### SUMMARY OF COURSE

This course will provide an overview of numerous transitions students with disabilities face. The focus will be on preparation, support and planning which goes into these transitions. Contemporary legislation, policies, methods and service delivery for education and transitional programming for students with disabilities at different levels (early childhood to primary level, primary to secondary level, secondary to tertiary level, secondary level to vocation) will be discussed.

### THE MAIN WAYS IN WHICH THE COURSE HAS CHANGED SINCE LAST TIME AS A RESULT OF STUDENT FEEDBACK:

### 4. RATIONALE FOR THE INCLUSION OF CONTENT AND TEACHING APPROACH

Research suggests that students with disabilities have difficulty with transitioning through different life phases, such as from primary school to high school, and from high school to tertiary education or vocational settings. To prepare students to make these transitions successfully, teachers can incorporate transition skills into their curricula. This course aims to provide not just an overview of difficult transitions faced by students with disabilities, but also strategies that teachers can employ to increase the success of students during critical life span transitions.

### 5. TEACHING STRATEGIES

- Explicit teaching including online synchronous seminars using a range of teaching strategies to foster interest and support learning;
- Completion of asynchronous modules;
- Engagement in Moodle forums and blogs;
- Structured occasions for reflection on learning to allow students to reflect critically on issues discussed;
- Opportunities for small group dialogue and discussion, allowing students the opportunity to demonstrate their capacity to communicate, to question and to problem solve in breakout groups
- These activities will occur in a climate that is supportive and inclusive of all learners
