COURSE STAFF

Course Convener: Dr Guo Chen, Room 306, EE Building, guo.chen@unsw.edu.au
Lecturer: Dr Guo Chen, Room 306, EE Building, guo.chen@unsw.edu.au

Consultations: You are encouraged to ask questions on the course material, after the lecture class times in the first instance, rather than via email. All email enquiries should be made from your student email address with TELE9781 in the subject line; otherwise they will not be answered.

Keeping Informed: Announcements may be made during classes, via email (to your student email address) and/or via online learning and teaching platforms – in this course, we will use Moodle https://moodle.telt.unsw.edu.au/login/index.php. Please note that you will be deemed to have received this information, so you should take careful note of all announcements.

COURSE SUMMARY

Contact Hours
The course consists of 3 hours of lectures (including a Lab session) each week.

Context and Aims
A solid IT infrastructure is a vital part of any modern business, allowing an organisation to effectively communicate both internally and externally. Having the right infrastructure in place for business connectivity should be seen as a non-negotiable for any company. Nowadays, virtualization and cloud computing are no longer an option for enterprises but an imperative for survival. The cloud has dramatically changed the way IT infrastructure is built, utilised and managed. It has created new roles such as the cloud engineer and the cloud architect to lead this trend. This course will start with networking and storage as fundamentals, then focus on the technologies and skills required today to design, implement and manage cloud infrastructures to optimise business performance.
### Indicative Lecture Schedule

<table>
<thead>
<tr>
<th>Period</th>
<th>Summary of Lecture Program</th>
</tr>
</thead>
</table>
| Week 1 | Introduction to enterprise IT infrastructure  
Networking fundamentals  
Lab for network fundamentals |
| Week 2 | IP addressing and subnetting  
IP routing  
Lab for IP address and subnetting, and IP routing |
| Week 3 | Switching technologies  
IP services  
Lab for switching technologies and IP services |
| Week 4 | Quiz 1  
Storage fundamentals |
| Week 5 | Storage networking  
Lab for storage networking |
| Week 6 | Software-defined storage  
Lab for software defined storage |
| Week 7 | Quiz 2  
Virtualisation and cloud fundamentals |
| Week 8 | Virtual networking in the cloud  
Lab for virtual networking in the cloud |
| Week 9 | Virtual storage in the cloud  
Lab for virtual storage in the cloud |
| Week 10 | Quiz 3  
Technology trends in IT infrastructure industry and career prospect |

### Assessment

The following table will give you the assessment tasks for Term 2, 2021.

<table>
<thead>
<tr>
<th>Item</th>
<th>Time</th>
<th>Weight</th>
</tr>
</thead>
<tbody>
<tr>
<td>Quiz 1</td>
<td>1 hour</td>
<td>15%</td>
</tr>
<tr>
<td>Quiz 2</td>
<td>1 hour</td>
<td>15%</td>
</tr>
<tr>
<td>Quiz 3</td>
<td>1 hour</td>
<td>15%</td>
</tr>
<tr>
<td>Final Exam</td>
<td>2 hours</td>
<td>55%</td>
</tr>
</tbody>
</table>

The quiz 1 is scheduled in week 4; the quiz 2 is scheduled in week 7; and the quiz 3 is scheduled in week 10. All are in lecture hours. The date of the final exam will be announced by the University.
COVID19 - Important Health Related Notice

Your health and the health of those in your class is critically important. You must stay at home if you are sick or have been advised to self-isolate by NSW health or government authorities. Current alerts and a list of hotspots can be found here. You will not be penalised for missing a face-to-face activity due to illness or a requirement to self-isolate. We will work with you to ensure continuity of learning during your isolation and have plans in place for you to catch up on any content or learning activities you may miss. Where this might not be possible, an application for fee remission may be discussed.

