### SUMMARY OF COURSE

Creativity is notoriously difficult to define, explain and measure. In this course, you will analyse and evaluate differing theories of creativity and consider creativity's shifting role within the context of cultures and education, including gifted education and arts education. The course focuses on five areas: developing an understanding of the creative object; creative process and creative product; relations between creativity, intelligence, and giftedness; socio-psychological and sociological perspectives including practices and politics of creativity; developing and supporting students' creative outcomes through teacher-student relations; and assessing attempts to facilitate creativity in classrooms.

### THE MAIN WAYS IN WHICH THE COURSE HAS CHANGED SINCE LAST TIME AS A RESULT OF STUDENT FEEDBACK:

- More classroom strategies have been included for practical applications in schools.
- Mock assessments of draft versions of assessment tasks in Video Chat sessions
- Reduction to the numbers of prescribed readings

#### 4. RATIONALE FOR THE INCLUSION OF CONTENT AND TEACHING APPROACH

The teaching, learning, and assessment activities in this course are designed to provide opportunities for you to develop requisite theoretical and practical knowledge and understandings of creativity, and its relations with education, including but not confined to gifted education and arts education. The approach will contribute to your critical evaluation of published chapters and articles from the fields of philosophy, psychology, sociology, and education while enhancing your understanding of how creativity is represented in educational discourses and practices in classrooms. Further, active participation in the course will facilitate your capacity to analyse, evaluate and interpret current cases of creativity in education from a theoretically informed point of view.

#### 5. TEACHING STRATEGIES

To develop both theoretical and practical knowledge and understandings, the course will involve selected readings, teacher input, (re)view of short video clips and other media, peer discussion, structured research activities including an excursion to the AGNSW (TBC), and individual reflection which will provide you with opportunities to engage deeply, dialogically, and reflexively with the topics and their application.
