| Peter Neal | <a href="mailto:peter.neal@unsw.edu.au">peter.neal@unsw.edu.au</a> | Tue, 2-3 pm via the Thesis Office Hours meeting in Teams | Room 216, Hilmer Building (E10) – across the bridge from Level 2, SEB (E8) | +61-(0)2-9385-4814 |

### School Contact Information

For assistance with enrolment, class registration, progression checks and other administrative matters, please see [the Nucleus: Student Hub](#). They are located inside the Library – first right as you enter the main library entrance. You can also contact them via <http://unsw.to/webforms> or reserve a place in the face-to-face queue using the UniVerse app.

If circumstances outside your control impact on submitting assessments, Special Consideration may be granted, usually in the form of an extension or a supplementary assessment. Applications for Special Consideration must be submitted [online](#).

For course administration matters, please contact the Course Coordinator.

## Course Details

### Units of Credit 4

### Summary of the Course

Research Thesis is an inquiry-based learning course that provides an opportunity for students to bring together discipline knowledge and principles learned through academic study. Students apply these principles to innovatively solve problems such as the development of a specific design, process and/or the investigation of a hypothesis. Students taking Advanced Research Thesis are expected to demonstrate these qualities at an advanced level.

The project a student undertakes must be a complex, open-ended problem that allows room for creativity, and the acquisition, analysis and interpretation of results. There must be multiple possible solutions or conclusions at the outset and sufficient complexity to require a degree of project planning from the student.

Apart from in exceptional circumstances, you should continue with the same supervisor and project as you had in CEIC4951/9951.

This is the second course of the three course thesis structure. Subject to making excellent progress in CEIC4951/9951 and with the approval of your supervisor, you may be allowed to enroll in CEIC4953/9953 at the same time as this course.

### Course Aims

The aim of this course is that students to become critically conversant in the academic and professional literature on a particular topic, formulate problems in technical terms, manage an extended project and find solutions by applying engineering and/or scientific methods. Students are also expected to explain how their project fits within the discipline and broader societal context. Finally, students demonstrate their ability to autonomously work in a research and development environment.

### Course Learning Outcomes

After successfully completing this course, you should be able to:

| Learning Outcome                                                                                                        | EA Stage 1 Competencies                         |
|-------------------------------------------------------------------------------------------------------------------------|-------------------------------------------------|
| 1. Develop a design or a process or investigate a hypothesis following industry and professional engineering standards. | PE2.3, PE2.4, PE1.3, PE1.4, PE1.5, PE3.1, PE3.3 |
| 2. Critically reflect on a specialist body of knowledge related to their thesis topic.                                  | PE1.4, PE3.4                                    |
| 3. Apply scientific and engineering methods to solve an engineering or food science problem.                            | PE2.1, PE2.2, PE3.4                             |
| 4. Analyse data objectively using quantitative and mathematical methods.                                                | PE1.2, PE2.1, PE2.2, PE1.1                      |
| 5. Demonstrate oral and written communication in professional                                                           | PE3.2, PE3.5                                    |

| Learning Outcome | EA Stage 1 Competencies |
|------------------|-------------------------|
| and lay domains. |                         |

## Professional Recognition of Course

CEIC4952 is part of the UNSW Food Science specialisations approved (2021-2026) by the Institute of Food Technologists Higher Education Review Board (IFT HERB).

## Relationship with the rest of your program and the discipline

Research Thesis is a capstone course which requires you to employ knowledge and skills developed throughout the rest of your studies. The degree to which you rely on the knowledge from any one course will depend on your project. For example, thesis projects may involve you using your knowledge of chemistry and thermodynamics, your design and process modelling capabilities, or your skills in lifelong learning to develop expertise outside of your regular coursework.

All projects will require you to employ the professional skills you have developed. Good oral and written communication skills will be expected, not only for your assessments but also for the day-to-day activities like meetings and lab work. Teamwork skills are also essential as you work with your supervisor, other researchers, and technical staff.

Beyond university, Thesis provides you with an opportunity to demonstrate to professional bodies and potential employers that you can research and propose solutions to a significant problem, manage a large, open ended project, and communicate your findings in a professional manner.

