Acknowledgement of Country

UNSW Arts, Design and Architecture Kensington and Paddington campuses are built on Aboriginal Lands. We pay our respects to the Bidjigal and Gadigal peoples who are the Custodians of these lands. We acknowledge the Aboriginal and Torres Strait Islander peoples, the First Australians, whose lands, winds and waters we all now share, and pay respect to their unique values, and their continuing and enduring cultures which deepen and enrich the life of our nation and communities.

Course Details

Units of Credit 6

Summary of the Course

Are you interested in understanding and tackling important environment-development challenges in the 21st century? Do you think a community-based approach to development and environment management delivers more sustainable and equitable outcomes? The course interrogates these and many more critical questions surrounding the community-based approach to development and environmental management. The course exposes you to a sophisticated understanding of the current development and environment issues affecting the well-being of local communities in Australia and developing countries. Specifically, the course provides you with the necessary theoretical background as well as a set of case studies to understand and tackle real-world environmental and development challenges. Through this course, you will have an opportunity to integrate social, economic and environmental aspects of development and environmental issues, and the concepts are discussed through the lens of sustainable development from a societal perspective. Ideas and issues are presented as contested entities because of the multiplicity of diverse, and at times, diametrically opposed stakeholder interests. The approach of the course, therefore, eschews the “one right way” approach to development and environment management in favour of an approach based on understanding the diverse and complex societal contexts in which development and environment professionals operate. Different approaches to managing the environment and development projects and programs are illustrated throughout by means of relevant case studies. You will be able to explore whether and how different policies and practices are working (or not working), and how policy responses can be made more equitable and sustainable at the community level.

Course Learning Outcomes

1. Explain the range of development and environmental approaches, issues and responses in relation to the sustainable and equitable development of local communities
2. Critically analyse some community-based development and environmental management policies using case studies, and identify potential options to address challenges facing the local communities
3. Conduct social science research and analysis independently, and also in a team environment, and demonstrate an appreciation of the opportunities and challenges in professional work
4. Demonstrate the development of effective communication and critical analysis skills needed to engage with diverse stakeholders involved in the field of development and environmental management

Teaching Strategies

The course is designed in a way that encourages you to take a ‘deep approach’ to learning. The course content and the adoption of the teaching strategies are student-centred. The learning outcomes will be achieved through a balanced combination of teaching and learning activities such as seminars, reading, class discussion, group work, oral presentation, and online activities. During the term, you are encouraged to interact with your peers and the lecturer through various means, such as the course’s Moodle site and emails. Seminars are conceived of as an interactive learning activity where you can ask questions, discuss ideas and explore solutions.
Assessment

Assessments should be referenced in accordance with the School of Social Sciences Referencing Guide, available at https://socialsciences.arts.unsw.edu.au/students/resources/policies-guidelines/.

Assessment 1: Essay

Assessment length: 1,000 words
Submission notes: All assessments must be submitted electronically only, through the relevant assessment TurnItIn portal in Moodle. There is no hard copy submission required.
Due date: 18/03/2021 11:59 PM

Students are required to write an individual essay on conceptual advances in community-based approach to environment and development management. This essay should be up to 1000 words in length excluding references. The specific questions for this essay, assessment criteria and standards are outlined in the course outline and discussed with the students at the beginning of the semester. Essay will be marked and feedback provided online.

This assignment is submitted through Turnitin and students can see Turnitin similarity reports.

Additional details

Submission due 18 March by 11.59pm

Choose ONE question from the list of questions and write an essay. The paper is up to 1,000 words in addition to references.

1. Does decentralised natural resource management lead (do not lead) to more equitable outcomes? Explain with examples.

2. The SDGs has the ambitious overall aim to “leave no one behind”. Do you agree or disagree that it has been delivering this promise for local communities?

3. Why is community participation in NRM often associated with elite domination? What are the ways to solve the problems of elite domination?

