4. Aims of the Course

The primary purpose of this course is to provide a capstone experience for students undertaking a major in psychology, regardless of their degree program. Psychology graduate attributes should lead to the development of psychological literacy, which is useful for any career destination that involves interacting with other human beings (https://student.unsw.edu.au/psychological-literacy). For example, the kind of skills you should learn in this course, such as reflecting on your personal and professional knowledge, skills and attitudes (KSAs), are critical to professional development in any field (and should be compulsory for all health professions).

School of Psychology Graduate Attributes' Level of Focus: 0 = No Focus; 1 = Minimal/first-year; 2 = Moderate/second-year; 3 = Major/third-year; A = assumed (and not assessed here). The integrated acquisition of the graduate attributes, as partly indicated through assessment of the learning outcomes, comprises "psychological literacy". Graduate Attribute 1: Discipline knowledge and its application Demonstrates a broad and coherent body of knowledge of psychology, with depth in the underlying principles and concepts, and an appreciation of the value of applying this knowledge as the basis for life-long learning. A1.1 Demonstrates an understanding of the milor concepts, theoretical perspectives, research methods, empirical findings, and historical trends in the core topics of psychology, including: a) cognition, information processing and language = A b) Individual differences in capacity, behaviour and personality, including related systems of testing and assessment = A c) intercultural diversity = A? d) issues for and perspectives of Aboriginal and Torres Strait Islander Peoples = A? e) learning = A f) perception = A f) psychological bases of behaviour = A f) psychological disorders = A k) psychological bases of behaviour = A f) psychological bases of behaviour = A f) psychological disorders = A k) psychological disorders = A k) psychological disorders = A k) psychological bases of behaviour = A f) psychological disorders = A f) psychological bases of behaviour = A f) psychological disorders = A f) psychological disorders = A f) psychological disorders = A f) psychological file for the psychology for aduate Attribute 2: Research methods in psychology for aduate Attribute 2: Research methods in		
Major/third-year; A = assumed (and not assessed here). The integrated acquisition of the graduate attributes, as partly indicated through assessment of the learning outcomes, comprises "psychological literacy". Graduate Attribute 1: Discipline knowledge and its application Demonstrates a broad and coherent body of knowledge of psychology, with depth in the underlying principles and concepts, and an appreciation of the value of applying this knowledge as the basis for life-long learning. Al. 12 Demonstrates un understanding of the history and philosophy of science and psychology = 2.5 Al. 2 Demonstrates understanding of the mojor concepts, theoretical perspectives, research methods, empirical findings, and historical trends in the core topics of psychology, including: a) cognition, information processing and language = A b) individual differences in capacity, behaviour and personality, including related systems of testing and assessment = A c) intercultural diversity = A? d) issues for and perspectives of Aboriginal and Torres Strait Islander Peoples = A? e) learning = A 1) psychological disorders = A k) psychological disorders = A k) psychological bases of behaviour = A 1) psychological bases of behaviour = A 1) psychological disorders = A k) psychological health and well-being = A 1) social psychology = A A.1.1 Demonstrates the capacity to apply disciplinary knowledge to explaining, predicting, and managing human behaviour. = 2.5 Graduate Attribute 2: Research methods in psychology Understands the principles of scientific method and is able to apply and evaluate basic research methods in psychology and partitive and promise accordance in the control of the promise and promise and promise accordance in the control of the promise and promise and promise accordance in the promise and promise and promise and promise and promise accordance in the promise and promise	School of Psychology Graduate Attributes*	