## Teaching Strategies

This is an experiential, enquiry-based learning course structured around single long-form open-ended project. Therefore, main learning activity is self-directed study or project work, at your own speed, under the guidance of your supervisor(s). In Thesis B, you will be executing your research plan, discussing your results with your supervisor and planning next steps, plus communicating your preliminary findings.

The main source of feedback in this course is the regular meetings you have with your supervisor. These meetings are a great time to seek advice on project directions, get help with things you don't understand, brainstorm/debug issues that you're having, and have your progress evaluated. You should arrange regular weekly or fortnightly meetings with your project supervisor or co-supervisor. These meetings may be in person or online.

Finally, research is a always collaborative exercise. This is primarily found in your interactions with your supervisor(s) and the literature, but projects may also involve group discussions and collaborative work. It is important to engage with and use these activities for learning. However, as thesis is ultimately an individual project, your project deliverables should focus on your ideas and your work, and explicitly acknowledge the contributions of others.

## Additional Course Information

### Integrity and Respect

The [UNSW Student Code of Conduct](#) among other things, expects all students to demonstrate integrity

in all their academic work and to treat all staff, students and visitors to the University with courtesy, tolerance and respect.

As a research course students are also expected to comply with it must comply with the [UNSW Research Code of Conduct](#), particularly the Principles of the Responsible Conduct of Research and Responsibilities of UNSW Researchers outlined in the code, as well as the University's [Human Research Ethics Procedure](#) and/or [Animal Research Ethics Procedure](#). For more information visit the [UNSW Research Integrity Policies and Procedures page](#).

### **Time commitment**

CEIC4952 is a 4 UOC course and has no final exam, therefore you are expected to spend a minimum of 100 hours (or 10 hours per week during term) to complete the requirements of this course. While CEIC9952 is a 6 UOC course and so the demands on your time are correspondingly higher – 150 hours over the term or 15 hours per week.

### **Competence**

Thesis is a capstone course and you are expected to be competent in all the material covered in the previous courses. Little time is available to remediate deficiencies in your knowledge.

Over the course of the term, you will be developing new competencies. The standards we expect, are explained by the marking rubrics provided. Your supervisor will apply these marking guides fairly and provide you with feedback so you can continue to improve over the three thesis courses.

### **Participation**

You are expected to contact your project supervisor early and maintain contact regularly to carry out a suitable project. This would typically involve face-to-face meetings, but also includes email and other electronic means. Allow at least an hour per week for these activities.

You are expected to be proactive in identifying and completing any project dependent preparations including workplace health and safety requirements, and any training or access requirements. You should also be proactive in seeking feedback on your progress from your supervisor. The degree to which you take initiative and engage with your project work will be assessed in each thesis course.

You are encouraged to use the course forum to discuss challenges faced through this course, ask questions about course content, discuss solutions to tutorial and practice questions. It is expected that students will help each other, and the coordinator will contribute as required.

Further, as senior students you are expected to be able to work effectively on your own. This includes seeking our help with your project from your supervisor, lab manager or other people involved in the supervision of your project or the course.

### **Attendance and punctuality**

We expect students to be punctual and attend at all scheduled meetings with the coordinator, your supervisor, or their team. If you are unable to attend a pre-arranged meeting, observe normal professional courtesies and inform the parties involved ASAP.

## Assessment

Your final grade for Thesis A, B & C will be the weighted average of all assessments across all three courses:

- Thesis A
  1. Project Supervision (SY/FL) – Friday, Week 1
  2. Project Specification (SY/FL) – Friday, Week 3
  3. Draft Literature Review (SY/FL) – Monday, Week 7
  4. Literature Review (10%) – Monday, Week 9
  5. Project Plan (5%) – Monday, Week 11
- Thesis B
  1. Progress Reflection (5%) – Monday, Week 11 (Thesis B only), or Friday, Week 3 (Thesis B & C together)
  2. Progress Seminar (5%) – Arranged with your supervisor.
  3. Supervisor's Report B (5%) – No submission required
- Thesis C
  1. Final Report and supporting files (60%) – Monday, Week 11
  2. Presentation and Q&A (5%) – Wednesday & Friday, Week 11
  3. Supervisor's Report C (5%) – No submission required

## Course grades and progression

If you satisfactorily complete the requirements of Thesis A, you will receive an EC grade (enrollment continuing) and will be allowed to continue to Thesis B. In the same way, satisfactory completion of Thesis B (EC grade) will enable progression to Thesis C. Students who make excellent progress in Thesis A, may be allowed to enrol in Thesis B and C at the same time (accelerated study mode).

