Solution Sheet 13, August 20, 2012

Answers

- 1. $2083\frac{1}{3}$ profit
- 2. Pi *z z a*
- 3. Construct a triangle ABD with sides of length a, b, d such that $\angle ADB = 90^{\circ}$. Show that d = c.

4.

$$31^{24} < 32^{24} = 2^{524} = 2^{120} = 2^{8^{15}} = 256^{15} < 257^{15}$$

- 5. (a) Conjecture that $S_n = 2^n(2n-1)(2n-3)\cdots(5)(3)(1)$ that is, 2^n times all the odd numbers from 2n-1 down to 1. Since every factor aside from 2^n is odd, the power of 2 in the prime factorisation is n.
 - (b) First prove $S_n = 2(2n-1)S_{n-1}$. Use this to prove our conjecture.