The integrated acquisition of the graduate attributes, as partly indicated through assessment of the learning outcomes, comprises "psychological literacy". Graduate Attribute 1: Discipline knowledge and its application Demonstrates a broad and coherent body of knowledge of psychology, with depth in the underlying principles and concepts, and an appreciation of the value of applying this knowledge as and to supplying this knowledge as the basis for life-long learning. Al. 12 Demonstrates understanding of the history and philosophy of science and psychology = 2.5 Al. 2 Demonstrates understanding of the history and philosophy of science and psychology = 2.5 Al. 2 Demonstrates understanding of the major concepts, theoretical perspectives, research methods, empirical findings, and historical trends in the core topics of psychology, including: a) cognition, information processing and language = A b) individual differences in capacity, behaviour and personality, including related systems of testing and assessment = A c) intercultural diversity = A? d) issues for and perspectives of Aboriginal and Torres Strait Islander Peoples = A? e) learning = A f) il perception = A f) psychological disorders = A k) psychological fleath and well-being = A f) psychological questions ocross a variety of domains, including being capable of; = A o) framing research questions f) apmonstrates the capacity to design, conduct, interpret and communicate research that addresses psychological questions across a variety of domains, including being capable of; = A o) framing research questions f) formulating testable hypotheses e) oper	Level of Focus: 0 = No focus; 1 = Minimal/first-year; 2 = Moderate/second-year; 3 =	
of the learning outcomes, comprises "psychological literacy". Graduate Attribute 1: Discipline knowledge and its application Demonstrates a broad and coherent body of knowledge of psychology, with depth in the underlying principles and coherent body of knowledge of psychology, with depth in the underlying principles and coherent body of knowledge of psychology, with depth in the underlying principles and coherent body of knowledge of psychology, with depth in the underlying principles and coherent body of knowledge of psychology, with depth in the underlying principles and coherent body of knowledge of psychology, with depth in the underlying principles and coherent body of knowledge of psychology = 2.5 A1.1 Demonstrates an understanding of the history and philosophy of science and psychology = 2.5 A1.2 Demonstrates an understanding of the history and philosophy of science and psychology = 2.5 A1.2 Demonstrates in capacity, behaviour and personality, including: a) cognition, information processing and language = A b) individual differences in capacity, behaviour and personality, including related systems of testing and assessment = A c) intercultural diversity = A? d) issues for and perspectives of Aboriginal and Torres Stroit Islander Peoples = A? e) learning = A l) perception = A l) social psychological bases of behaviour = A l) perception = A l) social psychology = A A1.3 Demonstrates the capacity to apply disciplinary knowledge to explaining, predicting, and managing human behaviour = 2.5 Graduate Attribute 2: Research methods in psychology Understands the principles of scientific method and is able to apply and evaluate basic research methods in psychological questions across a variety of domains, including being capable of: = A a) framing research questions cross a variety of domains, including being capable of: = A d) farming research questions cross a variety of domains, including being capable of: = A d) farming research questions	Major/third-year; A = assumed (and not assessed here).	<u> </u>
Some readings, lecture Demonstrates a broad and coherent body of knowledge of psychology, with depth in the underlying principles and concepts, and an appreciation of the value of applying this knowledge as the basis for life-long learning. ^{*} The Graduate Attributes of the Australian Undergraduate Psychology Program was produced as part of the Carrick Associate Fellowship project, "Sustainable and evidence-based learning and teaching approaches to the undergraduate psychology curriculum", and "Designing a diverse and future-oriented vision for undergraduate psychology in Australia", a Discipline-based Initiative funded by the Carrick Institute for Learning and Teaching in Higher Education, and supported by the Australian Psychological Society, and the University of New South Wales (School of Psychology; Learning and Teaching @UNSW). They are currently undergoing review.