If you do not complete any assessment tasks (beyond securing a supervisor), you will receive an AF grade and must repeat this course. If you complete one or more assessment items and still fail to satisfy the course requirements, you will receive an FL and must repeat this course. Students that fail a thesis course (AF or FL) may be asked by their supervisor to change projects or find another supervisor, this may require the student to begin again at Thesis A.

If you receive an LE grade, it means that marks are missing for one or more of your assessments. You can check which marks are missing in the Moodle gradebook. When all the missing marks are received, we will forward your grade (either EC or FL) to Student Services for processing.

Upon completion of Thesis C, your marks from all three courses will be aggregated into a single thesis mark and retrospectively applied to all three courses (replacing the EC grades).

The Student Gateway provides more details on the UNSW [grading system](#) and [assessment](#).

| Assessment task        | Weight | Due Date                                            | Course Learning Outcomes Assessed |
|------------------------|--------|-----------------------------------------------------|-----------------------------------|
| 1. Progress Reflection | 5%     | 9pm Fri, Week 3 (Thesis B & C together) OR 9pm Mon, | 1, 2, 3, 4, 5                     |

| Assessment task          | Weight | Due Date                | Course Learning Outcomes Assessed |
|--------------------------|--------|-------------------------|-----------------------------------|
|                          |        | Week 11 (Thesis B only) |                                   |
| 2. Seminar               | 5%     | TBA with supervisor     | 1, 2, 3, 4, 5                     |
| 3. Supervisor's Report B | 5%     | Not Applicable          | 1, 2, 3, 4, 5                     |

## Assessment 1: Progress Reflection

**Assessment length:** 5-10 pages

**Submission notes:** The Progress Report should be submitted as a single PDF or Word document through Moodle.

**Due date:** 9pm Fri, Week 3 (Thesis B & C together) OR 9pm Mon, Week 11 (Thesis B only)

Students will report progress against their milestones – including a summary of completed work, initial results and discussion. Students will also provide a written reflection on their progress and an updated plan for the rest of their project.

The report will be marked by the student's supervisor using a standard rubric with comments returned to the student.

### Assessment criteria

This task will be assessed using the following rubric.

| Level                    | Deficient                                                                                                                                                                                                                                                                          | Adequate                                                                                                                                                                                                                                                       | Proficient                                                                                                                                                                                                                 | Good                                                                                                                                                                                                                                            | Outstanding                                                                                                                                                                                                                                                  |
|--------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Mark band                | 0-9                                                                                                                                                                                                                                                                                | 10-13                                                                                                                                                                                                                                                          | 13-15                                                                                                                                                                                                                      | 15-17                                                                                                                                                                                                                                           | 17-20                                                                                                                                                                                                                                                        |
| Reporting progress (60%) | <p>Achievement is not satisfactory with respect to the plan. Little work has been done to address any complexities or challenges encountered.</p> <p>Little or no discussion of the work completed.</p> <p>It is unclear that the student understands what their results mean.</p> | <p>Marginal achievement compared to the plan. If complexities have been encountered a plan for equivalent work has been developed but with little progress.</p> <p>Only superficial discussions of the work completed.</p> <p>The student will probably be</p> | <p>Mostly satisfactory achievement against the plan. If complexities have been encountered a plan for equivalent work has been developed and a good start has been made.</p> <p>Some discussion of the work completed.</p> | <p>Highly satisfactory achievement against the plan. If complexities or challenges have been encountered, a plan for equivalent work has been developed with satisfactory progress made.</p> <p>Detailed discussions on the work completed.</p> | <p>Achievement is beyond expectations with respect to plan. If any complexities or challenges have been encountered, a plan for equivalent work has been developed with significant progress made.</p> <p>Highly detailed discussions on work completed.</p> |