A suggested structure of an essay might be:
Assessment 2: Group Presentation

**Assessment length:** Approx. 30 minutes of group presentation plus Q & A panel, slides and a summary

**Submission notes:** As assigned to each group

Students will be required to work in a group throughout the semester and deliver a group presentation in the class. Assessment criteria and standards are clearly outlined in the course outline and discussed with the students at the beginning of the semester. Mark and feedback on presentation will be provided on and after the presentation.

This is not a Turnitin assignment

**Additional details**

*Group Presentation (20%) due on the specific date for each group*

Group members work together in the development and sharing of a Group Presentation on the specific topic above as selected or assigned to them by the lecturer. The presentation includes a brief introduction of the team members first, followed by all members sharing the presentation in class. The duration of the presentation is expected to be about 30 minutes. After this presentation, the lecturer will moderate the Q&A panel discussion session in which the presenting group members will answer the questions raised by the audience in class/online (approx. 20 minutes). On the next day from the presentation day, one of the group members will upload the presentation PowerPoint slides to the course’s Moodle site, together with a 300 words presentation summary to initiate further discussion on the topic online.

Each member of a group will receive equal mark. Hence, each group member is expected to contribute equally to the development and sharing of the presentation. It is up to the group members to mobilise the member in deciding strategies – e.g., who is going to present which section, and how, and how they are going to organise group activity prior to and during the presentation, and how they are going to engage with the class and in Moodle online by posing questions to stimulate thinking and discussion. It is important that group members actively engage in asking and answering questions in the Q&A panel session as well as online.

Assessment 3: Case Study Report

**Assessment length:** 1,500 words
Submission notes: All assessments must be submitted electronically only, through the relevant assessment TurnItIn portal in Moodle. There is no hard copy submission required.

Due date: 29/04/2021 11:59 PM

Students are required to write a case study report of 1500 words. It involves the analysis of a case study related to any one of the themes: community participation, decentralisation, equity, food security, disasters and urbanisation, in a country (or a region). Assessment criteria and standards are clearly outlined in the course outline and discussed with the students at the beginning of the semester. Case study report will be marked and feedback provided online.

This assignment is submitted through Turnitin and students can see Turnitin similarity reports.

Additional details

Submission due on 29 April 11.59pm

This case study analysis report provides you with the opportunity to investigate in some depth an issue of your interest within a country’s context and write a report. You have the choice of selecting ONE TOPIC from the followings and develop a case study report:

1. Local leadership for accountable disaster management: Lessons from [a project/program/policy] in [a country] (in the Asia Pacific region)

2. Planning for inclusive climate change adaptation: Role of local governments [from a developing country (or in Australia)]

3. In search of local voices: indigenous knowledge in land/nature management in Australia, or NZ, or another country

4. Women’s voices and choices: Enhancing representation of women in decision making of [a project/program/policy] in [a country] (in the Asia Pacific region)

5. Engaging with the neoliberal markets: Can local communities identify and exploit market opportunities in the age of climate change?

6. Addressing centralisation within decentralisation: How and why to solve the problems of elite capture?

The suggested outline for the report might be as below:

1. Introduction - provide a brief background of the topic, and include a brief literature review of the topic to identify the angle of your report, highlighting the problems and formulating a set of objectives of your report. You provide a structure to the report according to the ideas you will present. (~300 words).

2. Description of the case study description and overview of problems and opportunities – Identify a case study project or program from a country or a region, and gather relevant information from websites, articles and reports. You could use the map, pictures and figures to show the nature and
pattern of the issues under consideration. The purpose here is to provide a context of the problems. Depending on the angle you have chosen that is, focus of your analysis, you might like to discuss the broad issue and then three specific sub-issues (~200 words).

3. Evidencing and analysis of problem 1: Gather relevant evidence and analyse these to develop arguments on how and why this problem has emerged and evolved, and provide a brief thoughts on how to solve this problem for the benefit of local communities (~200 words).