I) suggesting future research	
m) communicating this research in professional formats	
A2.2 Demonstrates knowledge and understanding of research ethics.= A	
A2.3 Describes the key principles underpinning the design, implementation and evaluation of programs of	
behaviour change. = 2.5	Primarily through the
Graduate Attribute 3: Critical and creative thinking skills in psychology	Group Research Project
Demonstrates the capacity to utilise logic, evidence, and psychological science to evaluate	(Presentation) and
claims about, and solve problems regarding, human behaviour.	reflection (Portfolio;
A3.1 Recognises the major formal and informal fallacies of human reasoning. = A	Beliefs Analysis Exercise).
A3.2 Uses logic and evidence to critically evaluate and to develop arguments. = A	,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,
A3.3 Critically evaluates theoretical and methodological approaches in psychology. = A	
A3.4 Demonstrates a rigorous and objective attitude in thinking and learning about human behaviour. = A	
A3.5 Demonstrates creative and pragmatic problem solving = 3	
Graduate Attribute 4: Values and ethics in psychology	Primarily through
Demonstrates appropriate professional values.	lectures/practicals (Final exam), the Group
A4.1 Demonstrates awareness of diversity in individuals. = A	Research Project
A4.2 Recognises how prejudicial attitudes and behaviours that exist in oneself and in others may lead to	(Presentation and Peer
discrimination and inequity. = A	Rating) and reflection
A4.3 Recognises ethical and moral influences that impact on individuals in a globalized society. = 2.5	(Portfolio).
A4.4 Demonstrates knowledge, understanding and application of the code of ethics currently adopted by	,
the PsyBA and the values identified in applicable institutional codes regarding student behaviour (e.g.,	
intellectual integrity).= 2.5	
Graduate Attribute 5: Communication and interpersonal skills in psychology	Group work, oral and
Demonstrates pre-professional level communication skills.	written communication
A5.1 Writes effectively in a variety of formats and for a variety of purposes (i.e., standard research	tasks (Group Research Presentation and Peer
reports and research proposals); observes ethics of written communication.= A	rating, Portfolio).
A5.2 Listens and speaks effectively including:	rating, restrone).
(i) AQF Level 7 Programs: demonstrating effective oral presentation and basic interviewing skills, and the	
ability to use flexible techniques to communicate sensitively with diverse ethnic and cultural	
backgrounds; = 2.5	
(ii) AQF Level 8 Programs: foundational knowledge and skills in interviewing. = 0	
A5.3 Demonstrates interpersonal skills for communicating between individuals including:	
(i) AQF Level 7 Programs: collaborates effectively in groups to complete projects. = 2.5	
(ii) AQF Level 8 Programs: foundational knowledge and skills in basic counselling. = 0	D-fl+i (D+f-1i-)
Graduate Attribute 6: Learning and the application of psychology	Reflection (Portfolio), Group Research Project
Understands and applies psychological principles to personal, social, organisational,	(Presentation), and
technological and global issues.	Lectures (Final Exam;
A6.1 Understands the links between basic psychological theories and their application (e.g., capacity to	AND: Beliefs Analysis
explain psychological phenomena using the concepts, language, findings and major theories of the	Exercise).
discipline). = 2.5	,
A6.2 Selects psychological principles that can be applied meaningfully in personal and professional	
contexts (with reference to ethics, privacy, human rights) and evaluates how well this is done (i.e.,	
outcome evaluation). = 2.5	
A6.3 Demonstrates a responsibility and capacity for lifelong independent learning to sustain personal and	
professional development in the changing world of the science and practice of psychology. = 2.5	1

