Course Details

Units of Credit 6

Summary of the Course

Course contains two parts: Lectures and drilling simulation laboratory.

Lectures include: Introduction to physical processes involved in drilling oil and gas wells. Rotary drilling rigs for both land and offshore operation. Drilling equipment including rig powering and transmission, hoisting, rotary systems, BOP equipment and hookup, drill pipes and collars. Drilling fluid circulating systems including pumps, mud tanks, mud mixtures and mud cleaners. Elements of rock mechanics and its application in drilling. Selection of drill bits and penetration rate optimisation. Rig sizing and selection. Special marine equipment for offshore drilling.

Drilling simulation laboratory includes: Drilling rig and equipment layout; Circulation system; Hoisting system; Rotary system; Blowout preventer system and well control operations.

Course Aims

This course is taught from a practical view with the aim that students will learn how to streamline and optimize rig operations and gain the technical skills to provide cost-effective solutions to common rig problems associated with day to day operations. Students enrolled in this course will be given an in-depth view of the physical processes involved in drilling oil and gas wells, both on-shore and off-shore.

Course Learning Outcomes

After successfully completing this course, you should be able to:

Learning Outcome	EA Stage 1 Competencies
1. Learn the functions and roles of key drilling equipment and apparatus.	PE1.1, PE1.2, PE1.5, PE2.3, PE3.4
2. Be given an in-depth view of the physical processes involved in drilling oil and gas wells, both on-shore and off-shore.	PE1.1, PE1.2, PE1.3, PE2.1, PE2.3, PE2.4, PE3.4
3. Learn to select appropriate drilling rig components & equipment as to optimize costs for a given drilling operation (onshore or offshore).	PE1.3, PE1.5, PE2.1, PE2.4, PE3.2, PE3.4

Teaching Strategies

1. Weekly lectures are designed to provide students fundamental understanding through a series of topics on drilling equipment and operations.
2. The fundamental material covered in the lectures is supported by problem-solving exercises in tutorials and class discussions.
3. Learning during lectures is further supported by group based laboratory practices.
4. Online learning support is also available through Moodle.

Assessment

Assessment task	Weight	Due Date	Course Learning Outcomes Assessed
1. Assignments	35%	Weeks 3,5,7,9,10.	1, 2, 3
2. Midterm Exam	15%	Week 7	1, 2, 3
3. Lab	10%	Lab report due within two weeks after each lab session	1, 2, 3
4. Final Exam	40%	Exam period	1, 2, 3

Assessment 1: Assignments

Due date: Weeks 3,5,7,9,10.

4 individual assignments and a project due at the end of Weeks 3,5,7,9,10 respectively; Tutorial exercises due weekly.

Additional details

Ass1 covers Power System and Circulation System; Ass2 covers Hoisting System; Ass3 covers Drill String; Ass4 covers Rotary Drill Bits. The specifications and marking rubrics will be provided at the time of the assignment release.

The design project will focus on the analysis and selection of one or multiple drilling rig components & equipment in order to optimize the cost for a given drilling operation. The specification of the project and marking rubrics will be released on Week 6.

Tutorial exercises due weekly.

Assessment 2: Midterm Exam

Assessment length: 1 hour

Due date: Week 7

One hour quiz in Week 7 covers topics from Weeks 1 to 5.

Additional details

Guidelines for helping the preparation for the quiz will be released on Moodle prior to the quiz.

Assessment 3: Lab

Due date: Lab report due within two weeks after each lab session

Activity involves simulation of drilling and well control operations in the Drilling Simulator Laboratory. Individual lab report due after each lab session.

Additional details

Laboratory guidelines will be provided on Moodle prior to Lab sessions.

Assessment 4: Final Exam

Assessment length: 2 hours

Due date: Exam period

A 2 hours final exam during exam period covers topics from Weeks 1 to 10.

Additional details

Guidelines for helping the preparation for the final exam will be released prior to the exam.

