

We are a medical research institute with more than 300 people located at the Lowy Cancer Research Centre committed to curing childhood cancers

The Embryonal Cancer Therapy and Prevention Group is headed by Professor Glenn Marshall and Dr Belamy Cheung currently has:

5 Post-Doctoral Scientists

1 Research Assistant

2 PhD Students and 3 Honours Student

1 Project Leader and 2 Clinical Fellows

There are plenty of US to look after YOU!

Research projects:

(1) To develop specific inhibitors targeting MYC oncogenic signalling and identify novel combination therapies using CRISPR knockout technology

(2) To develop therapeutic and preventative strategies by identification of risk factors for childhood cancer

(3) To develop individualised patient treatment using Single Cell Sequencing technology for high-risk childhood cancer

YOU will be supervised by Dr Belamy Cheung (Principal Scientist) and an experienced Post-Doctoral scientist to ensure that YOU are being looked after

Dr Belamy Cheung, bcheung@ccia.unsw.edu.au