5. Rationale for the Inclusion of Content and Teaching Approach

The integrated acquisition of the graduate attributes, as partly indicated through assessment of the learning outcomes, comprises "psychological literacy". This capstone course offers an opportunity to explicitly integrate material not only within this course but across the whole psychology major (through the use of the Portfolio assessment, in particular).

6. Teaching Strategies

Lectures and Practical Classes

Lectures will be provided by a variety of lecturers, who are specialists in their subject areas. Some will constitute core areas (e.g., research methods, ethics, history) and others will constitute applications of psychological principles to solving particular human problems, or take a more integrative approach across disciplinary boundaries. Please note that this approach may at first appear fragmentary—but **your job** is to integrate the new knowledge into your personal "psychology major" schema. Indeed, building this kind of capacity will be useful in your future career.

You are required to attend all lectures and practicals, and to meet all participation and assessment specifications. *If possible*, lectures will be digitally recorded and made accessible via Moodle. You are also expected to attend **all** of the compulsory 2-hour weekly practical/tutorial classes. Practicals will involve interactive activities that will extend lectures and assist in the development of learning outcomes.

Practical Participation: Practicals are an essential and compulsory part of this course. To benefit from and to contribute to practicals, preparation and completion of any set work is critical. Material relevant to the group assignments will be presented and discussed in practicals. Your attention is also drawn to the following:

<u>Your practical session time</u>: You must attend the practical session to which you have been allocated. It will not be possible to switch or change practical classes once allocations are finalised.

<u>Practical session attendance</u>. Attendance will be recorded at the beginning of every practical. Those not on the class roll for that practical will be asked to leave, and all absences will be recorded.

<u>Missing practicals</u>. Inadequate attendance (less than 80% of all sessions) of practical classes may result in failure to pass the course (whether or not you have medical certificates or other documentation). If you are unable to attend practicals because of sickness or other circumstances outside your control, this may be grounds for special consideration to drop the course without failure.

For every 6-credit-unit course, you are expected to spend an average of **10** hrs per week on that course—this includes class-time, outside class-time group work, data-gathering exercises, and the normal study time necessary to adequately complete assignments and examination study. As a candidate in a full-time program, under no circumstances will employment be accepted as an excuse not to meet expectations for class participation, group work, or assessments. Remember, the semester times are quite short (final examinations will be upon you before you know it), so it is your responsibility to ensure that you do not fall behind with the ongoing assessment demands of the course.

^{*}TBF (to be finalized) denotes that a lecture is very likely be held at that time, however given the limited availability of some of our guest lecturers, we cannot confirm at this time who will be speaking in which timeslot.

Assessment Categories and Their Components

There are THREE categories of assessment in this course, as outlined below. Although the *Guide* above may give the impression of heavy assessments, be assured that some aspects—such as the Belief Analysis Exercise—will *not* take a long time. Moreover, group work should lighten the load! The course is also designed so that it is not overly reliant on your performance in a final exam, but enables you to spread your workload throughout the semester. All assessment components must be completed in order to satisfy the requirements of this course.

In addition to the formal assessments listed below, there may also be occasional **formative assessments** (such as MCQ quizzes) held within lecture and practical times. **The marks for these will not be recorded**, however they are designed to provide you with feedback as to your progress in the course.

<u>IMPORTANT!</u> To apply for **special consideration** concerning late submission of assignments, you must contact the course coordinator) as soon as possible, preferably before the due date. **Students who have a disability** that requires some adjustment in their teaching or learning environment are encouraged to discuss their study needs with the Course Coordinator as soon as possible, and/or with an Educational Liaison Co-ordinator in the Student Equity and Disabilities Unit (9385-4734; seadu@unsw.edu.au; www.studentequity.unsw.edu.au). Issues to be discussed may include access to materials, signers or note-takers, the provision of services and additional exam and assessment arrangements. Early notification is essential to enable any necessary adjustments to be made.

1. PORTFOLIO			
Details	Components	Marks	Week Due
As part of your Portfolio, you will be asked to document your acquisition and planned development of Psychology graduate attributes. You will also be asked to reflect on your strengths, values, and experiences. The Portfolio category comprises 2 submissions: 1) Group GA Log	Group GA 1 Submission (submit via Turnitin before your practical class)	4%	Week 6
2) Individual GA Log, CV, Values/Strengths Exercises, and Journal. The CV Exercise will involve submitting a CV suited to a particular job advertisement, as well as a LinkedIn entry. The values and strengths exercise will also relate to the job ad. The Journal will encourage you to reflect upon what you have learned. The emphasis is on application and integration, and requires you to take a meta-cognitive approach to your learning. Please see the Portfolio handout for more details	Portfolio Individual Submission (submit via Turnitin by 4pm Monday). GA 4, GA 5, GA 2 or 3 CV and LinkedIn Values/Strengths Journal	23%	Week 13
TOTAL	MARKS FOR PORTFOLIO	27%	