Attendance Requirements

Students are strongly encouraged to attend all classes and review lecture recordings.

Course Schedule

[View class timetable](#)

Timetable

Date	Type	Content
O-Week: 6 February - 10 February		
Week 1: 13 February - 17 February	Lecture	<ul style="list-style-type: none"> • Course introduction and expectations • Power System
	Tut-Lab	<ul style="list-style-type: none"> • Tutorial of Power System • Laboratory safety Induction and Lab Orientation
Week 2: 20 February - 24 February	Lecture	<ul style="list-style-type: none"> • Circulation System
	Tut-Lab	<ul style="list-style-type: none"> • Tutorial of Circulation System
Week 3: 27 February - 3 March	Lecture	<ul style="list-style-type: none"> • Hoisting System
	Tut-Lab	<ul style="list-style-type: none"> • Tutorial of Hoisting System • Lab1: Equipment layout on a typical rig floor
Week 4: 6 March - 10 March	Lecture	<ul style="list-style-type: none"> • Supporting Structure
	Tut-Lab	<ul style="list-style-type: none"> • Tutorial of Supporting Structure
Week 5: 13 March - 17 March	Lecture	<ul style="list-style-type: none"> • Drill String and its Components
	Tut-Lab	<ul style="list-style-type: none"> • Tutorial of Drill String and its Components • Lab 2: Circulating system
Week 6: 20 March - 24 March	Project	Project consultation
Week 7: 27 March - 31 March	Lecture	<ul style="list-style-type: none"> • Rotary System
	Assessment	<ul style="list-style-type: none"> • Midterm Quiz
	Laboratory	Lab3: Hoisting system
Week 8: 3 April - 7 April	Lecture	<ul style="list-style-type: none"> • Rotary Drilling Bits
	Tut-Lab	<ul style="list-style-type: none"> • Tutorial of Rotary Drilling Bits
Week 9: 10 April - 14	Lecture	<ul style="list-style-type: none"> • Offshore Drilling Systems

April	Tut-Lab	<ul style="list-style-type: none"> • Tutorial of Offshore Drilling Systems • Lab 4: Blowout preventer system and well control operation
Week 10: 17 April - 21 April	Lecture	<ul style="list-style-type: none"> • Blowout Preventers • Final Review
	Tut-Lab	<ul style="list-style-type: none"> • Tutorial of Blowout Preventers

Resources

Prescribed Resources

Support material for this course including, whenever available, copies of lecture notes, lecture slides, recommended readings, etc. can be found on Moodle.

The lecture notes/slides may be viewed and downloaded from the UNSW-Moodle:

<http://moodle.telt.unsw.edu.au/>

Recommended Resources

Followings are the recommended books for this course:

- Applied Drilling Engineering AT Bourgoyne Jr, ME Chenevert, KK Millheim and FS Young Jr. SPE Textbook Series, Vol. 2, 2nd Edition (1991)
- Oil Well Drilling Engineering, Principles and Practice H. Rabia. Graham and Trotman Ltd (1985)

Course Evaluation and Development

At the end of each course, all students will have the opportunity to complete a course evaluation form. These anonymous surveys help us understand your views of the course, your lecturers and the course materials. We are continuously improving our courses based on student feedback, and your perspective is valuable.

Feedback is given via <https://student.unsw.edu.au/myExperience> and you will be notified when this is available for you to complete.

We also encourage all students to share any feedback they have any time during the course – if you have a concern, please contact us immediately.

Laboratory Workshop Information

Laboratory activities will be conducted in LG29 and LG31, TETB.

Please prepare yourself before attending the lab session by reading through Lab notes, Safe Working Procedures, Risk management form and Safety Data Sheet and watching pre-recorded video clips.

Submission of Assessment Tasks

The School has developed a guideline to help you when submitting a course assignment.