4. Evidencing and analysis of problem 2: Gather relevant evidence and analyse these to develop arguments on how and why this problem has emerged and evolved, and provide a brief thoughts on how to solve this problem for the benefit of local communities (~200 words).

5. Evidencing and analysis of problem 3: Gather relevant evidence and analyse these to develop arguments on how and why this problem has emerged and evolved, and provide a brief thoughts on how to solve this problem for the benefit of local communities (~200 words).

6. Finding solutions and making recommendations: Based on the analysis of problems, now you are coming to the stage where you can draw on some literature and link the ideas from the literature to propose viable solutions. Your recommendations must be substantiated by evidence, and are well-argued and convincing with the support of your data as well as ideas from the papers (~200 words).

7. Conclusions: You need to provide a summary of your key ideas and synthesize why and how your report and recommendation is credible. You need to make some statements on the implications of your recommendations to the policy and practice affecting local communities (~200 words).

8. References: Include a full and accurate references of the materials used in this report. (excluded from word budget)
### Attendance Requirements

The School of Social Sciences guidelines on attendance are available at [https://socialsciences.arts.unsw.edu.au/students/resources/policies-guidelines/](https://socialsciences.arts.unsw.edu.au/students/resources/policies-guidelines/).

Students are expected to be regular and punctual in attendance at all classes in the mode in which they are enrolled. All applications for exemption from attendance or to change the mode of attendance of any kind (e.g. face to face or online) must be made in writing to the Course Authority.

A student who attends less than eighty per cent of the classes within a course may be refused final assessment. You are responsible for keeping track of your attendance and contacting your course convenor immediately if you are concerned about your attendance record and its impact on your ability to complete your course successfully.

Explanations of absences from classes or requests for permission to be absent from forthcoming classes should be addressed to the course convenor in writing and, where applicable, should be accompanied by appropriate documentation (e.g. medical certificate).

For the purpose of attendance monitoring, the final assessment for this course is **Case Study Report** worth 50% of your overall grade for this course. This is the assessment item that will be graded at zero if you do not meet the attendance requirement for this course.

For this course, attendance is calculated as shown in the table below:

| Week 1: 14 February - 18 February | Seminar     | **Week 1:** Feb 16 (Wednesday; 2 - 5pm@ Morven Brown G4)  
  **Topic:** Introduction: ‘Local communities’ in Development and Environmental Management – ‘just Sustainability’?  
  Are local communities important for sustainable development? What are the pitfalls and potentials of communities? The first part of this introductory seminar will explore a range of issues and
opportunities for local communities in the age of sustainable development. We will discuss a broad framework for ARTS3750, highlighting some critical themes for working towards environmental justice for the local communities.

Workshop

The second part of this seminar will be a workshop on the course information and learning strategies, including assessment. In particular, the lecturer will elaborate the structure of the seminars and group work as well as online learning activities, that are vital to this course.

Week 2: 21 February - 25 February

Seminar

Week 2: February 23 (Wednesday; 2 - 5pm@ Morven Brown G4)

**Topic: Sustainable development Goals (SDGs): Visionary blueprint for local communities?**

This week will provide a historical and contemporary look at sustainable development. The SDGs were meant to be the bold, visionary successor of the Millennium Development Goals (MDGs), which was criticised for lacking in concrete implantation and guides. With 231 indicators, the SDGs is meant to be a blueprint for global sustainable development and to left no one behind. But just how much influence do the SDGs have in the space of international development policies? With 2030 Agenda for Sustainable Development less than ten years away, this week we will examine SDGs contributions to development policies, its critics and what can be done to ensure the vision is on track. In doing so, we will discuss some of the emerging and existing debates that are critical for international development policy makers to contemplate? Our focus will be to discuss whether, how and why SDGs serving (or not serving) the poorest and disadvantaged communities in developing countries. *In the second part of the seminar, we will go through a set of examples of group presentations from the previous years. These presentations will demonstrate different ways of developing a group presentation. Student groups are encouraged to think creatively to develop an engaging and interesting presentation.*
Examples of group presentations:

In the second part of the seminar, the lecturer will go through a set of examples of group presentations from the previous years. These presentations will demonstrate different ways of developing a group presentation. Student groups are encouraged to think creatively to develop an engaging and interesting presentation.

