

Ajay is a Translator

NOT GOOD AT

learning new languages,
understanding poetry

CAREER

visualisation
programmer

CREATED

software that
turns big data
into images

GOOD AT

adapting,
running a local
radio show

LOVES

singing, outdoor
sports, bushwalking,
camping

STUDIED

Bachelor in
Computer Science,
Masters in Mathematics,
Ph.D in High Performance
Computing

EXPERT AT

helping researchers
to share their
research further

SUPPORTS

people to
understand
complex data

Capability Convos

Australian Curriculum V9.0 links for
Years 3 to 7

English

- Language
- Literacy

General Capabilities:

- Critical and Creative Thinking
- Personal and Social Capability
- Ethical Understanding
- Literacy

Learning outcomes:

All students will be able to:

- identify some likes, dislikes, strengths, abilities and/or interests when showing a personal preference
- acknowledge that people have different needs, emotions and abilities

In addition, some students will be able to:

- describe the ways they are connected and can contribute to their community groups

Format

- Interactive game with 10 questions
- Easy to play
- Read about Ajay's job and journey with the class
- Print the questions
- Play the game
- Modify or include new questions based on students' needs

Scan this QR code to find
out more about me.

Instructions for students

Line the class up in two lines facing each other to form pairs. Ask the first question. Once each pair has discussed it, get one line to move one person to their right. The person at the end runs around to the other end of the line. Then you ask the next question and repeat the process until all the questions have been asked.

Ajay

Visualisation Programmer

Question 1

What do you think is interesting about Ajay's career?

Question 2

What skills does Ajay have that you also have, and does he have any skills you don't have that you would like to have?

Question 3

Why do you think it's important to find a career that suits your skills and personality?

Question 4

How are your interests and hobbies similar or different to Ajay's career?

Question 5

How do you think Ajay's career contributes to society?

Question 6

What sort of problems do you think Ajay might have doing this job in a rural or remote location?

Question 7

How important are mathematics and engineering in Ajay's job? Can you think of some examples?

Question 8

What tools or technology do you think Ajay needs to do his job?

Question 9

How do you think AI might change Ajay's job in the future? Can you think of some examples?

Question 10

What do you think would be the biggest challenge pursuing a career as a visualisation programmer?

Comprehension Questions

Australian Curriculum V9.0 links for Years 3 to 7

English

- Literacy

General Capabilities:

- Literacy

Learning outcomes:

All students will be able to:

- Identify that all people have strengths and weaknesses
- Actively think about what is happening in various texts as they read them
- Apply comprehension strategies to different media formats

In addition, some students will be able to:

- Identify different reasons for doing different jobs

Instructions:

- Format/print the students' question sheets (or load them onto school LMS) and direct students to a copy.
- Read the questions as a class to start, discussing any meanings
- Discuss with the class strategies for being able to answer the questions as they read about Ajay
- Read about Ajay as a class, encouraging students to answer questions as you go

Adaptation note: Questions can be modified on the PDF to meet students' needs or learning focus areas in your classroom

Comprehension questions

1. What does Ajay do and where does he work?
2. What did Ajay want to study during school and college?
3. How did Ajay incorporate visualisation into his thesis?
4. When did Ajay move to Australia?
5. What two things is Ajay not good at?
6. Name two things Ajay is good at.
7. What does Drishti mean?
8. What does Ajay's work allow him to do?

Scan this QR code to visit my page

Answers:

1. He's a visualisation programmer at the National Computational Infrastructure, situated in the Australian National University.
2. Medicine
3. By developing visualisation software to visualise chemical structure and properties
4. In 1997
5. Languages (aside from programming) and poetry
6. Employing and adapting things, and running a local radio show
7. Cognition/insight/vision
8. To work and collaborate with researchers from wide variety of disciplines

Comprehension Questions

What does Ajay do and where does he work?

What two things is Ajay not good at?

1.

2.

Name two things Ajay is good at.

1.

2.

What did Ajay want to study during school and college?

What does Drishti mean?

How did Ajay incorporate visualisation into his thesis?

When did Ajay move to Australia?

What does Ajay's work allow him to do?

