YoWIE 2024 (Young Women in Engineering)

Event Details

Free Event:

Open to all young women in years
9 -12 in 2024

Where:

UNSW Canberra, in Campbell ACT

When:

16-18 April School Holidays

Applications Close:

15 December 2023

Apply Online:

unsw.to/yowie

Empower our female students for future generations!

Did you know that women make up less than 14% of
degree-qualified engineers and this number has remained
unchanged for 10 years?

We need your help in encouraging students to attend our amazing
workshop to experience fun university level engineering first hand.
Activities including:

- Building a gas turbine engine and exploring flight (Aerospace)
- Disassembling and reassembling an engine (Mechanical)
- Soldering and programming a circuit (Electrical)
- Commanding a robot to solve a problem (IT)
- Designing, building and testing a dam (Civil)
- Analyse signals to return an astronaut to her rocket (Space)
- Building a YoWIE keepsake in our mechanical engineering workshop (Technical Skills)

Students will also meet innovative and inspirational female students,
graduates, staff and guest speakers. Together let's support, guide and
assist female students to discover their future.
