Summary of the Course

Subject Area: Social Work

Drawing on a biopsychosocial framework of human development this course will examine the experience of health and wellbeing over the lifespan. Developmental theory and perspectives on coping and resilience are used to illuminate individual and ecological factors that promote or inhibit the physical, psychological and social wellbeing of individuals over the lifecourse.

Course Learning Outcomes

1. Identify biopsychosocial theories of human development and health through the lifespan.
2. Critically apply selected theories and concepts addressed to specific developmental stages to explain behaviour.
3. Assess the importance and impact of context (family, school, work) on the nature of development and the experience of health and wellbeing.
4. Identify and evaluate ways in which environmental conditions interact with age, culture and gender to influence development and behaviour.
5. Demonstrate a familiarity with the effects of diversities, disparities and oppressions on human development and health.
6. Demonstrate a considered view of the implications of these theories for social work and research.

Teaching Strategies

A weekly two-hour lecture covers the theory aspects of the course. A weekly one hour tutorial provides an opportunity for students to apply the theory to practice situations and develop skills through the use of role plays, case analysis and student presentations.
Assessment

Assessment Details

Assessment 1: Tutorial Presentation and Paper

Start date: Not Applicable

Length: 1000

Details: This assessment has 2 components: verbal and written, each worth 20%. Students deliver a 5-minute presentation in class and submit a written summary (1000-words) based on the seminar topic one week after their presentation. Students are graded on the presentation and paper. Rubric will be provided in advance so that students can work towards known standards. Feedback will be given within 10 working days of assessment due date.

Additional details:

The tutorial presentation involves students answering a set question using scholarly readings. It involves spoken and written description and analysis of material relevant to the question – further details are below. For themes for tutorial presentations refer to Table of Contents.

<table>
<thead>

<td>Total 40%</td>
</tr>
</tbody>
</table>

Presentation Requirements

Students will present scholarly material related to the tutorial topic. This will be followed by class discussion on the material presented and structured tutorial activities. The presentation should address theoretical issues and should be mostly in your own words. Where others’ words are used, you must acknowledge them. Failure to do so is one form of plagiarism and can lead to a mark of zero. The presentation should also include some prepared questions to stimulate class discussion and engage the class on the topic. Do not just read prepared notes.
The formal presentation is to take 5 minutes each per presenter and may be in the form of a PowerPoint presentation. It is up to the student to present the most important information relevant to the topic. Use the prescribed text and reading suggestions and your own library search material when preparing salient theory, research and issues related to your topic. You may seek the assistance of tutors, librarians and others, but the choice of material is to be yours, and all material should be fully referenced.

For help with oral presentations see: https://student.unsw.edu.au/skills

Criteria for marking presentation:

- Focus on question
- Evidence of research and theory
- Cite sources during presentation
- Critical appraisal

- Engage the class by speaking to your points

Worth 20 marks

The individual written paper

This is to be submitted in Turnitin within the Moodle page within a week following your presentation to allow you to incorporate any discussion from your presentation session. This paper may be subjected to a plagiarism test. The summary should be an academic overview of the topic, 1000 words in length typed with 1.5 spacing. References are not included in the word count and must conform to the School of Social Sciences referencing guide.

All students in the class are expected do some reading from the text before each tutorial in order to inform their participation in the discussion and tutorial activities. Remember, regular attendance at tutorials and lectures is a requirement of this course and unsatisfactory attendance will result in failure.

Criteria for marking:

Worth 20% of marks
Addressed the question adequately
Evidence of research/theory
Cited sources
Critical appraisal of material/issues
Overall organization and integration
Referencing and bibliography

Worth 20% of marks

Turnitin setting: This assignment is submitted through Turnitin and students can see Turnitin similarity reports.

Assessment 2: Major Assignment

Start date: 2/10/2019

Length: 2500

Details: Students submit a 2,500-word essay at the end of Term. The major assignment involves an integrative paper that applies and evaluates core theories within the context of lifespan and health. Rubric is provided in advance so that students can work towards expected standards. This is the final assignment in this course. Feedback will be given within 10 working days of assessment due date.

Additional details:

The purpose of this assessment is to integrate what you have learned from this course and apply this knowledge to a specific phase of the lifespan.

Topic:

An analytical account, with theoretical integration, and a related health issue.

- Identify a stage of human development and a health issue relevant to that stage. The stage and health issue should be clearly identified at the beginning of your assignment.
- Discuss two relevant theories applicable to this stage and the health-related issue. Illuminate your answer with these theories.
- Discuss the life stage and related health issue from the perspective of diversity.