Visualisation Programmer

Ajay is a visualisation programmer who developed a software program that makes complex data easy to understand. It turns huge amounts of complicated information into a clear story. Ajay also hosts a local radio show for his community where he delves into science-related topics. Find out more:

Job stats and facts

Future job growth: Over the next five years jobs in this field are expected to grow very strongly.

Location: 11% of visualisation programmers live outside capital cities.

Employment pathways: A bachelor degree or a VET qualification in a related field is required.

3 STEM skills required for this job	Subjects to develop these skills	3 other jobs that value this skill
Programming	Digital Technology, Mathematics	App developer, Database administrator, Systems analyst
Complex Problem Solving	Design and Technologies, Digital Technology	Police officer, Chemist, Geologist
Mathematics	Mathematics	Accountant, Teacher, Animator

Sustainability Analyst

The world is changing rapidly, and this means the career possibilities available to our kids are wide-ranging and exciting (and probably, don't exist yet!).

From traditional vocations to emerging fields, there are countless pathways to be explored.

Parents and teachers can create environments that encourage kids to discover and investigate possible careers that match their skills and interests.

We've included some links to other valuable resources that can help guide career conversations and explorations. Find out more at:

A example of a day in the life of a visualisation programmer

- 6.30am** It's an early start for me today. I like to embrace the morning with a nutritious breakfast to fuel my creativity. I normally opt for a quick and energizing meal, so today I have a smoothie packed with fruits and greens.
- 7.00am** I slide into my workday attire – today I choose some tailored pants and a collared shirt, something comfortable yet professional.
- 8.00am** I jump in the car. It's a short drive to work for me and I use this time to mentally prepare for the day ahead by listening to my favourite podcast.
- 8.30am** We started each day with a Team Sync-Up. This is a virtual team meeting where we discuss ongoing projects, share updates, and align our priorities. Collaboration is key, and this is a valuable chance to connect with my colleagues and set the tone for the day.
- 9.00am** Now, it's time to code. I get to work on data visualisations, tweaking designs, and ensuring a seamless user experience. My focus today is keeping the code active and precise – every line of code should contribute to the bigger picture.
- 12.30pm** I take a well-deserved break to recharge and head out with some of my colleagues to try a new local eatery. I make the most of my lunch break and always step away from the screen. This is an important opportunity for me to refresh my mind, and prepare for the afternoon tasks.
- 1.30pm** I've got an important appointment this afternoon with a client. I'm going to provide progress updates on an ongoing project, address any concerns, and gather feedback. I make sure I have an agenda. This helps keep the conversation clear and client-focused, ensuring they understand the value I'm bringing to their visualisation needs.
- 2.30pm** Time for some fun! I'm engaging in a collaborative session with UI/UX designers and fellow programmers. We're going to share ideas, troubleshoot challenges, and brainstorm innovative solutions. I grab a banana because I need to keep my energy high during these discussions.
- 4.00pm** I allocate a block of time for uninterrupted work every day. This is my chance to delve into complex coding tasks or refine intricate design details.
- 6.00pm** I wind down for the day by reviewing my progress and ensuring everything is on track. I'll make a to-do list for tomorrow so I can hit the ground running in the morning.
- 7.00pm** I get home and engage in activities that relax my mind. I make sure I prioritise creating a healthy balance between work and personal life. It makes me happier and better at what I do. Tonight I'm planning on doing some cooking - I love everything visual and that also applies to food.
- 10.00pm** YUM! That was delicious. The clean-up was a bit overwhelming but you can't make magic without making a mess. Once the kitchen is clean I head to bed and spend some time scrolling social media before going to sleep. I follow lots of art pages, so it's a guilty pleasure of mine.

Meet Ajay. He's a visualisation programmer who takes complex data and turns it into easy-to-understand visuals. Fill in the bubbles with 5 STEM (Science, Technology, Engineering and Mathematics) skills he uses in her job. Which of these skills do you think is most important? Which do you think would be the hardest to develop? When you've thought of the skills, colour in the rest of the image.

Pathfinder Workwords

Answers

Let's reflect

Were any of these words new to you? Look them up and find out what they mean.

Which of these skills do you think you are best at, or would like to get better at?

1. _____

2. _____

3. _____

Can you think of anything else Ajay might need to do his job?