2. TUTORIAL ENGAGEMENT (INCL. GROUP ASSIGNMENT)

Details	Actions	Marks	Week Due
The Tutorial Engagement category comprises (1) an individual Belief Analysis Exercise, (2) a group research assignment that also has a peer evaluation component, and (3) an individual brief future research paper (building on the group assignment). This group research assignment will (a) familiarise you with the process of designing research in psychology, (b) familiarise you with a particular reporting style and help you acquire the basics of effective and efficient scientific communication, (c) emphasise the development of your information literacy skills, as well as promoting critical thinking, and (d) provide you with a supported collaborative learning experience.			
1. <u>Belief Analysis Exercise</u> This exercise will ask you to analyse common beliefs, making reference to psychological science.	Completed form submitted via Turnitin prior to class; bring copy to class.	4%	Week 4 Practical
2. Group Assignment Throughout the semester your will collaborate as a group to examine an intervention to address a specific psychological issue. You will propose to test your hypothesis by identifying a target population, developing an intervention, and a means for evaluating the effectiveness of the intervention. Each group will present their research proposal to the class (for which it is expected that all group members will receive the same mark). Peer evaluation of your group members' contributions will be used to moderate individual marks for this assignment.	Group Presentation in practical.	15%	Week 11 Practical
3. Individual Future Research Submission An additional individual written component will ask you to elaborate on future research directions.	Written Individual submission via Turnitin prior to class	10%	Week 11 Practical
TOTAL MARKS FOR TUTOR	RIAL ENGAGEMENT	29%	

3. FORMAL EXAMINATION			
Details	Components	Marks	Week Due
This will be held in the final examination period, and will be two hours in duration. The location will be announced in lectures. The examination will be multiple choice and short essay format. A more detailed guide to content will be provided at the end of the session.	Final Exam	44%	Exam Period
TOTAL MARKS FOR EXAMINATION		44%	

8. Expected Resources for Students		
TEXTBOOKS	No required textbook.	
REQUIRED READINGS	Required readings/citations will be made available on Moodle. The readings will include classic	
	and cutting-edge articles and chapters in the areas.	
RECOMMENDED INTERNET	https://student.unsw.edu.au/login (course website)	
SITES	https://student.unsw.edu.au/psychological-literacy	

There is **no specific textbook** for this course; most required readings will be provided on the LMS. Importantly, it is assumed that you will bring a scientific attitude to thinking and learning about the material in this course.

9. Course Evaluation & Development

Courses are periodically reviewed and students' feedback is used to improve them.

The forms of feedback include UNSW's Course and Teaching Evaluation and Improvement (CATEI) Process, focus groups and custom made feedback forms. Student feedback is taken seriously and changes to the course are made in accordance with it (e.g., we have reduced the amount of assessment, particularly regarding the Portfolio, as requested by students, and staggered the submission dates). We welcome any feedback that you may have throughout the course, and we thank you for your participation in this process.

10. Plagiarism & Academic Integrity

What is plagiarism?

Plagiarism is presenting someone else's thoughts or work as your own. It can take many forms, from not having appropriate academic referencing to deliberate cheating.

UNSW groups plagiarism into the following categories:

- **Copying:** using the same or very similar words to the original text or idea without acknowledging the source or using quotation marks. This also applies to images, art and design projects, as well as presentations where someone presents another's ideas or words without credit.
- Inappropriate paraphrasing: changing a few words and phrases while mostly retaining the original structure and information without acknowledgement. This also applies in presentations where someone paraphrases another's ideas or words without credit. It also applies to piecing together quotes and paraphrases into a new whole, without referencing and a student's own analysis to bring the material together.
- **Collusion:** working with others but passing off the work as a person's individual work. Collusion also includes providing your work to another student before the due date, or for the purpose of them plagiarising at any time, paying another person to perform an academic task, stealing or acquiring another person's academic work and copying it, offering to complete another person's work or seeking payment for completing academic work.
- **Duplication:** submitting your own work, in whole or in part, where it has previously been prepared or submitted for another assessment or course at UNSW or another university.

Where can I find out more information?

In many cases plagiarism is the result of inexperience about academic conventions. The University has resources and information to assist you to avoid plagiarism. The first place you can look is the section about referencing and plagiarism in each Course Guide, as this will also include information specific to the discipline the course is from. There are also other sources of assistance at UNSW:

How can the Learning Centre help me?