| Level                        | Deficient                                                                                                                                                                                                                               | Adequate                                                                                                                                                                                                                    | Proficient                                                                                                                                                                                                                                                                                                             | Good                                                                                                                                                                                                                                                                                                                                                                                                                                                              | Outstanding                                                                                                                                                                                                                                                                                                                                                                                                                                                 |

|           | <p>language style (e.g. too informal)</p> <p>Presentation is poor to the extent that it impedes reading of the document. Examples include inconsistent formatting, and unlabelled figures or tables.</p> <p>References are either not cited or cited inconsistently.</p> | <p>language style.</p> <p>Although figures and tables are labelled, the formatting is unclear and/or inconsistent to the extent that the reader can lose track of the context when reading.</p> <p>References in text match reference list (and vice versa) and are mostly cited correctly.</p> | <p>Figures and diagrams are generally fine, although there may be some issues with the graphical presentation of data - poor choice of axes, overcrowding, poor use of chart space, etc.</p> <p>References in text match reference list (and vice versa) and are cited properly.</p> | <p>Graphical elements (figures, tables, etc.) are labelled, largely formatted consistently and cited correctly.</p> <p>References in text match reference list (and vice versa) and are cited properly.</p> | <p>All aspects of formatting are consistent throughout the document. Graphical and tabular presentation of data is appropriate, clear, consistent and economical. Discernment is shown in the placement of graphical elements (figures, tables, etc.), whether in the body of the work or in the appendices.</p> <p>References in text match reference list (and vice versa) and are cited properly.</p> |

## Assessment 2: Seminar

**Submission notes:** The Seminar should be presented in front of a specialist audience with multiple markers. Students unable to make it to campus because of travel restrictions or industry projects, may present via Microsoft Teams but their face must be visible to the audience for at least part of the presentation.

**Due date:** TBA with supervisor

Students will communicate their research and its results in a seminar for members of their supervisor's research group (or industry team). This presentation is intended primarily for a specialist audience.

The seminar will be marked by members of the audience with comments returned to the student.

### Assessment criteria

This task will be assessed using the following rubric.

| Level               | Poor                                                                                                                                                                                                 | Deficient                                                                                                                                                                                                                                                     | Adequate                                                                                                                                                                                                                                           | Adept                                                                                                                                                                                                                                                                        | Outstanding                                                                                                                                                                                                                            |

|           | aids.<br><br>The student is unable to communicate their ideas or in comprehensible. | The student is hard to understand and struggles to communicate their ideas. | communicate their ideas to the audience. | The student communicates their ideas to the audience clearly. | communicates their ideas to the audience in a clear and engaging manner. |

### Assessment 3: Supervisor's Report B

**Submission notes:** No submission is required.

In addition to a written comment on the student's progress, the supervisor will indicate the degree to which the student has shown initiative, sustained engagement, and diligence in their project work during Thesis B using a standard rubric.

#### Assessment criteria

This task will be assessed using the following rubric.

| Level                           | Negligible                        | Poor                                                                                                                     | Marginal                                                                                                                                  | Proficient                                                                                                                                                               | Good                                                                                                               | Outstanding                                                                                                                                                          |
|---------------------------------|-----------------------------------|--------------------------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Mark                            | 0                                 | 4                                                                                                                        | 5                                                                                                                                         | 7                                                                                                                                                                        | 8                                                                                                                  | 10                                                                                                                                                                   |
| Initiative and engagement (33%) | No engagement shown.              | Irregular, sporadic engagement in the project. The student needed a lot of pushing from supervisor to make things happen | Regular engagement but only just adequate. The student showed some evidence of driving the project but considerable need for improvement. | Consistent engagement. Clear evidence of student driving the project (e.g. prepared questions/agendas for meetings, proactive approach to developing research proposal). | High level of sustained engagement throughout the whole term. Student initiated many own ideas during the process. | Superior evidence of engagement. The student is intellectually and practically driving the project, going beyond what is generally expected of a coursework student. |
| Sustained activity (33%)        | No or minimal activity across all | No or minimal activity across most                                                                                       | The student is doing enough to progress the                                                                                               | The student is consistently applying                                                                                                                                     | High level of sustained effort throughout                                                                          | Superior evidence of effort. The student is                                                                                                                          |