We encourage you to retain a copy of every assignment submitted for assessment for your own record either in hardcopy or electronic form.

All assessments must have an assessment cover sheet attached.

Course completion

Course completion requires submission of all assessment items. Failure to submit all assessment items may result in the award of an Unsatisfactory Failure (UF) grade for the Course unless special consideration has been submitted and approved.

Late Submission of an Assignment

Full marks for an assessment are only possible when an assessment is received by the due date. Work submitted late without an approved extension by the course coordinator or delegated authority is subject to a late penalty of five percent (5%) of the maximum mark possible for that assessment item. The late penalty is applied per calendar day (including weekends and public holidays) that the assessment is overdue. There is no pro-rata of the late penalty for submissions made part way through a day. This is for all assessments where a penalty applies.

Work submitted after five days (120 hours) will not be accepted and a mark of zero will be awarded for that assessment item.

For some assessment items, a late penalty may not be appropriate. These will be indicated in the course outline, and such assessments will receive a mark of zero if not completed by the specified date.

Examples include:

- Weekly online tests or laboratory work worth a small proportion of the subject mark, or
- Online quizzes where answers are released to students on completion, or Professional assessment tasks, where the intention is to create an authentic assessment that has an absolute submission date, or Pass/Fail assessment tasks.

We understand that at times you may not be able to submit an assignment on time, and the School will accommodate any fair and reasonable extension. We would recommend you review the UNSW Special Consideration guidelines – see section below.

Special Consideration

You may be eligible for special consideration, when an illness or other short-term events beyond your control (exceptional circumstances) affect your assessment performance. More details on special consideration can be found at: www.student.unsw.edu.au/special-consideration

We ask that you please contact the Course Convenor immediately once you have completed the special consideration application, no later than one week from submission.

Student Support

The University and the Faculty provide a wide range of support services for students, including:

- Library training and support services - www.library.unsw.edu.au
- Academic Skills Support - <https://www.student.unsw.edu.au/skills>
- Psychology and Wellness - www.counselling.unsw.edu.au

Equitable Learning Services aims to provide all students with a free and confidential service that provides practical support to ensure that your health condition doesn't adversely affect your studies. <https://student.unsw.edu.au/els>

Academic Honesty and Plagiarism

Your lecturer and the University will expect your submitted assignments are truly your own work. UNSW has very clear guidelines on what plagiarism is and how to avoid it. Plagiarism is using the words or ideas of others and presenting them as your own. Plagiarism is a type of intellectual theft. It can take many forms, from deliberate cheating to accidentally copying from a source without acknowledgement. The University has adopted an educative approach to plagiarism and has developed a range of resources to support students. All the details on plagiarism, including some useful resources, can be found at www.student.unsw.edu.au/plagiarism.

All MERE students are required to complete a student declaration for academic integrity which is outlined in the assignment cover sheets. By signing this declaration, you agree that your work is your own original work.

If you need some additional support with your academic skills, please contact the Academic Skills Support or view some of the resources on their website: <https://www.student.unsw.edu.au/skills>. The Academic Skills Team can provide resources, support and assistance to help you improve your academic skills. Some students use the Centre services because they are finding their assignments a challenge, others because they want to improve an already successful academic performance.

Academic Information

Course Results

For details on UNSW assessment policy, please visit: www.student.unsw.edu.au/assessment

In some instances your final course result may be withheld and not released on the UNSW planned date. This is indicated by a course grade result of either:

- LE – indicates you have not completed one or more items of assessment; or
- WD – indicates there is an issue with one or more assignment; or
- WC – which indicates you have applied for Special Consideration due to illness or misadventure and the course results have not been finalised.

In either event it would be your responsibility to contact the Course Convener as soon as practicable but no later than five (5) days after release of the course result. If you don't contact the convener on time, you may be required to re-submit an assignment or re-sit the final exam and may result in you failing the course. You would also have a NC (course not completed) mark on your transcript and would need to re-enroll in the course.