The Learning Centre assists students with understanding academic integrity and how to not plagiarise. Information is available on their website: http://www.lc.unsw.edu.au/academic-integrity-plagiarism. They also hold workshops and can help students one-on-one.

• How can Elise help me?

ELISE (Enabling Library & Information Skills for Everyone) is an online tutorial to help you understand how to find and use information for your assignments or research. It will help you to search databases, identify good quality information and write assignments. It will also help you understand plagiarism and how to avoid it. All undergraduate students have to review the ELISE tutorial in their first semester and complete the quiz, but any student can review it to improve their knowledge: http://subjectguides.library.unsw.edu.au/elise.

What is Turnitin?

Turnitin is a checking database which reviews your work and compares it to an international collection of books, journals, Internet pages and other student's assignments. The database checks referencing and whether you have copied something from another student, resource, or off the Internet. Sometimes students submit their work into Turnitin when they hand it in, but academics can also use it to check a student's work when they are marking it. You can find out more about Turnitin here: https://teaching.unsw.edu.au/elearning.

What if plagiarism is found in my work?

If plagiarism is found in your work when you are in first year, your lecturer will offer you assistance to improve your academic skills. They may ask you to look at some online resources, attend the Learning Centre, or sometimes resubmit your work with the problem fixed. However more serious instances in first year, such as stealing another student's work or paying someone to do your work, may be investigated under the Student Misconduct Procedures.

Repeated plagiarism (even in first year), plagiarism after first year, or serious instances, may also be investigated under the Student Misconduct Procedures. The penalties under the procedures can include a reduction in marks, failing a course or for the most serious matters (like plagiarism in an honours thesis) even suspension from the university. The Student Misconduct Procedures are available here: https://www.gs.unsw.edu.au/policy/documents/studentmisconductprocedures.pdf

Examples of plagiarism

Using the internet appropriately

A first year student handed in an assignment where she had copied from a website. Her lecturer realised she didn't understand you have to reference websites in the same way you reference books and journal articles. The lecturer explained how to reference and sent her to a workshop at the Learning Centre to help her improve her skills.

Working together on a math assignment

A group of Mathematics students worked together on an assignment when they had been told this was not allowed. All questions where the students had worked together were given zero, and this lead to some student failing the assessment.

No referencing in an assessment

A third year student submitted a major assessment that included material from a journal article published in Canada. When his essay was submitted into Turnitin, it let the academic know that the student didn't reference the material. The student was given zero for the essay, and because it was worth 50 per cent he failed the course.

Copying design work

A final year design student used images of someone else's designs in her work and he said the designs were his own. The matter was formally investigated by his Faculty and he was found to have committed academic misconduct and failed the course.

Further information and assistance

If you would like further information or assistance with avoiding plagiarism, you can contact the Learning Centre.

UNSW Learning Centre: Opening Hours: Monday to Thursday: 9am - 5pm and Friday: 9am - 2.30pm Lower Ground Floor, North Wing, Chancellery Building (C22 Kensington Campus – near Student Central)

www.lc.unsw.edu.au Phone: 9385 2060

Email: learningcentre@unsw.edu.au

11. Administrative Matters

The School of Psychology Student Guide, available on http://www.psy.unsw.edu.au/current-students/student-guide, contains School policies and procedures relevant for all students enrolled in undergraduate or Masters psychology courses, such as:

- Attendance requirements (although in this course, there is a 100% practical requirement);
- Assignment submissions and returns (note that "Turnitin" may be a necessary procedure for some assignments, and that 2% of the marks will be deducted for each day an assignment is overdue);
- Assessments;
- Special consideration in the event of illness or misadventure;
- Student Code of Conduct;
- Student complaints and grievances;
- Student Equity and Disability Unit and other support services such as the Learning Centre; and
- Occupational Health & Safety.
- Although UNSW is slowly moving toward standards-based assessment, the School of Psychology currently reserves
 the right to scale final marks for a course if necessary. This process is intended to maintain consistency in assessment,
 and to remove any potential effects of differences in marking standards across courses.

Students should familiarise themselves with the information contained in this Guide.
