

Sensory Guide

Sound

Most of the time, the museum is fairly quiet. The TV in Bay 9 plays videos at a moderate volume. The hand dryers in the toilets are quite loud.

Lighting

The museum is well-lit, with consistent lighting all the way through.

Smells

There are no strong smells in the museum itself. Occasionally, smells from the food court nearby can come in through the air conditioning.

Temperature

The museum is kept at a temperature of around 22 degrees Celsius.

Crowds

The museum often has school groups visiting between 9am and 3pm, which can make it very crowded. Please contact us via phone or email if you would like to check how busy the museum will be during your visit.

Displays

Our specimens are all real human tissue, and can be confronting to look at. Please speak to our staff about what to expect.
