What do aerospace engineers do?
Aerospace engineers use their expertise to design, manufacture and operate flight vehicles but their careers are far more diverse than this sounds. The Aerospace industry is one of Australia’s major exporters of high value-added manufactured goods. You can specialise in specific areas such as materials and structures, aerodynamics, avionics, navigation and control, propulsion or production methods. This opens up a vast array of potential careers, some of which may surprise you.

What will your study involve?
Our Aerospace Engineering degree focuses on airborne vehicles to meet future employment prospects in Australia (like aerodynamics, flight mechanics, propulsion and structures). You’ll learn about designing, testing, developing and producing aerospace vehicles. In our program you’ll learn to a professional standard that is recognised worldwide so your skills are transferable across the international aerospace industry. In your final year you’ll take part in a team project that integrates all aspects of aircraft design to meet a defined mission specification.

UNSW Mechanical & Manufacturing Engineering
• 1st in Australia and 49th globally for Mechanical, Aeronautical & Manufacturing Engineering (QS Subject Rankings 2023)
• Learn and explore in best-in-class teaching labs and cutting-edge facilities which include a flight simulator, mechatronics research space, a refrigeration and energy storage lab, laser labs, machines for tensile and compression testing, an aerodynamics laboratory with four wind tunnels and mechanical workshop
• UNSW has partnerships with industry leaders such as Australia Advanced Aerospace Technology, Hyundai NGV, The Boeing Company and Xinjiang Goldwind Science & Technology

Program details
Lowest Selection Rank (2023): 90
Duration: four-year embedded honours degree
Study areas: Aerodynamics, Flight Mechanics, Propulsion, Systems, Space Craft, Structures
Assumed knowledge: HSC level Mathematics Extension 1, Physics
Portfolio Entry: UNSW offers the Faculty of Engineering Admission Scheme (FEAS) which is a pathway for students interested in studying undergraduate engineering to support their academic results, find out more at unsy.edu/feas

Accreditation
Your Bachelor of Engineering (Honours) degree is recognised globally, accredited with Engineers Australia, and acknowledged by the Washington Accord which lets you work in over 20 countries across the globe upon graduation.

Career options
Graduates can work on the design, manufacture and operation of flight vehicles. You could work with aircraft and spacecraft manufacturers, and major satellite companies or airlines. Graduates are equipped for research in civil and military aerospace organisations, or work in the space, defence, automotive and power industries.

Student Testimonials
"I'm fascinated with aircraft, and I wanted to understand how they operate and how they’re manufactured. I chose UNSW due to its reputation, strong ties with the industry, support system and range of societies. My career dream is to become a successful manager of the engineering operations at Qantas."
Renee Wootton, Aerospace Engineering
### Example study plan

<table>