Group finalisation:

We will finalise the group membership and the topic for each group to work together, if not done already.

Week 3: 28 February - 4 March

Seminar

Week 3: March 2 (Wednesday; 2 - 5pm@ Morven Brown G4)

*Topic: Decentralisation & Ownership of Natural Resources: ‘Fair’ Devolution of power and resources to the communities?*

In a global movement promoting democracy, justice and sustainability, decentralisation has become the centre-piece of policy reforms around the world. Decentralisation is the process where a central government relinquishes some of its management responsibilities or powers to local governments, local leaders, or community institutions. Decentralisation has been advocated for a range of reasons, such as improving efficiency, equity and sustainability, democratisation and people’s participation rural development, public service performance and helping to increase the legitimacy of government. However, decentralisation can occur in ways that leaves the status quo – central government dominance in decision making – largely unchanged, with little benefit to the environment or local empowerment. Optimism of community empowerment has been tempered by the reality of rigid and inequitable local social mechanisms, structures, and relations such as social identity, coercion and trickery and material wealth. Decentralisation can also occur when power is devolved to the local level, but local elites capture most power and benefits. Sometimes, powerful
individuals may control resources, even against the rules produced by the local council, broader society, or state. This seminar explores these and more issues within the frame of what Hardin forcefully argued within the idea of ‘The tragedy of the commons.’

| Group Work | Group Presentation and Q&A Panel by Group 1 - INDONESIA  
*Topic: Decentralisation in Indonesian NRM: Unpacking local accountability* 

Group members work together in the development and sharing of a Group Presentation on the topic above. The presentation includes a brief introduction of the team members first, followed by all members sharing the presentation in class. The duration of the presentation is expected to be about 30 minutes. Following this presentation, the lecturer will moderate the Q&A panel discussion session in which the presenting group members will answer the questions raised by the audience in class/online (approx. 20 minutes). One day after the presentation day, one of the group members will upload the presentation PowerPoint slides to the course’s Moodle site, together with a 300 words presentation summary to initiate further discussion on the topic online. A folder will be created in the course’s Moodle site to upload your presentation slides and summary. Please note that this is a group assessment task with 20% weight. **Due for upload:** 11.59pm, 3 March (penalty applies for late submission).

| Week 4: 7 March - 11 March | Seminar | Week 4: March 9 (Wednesday; 2 - 5pm@ Morven Brown G4)  
*Topic: Tyranny of community participation: Who participates, who profits?* 

Public participation is important for developing and implementing development and environmental policies but is often failing both local communities and the environment. Globally, the question of how local communities organise and work effectively to deliver social and environmental benefits remains an enigma, despite many years of development research and
practice. Does policy process provide an open a political space to disadvantaged groups and individuals to participate? Do government agencies ignore and co-opt marginalised groups to reinforce existing inequitable relations? What are the pitfalls and potentials of public participation to realise transformative change in international development policy and practice? This seminar explores these questions and many more with a view to search for transformative participation.

Group Work

Group Presentation and Q&A Panel by Group 2 - THAILAND

*Topic: Irony of Thailand’s community-based biodiversity conservation: who wins, who loses?*

Group members work together in the development and sharing of a Group Presentation on the topic above. The presentation includes a brief introduction of the team members first, followed by all members sharing the presentation in class. The duration of the presentation is expected to be about 30 minutes. Following this presentation, the lecturer will moderate the Q&A panel discussion session in which the presenting group members will answer the questions raised by the audience in class/online (approx. 20 minutes). One day after the presentation day, one of the group members will upload the presentation PowerPoint slides to the course’s Moodle site, together with a 300 words presentation summary to initiate further discussion on the topic online. A folder will be created in the course’s Moodle site to upload your presentation slides and summary. Please note that this is a group assessment task with 20% weight. **Due for upload: 11.59pm, 10 March**