If you are required to self-isolate and/or need emotional or financial support, please contact the Nucleus: Student Hub. If you are unable to complete an assessment, or attend a class with an attendance or participation requirement, please let your teacher know and apply for special consideration through the Special Consideration portal. To advise the University of a positive COVID-19 test result or if you suspect you have COVID-19 and are being tested, please fill in this form.

UNSW requires all staff and students to follow NSW Health advice. Any failure to act in accordance with that advice may amount to a breach of the Student Code of Conduct. Please refer to the Safe Return to Campus guide for students for more information on safe practices.

COURSE DETAILS

Credits
This is a 6 UoC course and the expected workload is 15 hours per week throughout the 10-week term.

Relationship to Other Courses
This is a postgraduate elective course in the School of Electrical Engineering and Telecommunications. It is an elective course for students who have a BE in Electrical, or Telecommunications or Computer and other combined degree programs.

Pre-requisites and Assumed Knowledge
There are no pre-requisites for this course but it would be very helpful to have basic understanding of networking technologies, for example: TCP/IP model, IP addressing, routing and switching.

Following Courses
N/A

Learning outcomes
After successful completion of this course, you should be able to:

1. Understand networking fundamentals, design and implement functional networks for small and medium-sized businesses to include IP addressing, IP routing, switching, DHCP, NAT, and so on.
2. Understand storage fundamentals, design and implement storage solutions for small and medium-sized businesses to include RAID, storage networking, software-defined storage, and so on.
3. Understand virtualisation fundamentals, design and implement virtualisation solutions for small and medium-sized businesses to include virtual computing, virtual networking and virtual storage.

This course is designed to provide the above learning outcomes which arise from targeted graduate capabilities listed in Appendix A. The targeted graduate capabilities broadly support the UNSW and Faculty of Engineering graduate capabilities (listed in Appendix B). This course also addresses the Engineers Australia (National Accreditation Body) Stage I Competency Standards as outlined in Appendix C.
Syllabus

Section 1 – Networking
- Introduction to enterprise IT infrastructure
- Networking fundamentals
- IP addressing and subnetting
- IP routing
- Switching technologies
- IP services

Section 2 – Storage
- Storage fundamentals
- Storage networking
- Software-defined storage

Section 3 – Cloud computing
- Virtualisation and cloud fundamentals
- Virtual networking in the cloud
- Virtual storage in the cloud

TEACHING STRATEGIES

Delivery Mode
The teaching in this course aims at establishing a good fundamental understanding of the areas covered using:
- Formal lectures, which provide you with a focus on the core analytical material in the course, together with qualitative, alternative explanations to aid your understanding;
- Laboratory sessions, which support the formal lecture material and also provide you with practical construction, measurement and debugging skills;

Learning in this course
You are expected to attend all lectures and labs in order to maximise learning. In addition to the lecture notes, you should read relevant sections of the recommended text. Reading additional texts will further enhance your learning experience.

ASSESSMENT

The assessment scheme in this course reflects the intention to assess your learning progress through the term.

Quiz
There will be three quizzes during lecture session as scheduled above.

Final Exam
The exam in this course is a standard closed-book 2 hours written examination. Questions may be drawn from any aspect of the course, unless specifically indicated otherwise by the lecturer. Marks will be assigned according to the correctness of the responses. Please note that you must pass the final exam in order to pass the course.

COURSE RESOURCES

Textbooks
Prescribed textbook
• “Data Storage Networking”, Nigel Poulton, Sybex

On-line resources
Moodle
As a part of the teaching component, Moodle will be used to disseminate teaching materials, host forums and occasionally, quizzes. Assessment marks will also be made available via Moodle: https://moodle.telt.unsw.edu.au/login/index.php.

Mailing list
Announcements concerning course information will be given in the lectures and/or on Moodle and/or via email (which will be sent to your student email address).

