Summary of Course
This course aims to provide foundational understandings of the concepts, skills, and issues in music education. Students will critically examine the music curriculum and its implementation in schools. Students will be introduced to the processes of planning individual lessons and sequences of lessons, teaching composing, listening, and performing, using information and communication technology (ICT) and assessing student learning. Learning will be contextualised in knowledge about the nature of music and music education in Australia.

Based on last year's student feedback, the following course changes have been made:
- The assessments have been reviewed and the size of the Unit of work reduced. More tutorial examples of lesson plans and units of work will be included.

Assessment: Please note that all students must pass all assignments to pass the course, and they must pass the course to go on placement for PE 1.

Attendance: Students are expected to give priority to university study commitments. Unless specific and formal permission has been granted, attendance at less than 80% of classes in a course may result in failure.

4. RATIONALE FOR THE INCLUSION OF CONTENT AND TEACHING APPROACH

In addition to learning some basic skills and concepts in music education, students undertaking this course will think deeply about some of the most critical issues facing music educators. The course is designed with a view to students eventually becoming excellent teachers who are able to continue to improve the quality of music education in Australia. In addition to traditional lectures, the course also involves workshops where students will take part in simulated classroom activities, critical discussions, and reflective observations of music education in practice.

5. TEACHING STRATEGIES

- Explicit teaching, including lectures, to demonstrate an understanding of students’ different approaches to learning and the use of a range of teaching strategies to foster interest and support learning.
- Small group cooperative learning to understand the importance of teamwork in an educational context and to demonstrate the use of group structures as appropriate to address teaching and learning goals.
- Extensive opportunities for whole group and small group dialogue and discussion, allowing students the opportunity to demonstrate their capacity to communicate and liaise with the diverse members of an education community, and to demonstrate their knowledge and understanding of method content.
- Online learning from readings on the Moodle website.
- Peer teaching in a simulated classroom setting and classroom teaching in small groups.
- Structured occasions for reflection on learning to allow students to reflect critically on and improve teaching practice.

These activities will occur in a classroom climate that is supportive and inclusive of all learners.

Students are required to follow their lecturer’s instructions when submitting their work for assessment. All assessment will be submitted online via Moodle (Turnitin) by 5pm. Students no longer need to use a cover sheet. Students are also required to keep all drafts, original data and other evidence of the authenticity of the work for at least one year after examination. If an assessment is mislaid the student is responsible for providing a further copy. Please see the Student Policies and Procedures for information regarding submission, extensions, special consideration, late penalties and hurdle requirements etc.

Assessment 1 – Planning and Teaching

Plan and design one 60-minute lesson for a mixed ability Stage 4 music class. The lesson plan must follow a standard SED format and be presented using the template provided.

Plan your lesson for a class in a comprehensive high school which would typically include EAL/D students, Indigenous students and students with various religious and cultural backgrounds. Some students may have low levels of literacy. Differentiation to cater for some students is therefore required. Appropriate differentiation strategies are scaffolding, group work and/or an alternative task or mode of presentation.

1. Write a rationale for your lesson plan. Your rationale should address the questions: What do I want the students to learn? Why is it important? What strategies will I use? What assessment for learning strategies will I use to monitor progress?

2. Prepare the lesson plan to demonstrate how you will use appropriate structure, activities, strategies and formative assessment to develop understanding of the material.

Make sure you:

- choose an appropriate topic for the year group
- support your rationale using references indicating your professional reading
- choose appropriate outcomes and lesson content
• demonstrate knowledge of effective teaching and learning strategies
• use appropriate format and provide sufficient detail for an effective lesson plan
• include an aspect of literacy/numeracy which integrates with the lesson focus
• provide in full one activity (which may be ICT-based)
• express yourself in clear, standard Australian English.

Assessment 2 – Unit of Work for Stage 5.
Prepare an outline for a unit of work for a Stage 5 class. The unit of work should cover the first five lessons; however, you are not preparing full lesson plans. You should include a score analysis and activities that require students to produce notation.

You must write a rationale for the unit (600-800 words) in which you
• provide a brief outline of the school and class context
• state precisely what you want the students to learn and why it is important
• justify your choice of topic/text to suit the needs and abilities of this class
• justify your teaching strategies by referring to readings, research and material presented in lectures and the Quality Teaching framework
• demonstrate how differentiation will support a diverse range of learners
• state the prior knowledge students have to begin this unit and discuss how you would assess and build on this prior knowledge.

Include in your unit outline:
• learning intention(s) for each lesson
• one full activity for formative assessment (not an essay)
• one ICT-based activity (not watching a video or PowerPoint presentation)
• one group-work task with a focus on literacy/numeracy (not a mind-map)
• one incursion/excursion/performance/product activity
• outlines only for the other teaching materials required.

Microteaching
Microteaching is the planning, presentation and evaluation of a lesson. This semester there will be two compulsory sessions for microteaching:
1. Team teaching with a Stage 4 or Stage 5 music class. The lesson topic will be given to you. You will plan either a listening, performance or composition lesson. Class times and groups will be organised in tutorials. Each student must teach a 10 minute continuous section of the lesson. A written reflection is also required.
2. A lesson based on a resource or stimulus given by the tutorial leader. Part of the teaching sequence needs to focus on explicit teaching of a literacy/numeracy skill. Students will again work in groups to prepare a lesson plan and presentation will be given to peers.

Initial Lesson Plan: All students must submit to the method lecturer their proposed lesson plan at least one week prior to the presentation. This will be returned with comments on the suitability of the proposal.

Microteaching: This will be assessed according to the attached criteria, and will be graded as Satisfactory or Unsatisfactory. Any student whose first microteaching episode is judged as unsatisfactory will be given a further (one only) opportunity to gain a satisfactory grade.

NOTE: If a student is assessed as unsatisfactory in microteaching s/he will automatically fail Method 1 overall, and not be permitted to undertake Professional Experience or any further method work in that teaching area until the key concerns have been resolved.
