4. RATIONALE FOR THE INCLUSION OF CONTENT AND TEACHING APPROACH

Continuing to develop the quality of learning and teaching is a central responsibility of all educators whether they be in formal positions of management responsibility or not. How to analyse, evaluate and develop one's capability as a leader of educational change is, therefore, a critical capability of all educators.

The teaching approach, which includes independent as well as group-based learning activities, is designed to mirror the solitary and collective nature of educational leadership, providing participants with opportunities to work independently and together in the process of analysing and evaluating practice; identifying issues that need to be addressed; and formulating and evaluating strategies to effect the changes necessary to address these issues.

5. TEACHING STRATEGIES

The course is taught in a blended mode designed to maximise the benefits of both the on-campus face-to-face classroom experience and the on-line experience. The approach to teaching and learning is informed by research that has demonstrated the importance of the learning environment to quality student learning. Emphasis is placed on a learning environment that is *Student-centred*, *Knowledge-centred*, *Assessment-centred*, and *Community-centred*.

Thus, as a student in this course you:

- will learn in an environment that is respectful of diversity and draws upon the prior knowledge, skills and experience of each participant
- will be provided with clear guidelines and standards detailing what you are expected to do to facilitate your learning prior to, during, and after each on-campus session
- will be provided with access to seminal, contemporary and cutting-edge content through a variety of different means
- will be challenged by and supported to engage in learning activities and assessment tasks that are situated and authentic requiring you to grapple with new concepts and ideas and apply these to the analysis of practice and the resolution of problems in leading educational change in your own or another's workplace.
- will be engaged in online and campus based learning activities and assessment tasks that require you to work independently and collaboratively to interpret learning activities/tasks; to plan and implement strategies to address these activities/tasks; and to communicate the outcomes of these learning activities/tasks to others.

In summary, the learning activities and assessment tasks associated with this course will involve you in:

- reading and research (information gathering, analysis, evaluation, and management)
- on-line (asynchronous) and on-campus (synchronous) group-work and discussion
- the preparation of two written papers – a Case Description and a Case Analysis; and
- a presentation based upon your Case Description and Analysis.
