be neat and clearly set out. Your results are the pinnacle of all your hard work and should be treated with due respect. Presenting results clearly gives the marker the best chance of understanding your method; even if the numerical results are incorrect.

Submission

Work submitted late without an approved extension by the course coordinator or delegated authority is subject to a late penalty of 20 percent (20%) of the maximum mark possible for that assessment item, per calendar day.

The late penalty is applied per calendar day (including weekends and public holidays) that the assessment is overdue. There is no pro-rata of the late penalty for submissions made part way through a day.

Work submitted after the 'deadline for absolute fail' is not accepted and a mark of zero will be awarded for that assessment item.

For some assessment items, a late penalty may not be appropriate. These are clearly indicated in the course outline, and such assessments receive a mark of zero if not completed by the specified date. Examples include:

- a. Weekly online tests or laboratory work worth a small proportion of the subject mark, or
- b. Online quizzes where answers are released to students on completion, or
- c. Professional assessment tasks, where the intention is to create an authentic assessment that has an absolute submission date, or
- d. Pass/Fail assessment tasks.

Marking

Marking guidelines for assignment submissions will be provided at the same time as assignment details to assist with meeting assessable requirements. Submissions will be marked according to the marking guidelines provided.

Examinations

You must be available for all quizzes, tests and examinations regardless of time zone or clashes. You should not request for alternative time do to other commitments. If you are not available for all assessments, you should not enrol in the course.

Final examinations for each course are held during the University examination periods: February for Summer Term, May for T1, August for T2, and November/December for T3.

Please visit myUNSW for Provisional Examination timetable publish dates.

For further information on exams, please see the [Exams](#) webpage.

Special consideration and supplementary assessment

If you have experienced an illness or misadventure beyond your control that will interfere with your assessment performance, you are eligible to apply for Special Consideration prior to submitting an assessment or sitting an exam.

Please note that UNSW now has a [Fit to Sit / Submit rule](#), which means that if you attempt an exam or submit a piece of assessment, you are declaring yourself fit enough to do so and cannot later apply for Special Consideration.

For details of applying for Special Consideration and conditions for the award of supplementary assessment, please see the information on UNSW's [Special Consideration page](#).

7. Expected resources for students

Recommended Textbooks

Hibbeler, Mechanics of Materials SI 10th edition
Study Pack - Prusty

UNSW Library website: <https://www.library.unsw.edu.au/>

Moodle: <https://moodle.telt.unsw.edu.au/login/index.php>

Microsoft Teams: <https://teams.microsoft.com/>

8. Course evaluation and development

Feedback on the course is gathered periodically using various means, including the UNSW myExperience process, informal discussion in the final class for the course, and the School's Student/Staff meetings. Your feedback is taken seriously, and continual improvements are made to the course based, in part, on such feedback.

In this course, recent improvements resulting from student feedback include improved everything! Every component and aspect of this course has been refined for 2020 based on feedback and the challenges of remote learning.

9. Academic honesty and plagiarism

UNSW has an ongoing commitment to fostering a culture of learning informed by academic integrity. All UNSW students have a responsibility to adhere to this principle of academic integrity. Plagiarism undermines academic integrity and is not tolerated at UNSW. *Plagiarism at UNSW is defined as using the words or ideas of others and passing them off as your own.*

Plagiarism is a type of intellectual theft. It can take many forms, from deliberate cheating to accidentally copying from a source without acknowledgement. UNSW has produced a website with a wealth of resources to support students to understand and avoid plagiarism, visit: student.unsw.edu.au/plagiarism. The Learning Centre assists students with understanding academic integrity and how not to plagiarise. They also hold workshops and can help students one-on-one.

You are also reminded that careful time management is an important part of study and one of the identified causes of plagiarism is poor time management. Students should allow sufficient time for research, drafting and the proper referencing of sources in preparing all assessment tasks.

If plagiarism is found in your work when you are in first year, your lecturer will offer you assistance to improve your academic skills. They may ask you to look at some online resources, attend the Learning Centre, or sometimes resubmit your work with the problem fixed. However more serious instances in first year, such as stealing another student's work or paying someone to do your work, may be investigated under the Student Misconduct Procedures.

Repeated plagiarism (even in first year), plagiarism after first year, or serious instances, may also be investigated under the Student Misconduct Procedures. The penalties under the procedures can include a reduction in marks, failing a course or for the most serious matters (like plagiarism in an honours thesis) even suspension from the university. The Student Misconduct Procedures are available here:

www.gs.unsw.edu.au/policy/documents/studentmisconductprocedures.pdf

10. Administrative matters and links

All students are expected to read and be familiar with UNSW guidelines and policies. In particular, students should be familiar with the following:

- [Attendance](#)
- [UNSW Email Address](#)
- [Special Consideration](#)
- [Exams](#)
- [Approved Calculators](#)
- [Academic Honesty and Plagiarism](#)
- [Equitable Learning Services](#)

Appendix A: Engineers Australia (EA) Competencies

Stage 1 Competencies for Professional Engineers

	Program Intended Learning Outcomes
PE1: Knowledge and Skill Base	PE1.1 Comprehensive, theory-based understanding of underpinning fundamentals
	PE1.2 Conceptual understanding of underpinning maths, analysis, statistics, computing
	PE1.3 In-depth understanding of specialist bodies of knowledge
	PE1.4 Discernment of knowledge development and research directions
	PE1.5 Knowledge of engineering design practice
	PE1.6 Understanding of scope, principles, norms, accountabilities of sustainable engineering practice
PE2: Engineering Application Ability	PE2.1 Application of established engineering methods to complex problem solving
	PE2.2 Fluent application of engineering techniques, tools and resources
	PE2.3 Application of systematic engineering synthesis and design processes
	PE2.4 Application of systematic approaches to the conduct and management of engineering projects
PE3: Professional and Personal Attributes	PE3.1 Ethical conduct and professional accountability
	PE3.2 Effective oral and written communication (professional and lay domains)
	PE3.3 Creative, innovative and pro-active demeanour
	PE3.4 Professional use and management of information
	PE3.5 Orderly management of self, and professional conduct
	PE3.6 Effective team membership and team leadership