| Level                                                 | Negligible                          | Poor                                                                                                                           | Marginal                                                                                                   | Proficient                                                                                           | Good                                                                                                        | Outstanding                                                                                                                                                           |

| Mark                                                  | 0                                   | 4                                                                                                                              | 5                                                                                                          | 7                                                                                                    | 8                                                                                                           | 10                                                                                                                                                                    |
|                                                       | areas of the project.               | areas of the project. It is unlikely a satisfactory thesis project will be completed without a significant change in attitude. | project but needs to increase the work harder to ensure they satisfactorily complete their thesis project. | themselves and working at a level that will see their project progress to a satisfactory conclusion. | the whole term. The student is working at a level that will ensure smooth progress of their thesis project. | working at a level where there is now opportunity for extending the scope or depth of the project.                                                                    |
| Diligence and competence in performing the task (33%) | No care or competence demonstrated. | The student appears to be careless or technically incompetent in doing the work                                                | The student's work is satisfactory – you are fairly sure results from project are useable and trustworthy  | The student's work is good – you are confident with student's results                                | The student's work is professionally performed and meticulously recorded.                                   | The student is very persistent and unrelenting in performing the task, demonstrate superior level of knowledge and applied thinking to solving an engineering problem |

## Attendance Requirements

Students are expected to attend all scheduled meetings with supervisors, and if applicable, co-supervisors and research groups. Students in Thesis B should also be regularly attending the lab (or equivalent workspace) to complete their planned project work.

## Course Schedule

### Individual project schedule

There are no set lectures, workshops or lab classes for this course. In Thesis A you developed a project plan and you should use that to determine what you do each week. Review your proposed plan from Thesis A with your supervisor and make any adjustments they recommend and then get to work. Your immediate task is to finalise any outstanding safety, ethics and distance study approvals.

Remember to set aside some time each week for project management work - review and update your Gantt chart, project risk analysis and resource requirements. You should also include project management as a standing item in your regular meetings with your (co-)supervisor.

### Thesis Office Hours

The one regular meeting for the whole class are the weekly [Thesis Office Hours](#) session on Tuesday, 2-3pm with the Course Coordinator. This is an optional online consultation time with no fixed agenda. Join if you want help with anything about this course and its assessments - questions may also be posted anonymously on Slido using the event code #Thesis.

Project specific questions should be directed to your supervisor.

## Resources

### Prescribed Resources

The [Moodle page](#) for this course is very important. As well as being a venue for the assessment information, submission and feedback, there are links to resources, advice, and guidance. While, the [Research Thesis Projects page](#) (enrollment code co3shyh) provides information about supervision, answers to FAQs and advice on enrolment options.

[Microsoft Teams](#) will be used as the main discussion platform. You can ask questions there at any time, or during the weekly office hours session.

You also have access to 3 hours of Smarthinking tutor time. Please see the course Moodle page for instructions on how to use this service.

### Recommended Resources

Your supervisor will advise you of books, journal articles and websites where you may find information as a starting point for your research project. After that, it is your responsibility to search out and evaluate information. Students are strongly encouraged to make use of a [reference management system](#) like EndNote, Mendeley or BibTeX. The Student Gateway also provides guidance on the particular forms of written communication found in thesis courses:

- [Literature Reviews](#)
- [Research Proposals](#)
- [Honours Theses](#)

### Study space for project courses

Students enrolled in selected project- and laboratory-based courses are granted access to Room 102 on Level 1 of the Science and Engineering Building (Map Ref. E8). Access to this space is subject to the following conditions:

- Students must follow any directions from teaching and technical staff.
- This space is provided for private study and/or small group project meetings related to courses taught by the School of Chemical Engineering.
- Some classes have booked this space and students should vacate the space during these classes.
- Students using the space are expected to leave the space in the same or better condition than they found it. Keeping this in mind, limited consumption of food and drink is permitted.

