Maximising Memory

How to train your brain

Dr Nicole Kochan
Senior researcher & Clinical Neuropsychologist

Your brain. Your life.

UNSW
SYDNEY

Memory lapses

What was I looking for?

What was his name?

Where is my.... phone,
wallet,
car???

Why does this happen?

Our brain can only focus and hold onto a limited number of things at a time.

Information must be **encoded** or “saved” into long-term memory.

Your brain. Your life.