A. Examples of life stages you may choose:

1. The first three years
2. Pre School Age
3. School Age
4. Adolescence
5. Young adulthood
6. Mid-adulthood
7. Late adulthood

B. Examples of Diversity

<table>

<tr>
<td>Sexual orientation</td>
<td>Populations at risk</td>
</tr>
</tbody>
</table>

Guidelines for critical review of the literature and preparation of your assignment

Review the literature that addresses

1. Theory relevant to the developmental issues of the chosen stage
2. Theory relevant to health and illness

§ Your sources could include a combination of material from the text, journal articles, other books, non-published materials e.g. internet sources, novels, media

§ You must critically evaluate this material/data (e.g. research article-sample size, generalizability of study, measures used etc.)

§ Information/data from the internet needs to be evaluated similarly. Information from novels/media are best used in illustrations of the points you are trying to make rather than as data or evidence

Criteria for marking:

Worth 60% of marks

- Evidence of reading and research
- Stage of development/biological, psychological and social factors
- Related health issue
- Two relevant theories
• Evidence of diversity perspectives
• Adequate coverage of question
• Critical evaluation of theory/research/issues
• Ability to summarize and clearly present ideas
• Overall organization and integration
• Originality of thought
• Referencing and bibliography
• Grammar and spelling
• Word limit not exceeding 100 words

Assessments should be referenced in accordance with the School of Social Sciences Referencing Guide, available at https://socialsciences.arts.unsw.edu.au/students/resources/policies-guidelines/

**Turnitin setting:** This assignment is submitted through Turnitin and students can see Turnitin similarity reports.
## Attendance Requirements

Students are strongly encouraged to attend all classes and review lecture recordings.

Submission of Assessment Tasks

Turnitin Submission

If you encounter a problem when attempting to submit your assignment through Turnitin, please telephone External Support on 9385 3331 or email them on externalteltsupport@unsw.edu.au. Support hours are 8:00am – 10:00pm on weekdays and 9:00am – 5:00pm on weekends (365 days a year). If you are unable to submit your assignment due to a fault with Turnitin you may apply for an extension, but you must retain your ticket number from External Support (along with any other relevant documents) to include as evidence to support your extension application. If you email External Support you will automatically receive a ticket number, but if you telephone you will need to specifically ask for one. Turnitin also provides updates on their system status on Twitter.

Generally, assessment tasks must be submitted electronically via either Turnitin or a Moodle assignment. In instances where this is not possible, it will be stated on your course’s Moodle site with alternative submission details.

For information on how to submit assignments online via Moodle: https://student.unsw.edu.au/how-submit-assignment-moodle
Academic Honesty and Plagiarism

Plagiarism is using the words or ideas of others and presenting them as your own. It can take many forms, from deliberate cheating to accidentally copying from a source without acknowledgement.

UNSW groups plagiarism into the following categories:

Copying: using the same or very similar words to the original text or idea without acknowledging the source or using quotation marks. This also applies to images, art and design projects, as well as presentations where someone presents another’s ideas or words without credit.

Inappropriate paraphrasing: Changing a few words and phrases while mostly retaining the original structure and/or progression of ideas of the original, and information without acknowledgement. This also applies in presentations where someone paraphrases another’s ideas or words without credit and to piecing together quotes and paraphrases into a new whole, without appropriate referencing.

Collusion: working with others but passing off the work as a person’s individual work. Collusion also includes providing your work to another student before the due date, or for the purpose of them plagiarising at any time, paying another person to perform an academic task, stealing or acquiring another person’s academic work and copying it, offering to complete another person’s work or seeking payment for completing academic work.

Inappropriate citation: Citing sources which have not been read, without acknowledging the "secondary" source from which knowledge of them has been obtained.

Duplication ("self-plagiarism"): submitting your own work, in whole or in part, where it has previously been prepared or submitted for another assessment or course at UNSW or another university.

Correct referencing practices:

- Paraphrasing, summarising, essay writing and time management
- Appropriate use of and attribution for a range of materials including text, images, formulae and concepts.

Individual assistance is available on request from The Learning Centre (http://www.lc.unsw.edu.au/). Students are also reminded that careful time management is an important part of study and one of the identified causes of plagiarism is poor time management. Students should allow sufficient time for research, drafting and proper referencing of sources in preparing all assessment items.

UNSW Library also has the ELISE tool available to assist you with your study at UNSW. ELISE is designed to introduce new students to studying at UNSW but it can also be a great refresher during your study.

Completing the ELISE tutorial and quiz will enable you to:

- analyse topics, plan responses and organise research for academic writing and other assessment tasks
- effectively and efficiently find appropriate information sources and evaluate relevance to your needs
- use and manage information effectively to accomplish a specific purpose
- better manage your time
• understand your rights and responsibilities as a student at UNSW
• be aware of plagiarism, copyright, UNSW Student Code of Conduct and Acceptable Use of
  UNSW ICT Resources Policy
• be aware of the standards of behaviour expected of everyone in the UNSW community
• locate services and information about UNSW and UNSW Library

Some of these areas will be familiar to you, others will be new. Gaining a solid understanding of all the
related aspects of ELISE will help you make the most of your studies at UNSW.