Failure to observe any of these conditions may result in your access being revoked.

### Course Evaluation and Development

We want your feedback on this course whether positive or negative. You can provide verbal or written feedback directly to the course coordinator, through our course's discussion forum or through the University's myExperience survey.

Feedback we received from previous offerings of this class have resulted in us

- Introducing a “Getting Started with Thesis” session.
- Introducing lessons on research skills, e.g. working with academic literature, writing critical reviews and researching safely.
- Providing more assistance in written communication via the Smarthinking service.
- Introducing a formative assessment in Week 3, so that you get sense of how you’re going.
- Creating online Office Hours sessions.
- Revising marking rubrics for clarity.
- Preparing guides for selected assessments.

## Laboratory Workshop Information

The requirements for risk management and lab access will differ between projects. If you have any questions about risk management policies and procedures, please contact the Faculty’s Health, Safety & Environment Team ([eng.gen.hse@unsw.edu.au](mailto:eng.gen.hse@unsw.edu.au)).

## UNSW Supervised Projects

If your project being directly supervised by UNSW staff, you should consult with your supervisor about risk management for your project.

1. The [School's General Safety](#) page provides an introduction to the University safety system and School-specific arrangements, as well as safety induction information for the SEB (E8), Hilmer (E10), Tyree (H6) and Chemical Sciences (F10) Buildings. All students should at least complete Module 1 which introduces general safety procedures in the School of Chemical Engineering.
2. All projects will involve some desk or office-based activities (e.g. preparing reports, writing code, running simulations). There are risks associated with these activities that are not necessarily low. You should visit the UNSW Office Safety Toolkit page (<https://safety.unsw.edu.au/office-safety-toolkit>) to learn about safety in an office or desktop practice. The pages on Office Hazards and Risks and Workstation Setup will be particularly useful.
3. If your project involves laboratory or field work, you will need to complete the School of Chemical Engineering approval process. The steps involved are outlined on [this webpage](#). To complete this process, you will have to fulfill various training and documentary requirements. Therefore you should allow several weeks to complete this process.

## Industry Supervised/Hosted Projects

If your project is being hosted/supervised by an external organisation (e.g. a company or research organisation), then you need to comply with that organisation’s risk management policies and procedures.

1. You still need a UNSW supervisor – please consult with them about how they will be involved with your project – at the very least, they will be responsible for the academic administration of your project. They may wish to meet with you periodically to discuss your progress.
2. For the purposes of workplace health and safety legislation, you are considered a worker of that company and they are responsible for your safety.
  - If you are not being paid by the organisation for your thesis work, you are covered by the University’s [personal accident](#) and [public liability](#) insurance policies. A certificate of currency can be supplied.

- If you are being paid by the organisation to conduct your thesis work, then you should be covered by their insurance policies. Please check with your industry supervisor.
- 3. Finally, you **must** formally ask permission to do your project in industry. Do this by completing and submitting the “Application for distance thesis study” form on Moodle. Seeking formal permission ensures there is no confusion about why you are working onsite with an external organisation.

For more information, please read the guides on moving from Industrial Training to Honours, and for Thesis in Industry on the [Research Thesis Projects page](#).

## Project ethics approval

Does your thesis involve other people doing something for you? If so, it may require ethics approval.

The basic principle is that if you want people to provide you with something, even if just 5 min of their time to answer questions, then you should (i) treat them with suitable dignity and (ii) ensure any possibility that they may be badly affected is absolutely minimised.

When research at UNSW involves people, then it come under the oversight of the UNSW Ethics Committee which must give approval before it proceeds.

You will need to get approval, if your project involves any of the following (more than one may apply):

- a survey, even if done on-line
- an interview, focus group, or other such “qualitative” method
- data mining when individual identities might be revealed
- behavioural observation, e.g. people using something, choices people make, on-line activities
- recording or photography of people, even if in public spaces
- experiments on human reactions (or other abilities)
- human performance, e.g. running, falling, playing music
- testing a device (on people)
- tasting or smelling, e.g. foods
- and, of course, drug trials, body tissues and other medical activities.