Week 5: 14 March - 18 March

Seminar

Week 5 (March 16):

*Topic: Indigenous Knowledge in Australian’s NRM – whose knowledge counts?*

Environmental policies and practices are often driven by technical knowledge, undervaluing local and indigenous knowledge and the knowledge from social sciences. As a result, indigenous knowledge is not effectively utilised and local culture ignored. In this seminar, we explore the
politics of knowledge and ideas of science-policy interface, and then discuss insights from a case study which demonstrate how and why indigenous knowledges are not effectively utilised in the natural resource management policies and practices in NSW Australia.

<td></td>
</tr>
</tbody>
</table>

Urban environments and communities are often confronted with multiple and at times incommensurable interest sets that do not lend themselves to straightforward solutions. This seminar explores wicked problems and the struggles of local communities in Eastern Sydney to stop harming the environment at Malabar Headland. Many scholars have highlighted why do higher levels of governments often attempt to ignore community interest, while urban communities tend to be disorganised to fight for their rights. However, the case of Malabar shows something interesting – urban communities fighting for their environmental for decades and finally forcing the governments to address their concerns. In this seminar, we will explore historical complexities and power dynamics of local struggle in Malabar Headland.

| Group Work | Group Presentation and Q&A Panel by Group 4 - BANGLADESH **Topic: Politics of climate change adaptation – Nurturing local leadership?** |
Group members work together in the development and sharing of a Group Presentation on the topic above. International support during the time of humanitarian disasters has been crucial to respond and recovery, but its effectiveness has been widely questioned. Transparency and accountability of donors have been frequently questioned. This seminar explores, with a case study of Nepal's earthquake recovery practices, a range of questions such as what humanitarian policies' relationship to international development is; how do global, universal humanitarian policies translate into local context, and how and why local leadership is more pronounced during the time of response and recovery than external forces.

| Seminar | Week 10: Apr 20 (Wednesday; 2 - 5pm@ Morven Brown G4)  
**Topic:** Wrapping Up: Transforming community participation |
|----------|------------------------------------------------------|

This week will be a reflection on the topics covered throughout the term, with thoughts on how and why to transform the role and possibilities of local communities in development and environment management, and how and why each student could become a community champion for change! We will also have some time for critical self-reflection using the 3-2-1 exercise, combined with the completion of the end of term survey.

<table>
<thead>
<tr>
<th>Group Activity</th>
<th>The 3-2-1 Reflective Practice Session:</th>
</tr>
</thead>
</table>

Students will work in their groups and individually reflect on the followings:

3: Three critical ideas/theories learned from the course’s seminar  
2: Two issues they have enjoyed working in the group work  
1: Burning question that they will further work in their studies and work.
After the group reflection, each group will share a summary of their discussion, highlighting the contribution made by the course in their overall learning journey.

Week 9 (April 13):
(Un)accountable foreign aid and community-based disaster governance: Local champions in Nepal’s disaster recovery

Required Reading:

Suggested Reading:

Week 10 (April 20):
Wrapping Up: Transforming community participation

This week will be a reflection on the topics covered throughout the term, with thoughts on how and why to transform the role and possibilities of local communities in development and environment management, and how and why each student could become a community champion for change!

Recommended Resources

If you are very keen to explore further on development, community and environment, you might want to check out the list which contains some interesting articles/books below.

management, lessons from community forestry in Nepal, Australian Forestry 71 (2): 135-146.