Studying a course in the School of Minerals and Energy Resources Engineering at UNSW

Student Resources

This engineering [student resources](#) section collates useful advice and information to ensure you're able to focus on your studies.

Computing Resources and Internet Access Requirements

UNSW Minerals and Energy Resources Engineering provides blended learning using the on-line Moodle LMS (Learning Management System). Also see - Transitioning to Online Learning: www.covid19studyonline.unsw.edu.au

It is essential that you have access to a PC or notebook computer. Mobile devices such as smart phones and tablets may compliment learning, but access to a PC or notebook computer is also required. Note that some specialist engineering software is not available for Mac computers.

- Mining Engineering Students: OMB G48
- Petroleum Engineering Students: TETB LG34 & LG 35

It is recommended that you have regular internet access to participate in forum discussion and group work. To run Moodle most effectively, you should have:

- broadband connection (256 kbit/sec or faster)

- ability to view streaming video (high or low definition UNSW TV options)

More information about system requirements is available at www.student.unsw.edu.au/moodle-system-requirements

Accessing Course Materials Through Moodle

Course outlines, support materials are uploaded to Moodle, the university standard Learning Management System (LMS). In addition, on-line assignment submissions are made using the assignment dropbox facility provided in Moodle. All enrolled students are automatically included in Moodle for each course. To access these documents and other course resources, please visit: www.moodle.telt.unsw.edu.au

This course outline sets out description of classes at the date the Course Outline is published. The nature of classes may change during the Term after the Course Outline is published. Moodle should be consulted for the up to date class descriptions. If there is any inconsistency in the description of activities between the University timetable and the Course Outline (as updated in Moodle), the description in the Course Outline/Moodle applies.

How We Contact You

At times, the School or your course convenors may need to contact you about your course or your enrolment. Your course convenors will use the email function within Moodle or we will contact you on your @student.unsw.edu.au email address.

We understand that you may have an existing email account and would prefer for your UNSW emails to be redirected to your preferred account. Please see instructions on how to redirect your UNSW emails: "[How can I forward my emails to another account?](#)"

How You Can Contact Us

We are always ready to assist you with your inquiries. To ensure your question is directed to the correct person, please use the email address below for:

- Enrolment or other admin questions regarding your program: <https://unswinsight.microsoftcrmpartals.com/web-forms/>
- Course inquiries should be directed to the Course Convenor

Appendix: Engineers Australia (EA) Professional Engineer Competency Standard

Program Intended Learning Outcomes	
Knowledge and skill base	
PE1.1 Comprehensive, theory based understanding of the underpinning natural and physical sciences and the engineering fundamentals applicable to the engineering discipline	✓
PE1.2 Conceptual understanding of the mathematics, numerical analysis, statistics, and computer and information sciences which underpin the engineering discipline	✓
PE1.3 In-depth understanding of specialist bodies of knowledge within the engineering discipline	✓
PE1.4 Discernment of knowledge development and research directions within the engineering discipline	
PE1.5 Knowledge of engineering design practice and contextual factors impacting the engineering discipline	✓
PE1.6 Understanding of the scope, principles, norms, accountabilities and bounds of sustainable engineering practice in the specific discipline	
Engineering application ability	
PE2.1 Application of established engineering methods to complex engineering problem solving	✓
PE2.2 Fluent application of engineering techniques, tools and resources	
PE2.3 Application of systematic engineering synthesis and design processes	✓
PE2.4 Application of systematic approaches to the conduct and management of engineering projects	✓
Professional and personal attributes	
PE3.1 Ethical conduct and professional accountability	
PE3.2 Effective oral and written communication in professional and lay domains	✓
PE3.3 Creative, innovative and pro-active demeanour	
PE3.4 Professional use and management of information	✓
PE3.5 Orderly management of self, and professional conduct	
PE3.6 Effective team membership and team leadership