Also, projects involving animals will need ethics approval. If your project does require approval, in the first instance, discuss this with your Supervisor.

## Project confidentiality and intellectual property

Thesis project sometimes have information restrictions imposed upon them, typically a confidentiality agreement for industrially linked projects. If you are unsure whether this applies in your case, consult your supervisor.

If your project is subject to this kind of restriction you will need to ensure that any files you submit to Moodle are encrypted prior to upload and that the parties who have signed the relevant agreement are given copies of the password. Please seek advice from your supervisor in relation to hardcopy hand-in.

Further, students and academic supervisors may be asked to enter into a confidentiality or non-disclosure agreement. Students are entitled to seek independent legal advice before signing such an agreement. University staff should seek advice from the Research Contracts Office &/or UNSW Legal.

## Distance study

It is possible to complete your entire project by distance.

You should discuss the particular arrangements for your project with your supervisor. This should include the nature of your project (e.g. types research/design, access to data), how you will meet and how often (at least fortnightly and preferably by video call), accessing to literature and software (e.g. via the UNSW Library, myAccess &/or UNSW VPN/China Access Network).

Then you must complete the "Application for distance thesis study" form available on Moodle. Since you probably won't have a supervisor at your off-campus location, please a reason like "unable to visit campus because of travel restrictions" in the distance supervision field. Next get your supervisor to sign the application. Finally, upload your application using the Upload form via the link on Moodle. You will receive notification in your email if your application is approved or rejected. The notification on Moodle may not change immediately, as it is a manual process.

Note: It is probably best to apply for permission for distance study for all your remaining thesis courses. If you do that, your permission status will be rolled over into future courses and you won't have to apply again next term.

## Submission of Assessment Tasks

In the School of Chemical Engineering, all written work will be submitted for assessment via Moodle unless otherwise specified. Attaching cover sheets to uploaded work is generally not required; when you submit work through Moodle for assessment you are agreeing to uphold the Student Code.

Some assessments will require you to complete the work online and it may be difficult for the course coordinator to intervene in the system after the due date. You should ensure that you are familiar with assessment systems well before the due date. If you do this, you will have time to get assistance before the assessment closes.

All submissions are expected to be neat and clearly set out. Your results are the pinnacle of all your hard work and should be treated with due respect. Presenting results clearly gives the marker the best chance of understanding your method; even if the numerical results are incorrect.

Marking guidelines for assignment submissions will be provided at the same time as assignment details to assist with meeting assessable requirements. Submissions will be marked according to the marking guidelines provided.

### Late penalties

Unless otherwise specified, submissions received after the due date and time will be penalised at a rate of 5% per day or part thereof (including weekends). For some activities including Moodle quizzes and Team Evaluation surveys, extensions and late submissions are not possible.

### Special consideration

If you have experienced an illness or misadventure beyond your control that will interfere with your assessment performance, you are eligible to apply for Special Consideration prior to submitting an assessment or sitting an exam.

UNSW has a [Fit to Sit / Submit rule](#), which means that if you attempt an exam or submit a piece of assessment, you are declaring yourself fit enough to do so and cannot later apply for Special Consideration.

For details of applying for Special Consideration and conditions for the award of supplementary assessment, please see the information on UNSW's [Special Consideration page](#).

**Please note** that students will need to provide some documentary evidence to support absences from any assessments missed because of COVID-19 public health measures such as isolation. UNSW will **not** be insisting on medical certificates for COVID-related absences of 7 days or less, with the positive PCR or RAT result being sufficient. Longer absences due to self-isolation or COVID-related illness will still need documentation such as a medical certificate.

Applications for special consideration **will still be required** for assessment and participation absences related to COVID-19. Special consideration requests should not be lodged for missing classes if there are no assessment activities in that class.