**Course Evaluation and Development**

Student feedback is gathered periodically using, among other means, UNSW’s myExperience process. Informal feedback and class-generated feedback are important. A brief survey will be conducted around the middle of the semester to identify areas of student issues. Analysis of feedback will inform the reasonable adjustment of course content and delivery where possible. Student feedback is taken seriously, and continual improvements are made to the course based in part on such feedback. Changes to the course will be introduced to subsequent cohorts of students taking the course.
Submission of Assessment Tasks

Turnitin Submission

If you encounter a problem when attempting to submit your assignment through Turnitin, please telephone External Support on 9385 3331 or email them on externalteltsupport@unsw.edu.au. Support hours are 8:00am – 10:00pm on weekdays and 9:00am – 5:00pm on weekends (365 days a year). If you are unable to submit your assignment due to a fault with Turnitin you may apply for an extension, but you must retain your ticket number from External Support (along with any other relevant documents) to include as evidence to support your extension application. If you email External Support you will automatically receive a ticket number, but if you telephone you will need to specifically ask for one. Turnitin also provides updates on their system status on Twitter.

Generally, assessment tasks must be submitted electronically via either Turnitin or a Moodle assignment. In instances where this is not possible, it will be stated on your course’s Moodle site with alternative submission details.

For information on how to submit assignments online via Moodle: https://student.unsw.edu.au/how-submit-assignment-moodle
Academic Honesty and Plagiarism

Plagiarism is using the words or ideas of others and presenting them as your own. It can take many forms, from deliberate cheating to accidentally copying from a source without acknowledgement.

UNSW groups plagiarism into the following categories:

Copying: Using the same or very similar words to the original text or idea without acknowledging the source or using quotation marks. This includes copying materials, ideas or concepts from a book, article, report or other written document, presentation, composition, artwork, design, drawing, circuitry, computer program or software, website, internet, other electronic resource, or another person’s assignment without appropriate acknowledgement.

Inappropriate paraphrasing: Changing a few words and phrases while mostly retaining the original information, structure and/or progression of ideas of the original without acknowledgement. This also applies in presentations where someone paraphrases another’s ideas or words without credit and to piecing together quotes and paraphrases into a new whole, without appropriate referencing.

Collusion: Working with others but passing off the work as a person’s individual work. Collusion also includes providing your work to another student for the purpose of them plagiarising, paying another person to perform an academic task, stealing or acquiring another person’s academic work and copying it, offering to complete another person’s work or seeking payment for completing academic work.

Inappropriate citation: Citing sources which have not been read, without acknowledging the "secondary" source from which knowledge of them has been obtained.

Duplication ("self-plagiarism"): Submitting your own work, in whole or in part, where it has previously been prepared or submitted for another assessment or course at UNSW or another university.

Correct referencing practices

The UNSW Academic Skills support offers resources and individual consultations. Students are also reminded that careful time management is an important part of study. One of the identified causes of plagiarism is poor time management. Students should allow sufficient time for research, drafting and proper referencing of sources in preparing all assessment items.

UNSW Library has the ELISE tool available to assist you with your study at UNSW. ELISE is designed to introduce new students to studying at UNSW but it can also be a great refresher during your study. Completing the ELISE tutorial and quiz will enable you to:

- analyse topics, plan responses and organise research for academic writing and other assessment tasks
- effectively and efficiently find appropriate information sources and evaluate relevance to your needs
- use and manage information effectively to accomplish a specific purpose
- better manage your time
- understand your rights and responsibilities as a student at UNSW
- be aware of plagiarism, copyright, UNSW Student Code of Conduct and Acceptable Use of UNSW ICT Resources Policy
- be aware of the standards of behaviour expected of everyone in the UNSW community
- locate services and information about UNSW and UNSW Library
Academic Information

Due to evolving advice by NSW Health, students must check for updated information regarding online learning for all Arts, Design and Architecture courses this term (via Moodle or course information provided.)

For essential student information relating to:

- requests for extension;
- late submissions guidelines;
- review of marks;
- UNSW Health and Safety policies;
- examination procedures;
- special consideration in the event of illness or misadventure;
- student equity and disability;
- and other essential academic information, see