## Academic Honesty and Plagiarism

**Academic integrity** is fundamental to success at university. Academic integrity can be defined as a commitment to six fundamental values in academic pursuits: honesty, trust, fairness, respect, responsibility and courage (International Center for Academic Integrity, 'The Fundamental Values of Academic Integrity', T. Fishman (ed), Clemson University, 2013). At UNSW, this means that your work must be your own, and others' ideas should be appropriately acknowledged. If you don't follow these rules, plagiarism may be detected in your work.

Further information about academic integrity and plagiarism can be located at:

- The [Current Students site](#)
- The [ELISE training site](#)

The Conduct and Integrity Unit provides further resources to assist you to understand your conduct obligations as a student: <https://student.unsw.edu.au/conduct>.

**Referencing** is a way of acknowledging the sources of information that you use to research your assignments. You need to provide a reference whenever you draw on someone else's words, ideas or research. Not referencing other people's work can constitute plagiarism. Further information about referencing styles can be located at <https://student.unsw.edu.au/referencing>.

For assessments in the School of Chemical Engineering, we recommend the use of referencing software such as [Mendeley](#) or [EndNote](#) for managing references and citations. Unless required otherwise specified (i.e. in the assignment instructions) students in the School of Chemical Engineering should use either the APA 7th edition, or the American Chemical Society (ACS) referencing style as canonical author-date and numbered styles respectively.

## Academic Information

To help you plan your degree, assistance is available from academic advisors in [The Nucleus](#) and also in the [School of Chemical Engineering](#).

### Additional support for students

- [Current Student Gateway](#)
- [Engineering Current Student Resources](#)
- [Student Support and Success](#)
- [Academic Skills](#)
- [Student Wellbeing, Health and Safety](#)
- [Equitable Learning Services](#)
- [IT Service Centre](#)

### Course workload

Course workload is calculated using the Units-Of-Credit (UOC). The normal workload expectation for one UOC is approximately 25 hours per term. This includes class contact hours, private study, other learning activities, preparation and time spent on all assessable work.

Most coursework courses at UNSW are 6 UOC and involve an estimated 150 hours to complete, for both regular and intensive terms. Each course includes a prescribed number of hours per week (h/w) of scheduled face-to-face and/or online contact. Any additional time beyond the prescribed contact hours should be spent in making sure that you understand the lecture material, completing the set assignments, further reading, and revising for any examinations.

### On-campus class attendance

Physical distancing recommendations must be followed for all face-to-face classes. To ensure this, only students enrolled in those classes will be allowed in the room. Class rosters will be attached to corresponding rooms and circulated among lab demonstrators and tutors. No over-enrolment is allowed in face-to-face class. Students enrolled in online classes can swap their enrolment from online to a **limited** number of on-campus classes by Sunday, Week 1.

In certain classroom and laboratory situations where physical distancing cannot be maintained or the staff running the session believe that it will not be maintained, face masks will be designated by the course coordinator as **mandatory PPE** for students and staff. Students are required to bring and use their own face mask. Mask can be purchased from IGA Supermarket (Map B8, Lower Campus), campus pharmacy (Map F14, Middle Campus), the post office (Map F22, Upper Campus) and a vending machine in the foyer of the Biological Sciences Building (Map E26, Upper Campus).

Your health and the health of those in your class is critically important. You must stay at home if you are sick or have been advised to self-isolate by [NSW health](#) or government authorities. Current alerts and a list of hotspots can be found [here](#). Do not come to campus if you have any of the following symptoms: fever (37.5 °C or higher), cough, sore throat, shortness of breath (difficulty breathing), runny nose, loss of taste, or loss of smell. If you need to have a COVID-19 test, you must not come to campus and remain in self-isolation until you receive the results of your test.

**You will not be penalised for missing a face-to-face activity due to illness or a requirement to self-**

**isolate.** We will work with you to ensure continuity of learning during your isolation and have plans in place for you to catch up on any content or learning activities you may miss. Where this might not be possible, an application for fee remission may be discussed. Further information is available on any course Moodle or Teams site.

For more information, please refer to the FAQs: <https://www.covid-19.unsw.edu.au/safe-return-campus-faqs>