OTHER MATTERS

Dates to note
Important Dates available at: https://student.unsw.edu.au/dates

Academic Honesty and Plagiarism
Plagiarism is the unacknowledged use of other people’s work, including the copying of assignment works and laboratory results from other students. Plagiarism is considered a form of academic misconduct, and the University has very strict rules that include some severe penalties. For UNSW policies, penalties and information to help you avoid plagiarism, see https://student.unsw.edu.au/plagiarism. To find out if you understand plagiarism correctly, try this short quiz: https://student.unsw.edu.au/plagiarism-quiz.

Student Responsibilities and Conduct
Students are expected to be familiar with and adhere to all UNSW policies (see https://student.unsw.edu.au/policy), and particular attention is drawn to the following:

Workload
It is expected that you will spend at least 15 hours per week studying a 6 UoC course, from Week 1 until the final assessment, including both formal classes and independent, self-directed study. In periods where you need to complete assignments or prepare for examinations, the workload may be greater. Over-commitment has been a common source of failure for many students. You should take the required workload into account when planning how to balance study with employment and other activities.

Attendance
Regular and punctual attendance at all classes is expected. UNSW regulations state that if students attend less than 80% of scheduled classes they may be refused final assessment.

General Conduct and Behaviour
Consideration and respect for the needs of your fellow students and teaching staff is an expectation. Conduct which unduly disrupts or interferes with a class is not acceptable and students may be asked to leave the class.

Work Health and Safety
UNSW policy requires each person to work safely and responsibly, in order to avoid personal injury and to protect the safety of others.
Special Consideration and Supplementary Examinations

You must submit all assignments and attend all examinations scheduled for your course. You can apply for special consideration when illness or other circumstances beyond your control interfere with an assessment performance. If you need to submit an application for special consideration for an exam or assessment, you must submit the application prior to the start of the exam or before the assessment is submitted, except where illness or misadventure prevent you from doing so. Be aware of the “fit to sit/submit” rule which means that if you sit an exam or submit an assignment, you are declaring yourself well enough to do so and cannot later apply for Special Consideration. For more information and how to apply, see https://student.unsw.edu.au/special-consideration.

Continual Course Improvement

This course is under constant revision in order to improve the learning outcomes for all students. Please forward any feedback (positive or negative) on the course to the course convener or via the online student survey myExperience. You can also provide feedback to ELSOC who will raise your concerns at student focus group meetings. As a result of previous feedback obtained for this course and in our efforts to provide a rich and meaningful learning experience, we have continued to evaluate and modify our delivery and assessment methods.

Administrative Matters

On issues and procedures regarding such matters as special needs, equity and diversity, occupational health and safety, enrolment, rights, and general expectations of students, please refer to the School and UNSW policies: https://student.unsw.edu.au/guide https://www.engineering.unsw.edu.au/electrical-engineering/resources

APPENDICES

Appendix A: Targeted Graduate Capabilities

Electrical Engineering and Telecommunications programs are designed to address the following targeted capabilities which were developed by the school in conjunction with the requirements of professional and industry bodies:

- The ability to apply knowledge of basic science and fundamental technologies;
- The skills to communicate effectively, not only with engineers but also with the wider community;
- The capability to undertake challenging analysis and design problems and find optimal solutions;
- Expertise in decomposing a problem into its constituent parts, and in defining the scope of each part;
- A working knowledge of how to locate required information and use information resources to their maximum advantage;
- Proficiency in developing and implementing project plans, investigating alternative solutions, and critically evaluating differing strategies;
- An understanding of the social, cultural and global responsibilities of the professional engineer;
- The ability to work effectively as an individual or in a team;
- An understanding of professional and ethical responsibilities;
- The ability to engage in lifelong independent and reflective learning.

Appendix B: UNSW Graduate Capabilities

The course delivery methods and course content directly or indirectly addresses a number of core UNSW graduate capabilities, as follows

- Developing scholars who have a deep understanding of their discipline, through lectures and solution of analytical problems in tutorials and assessed by assignments and written examinations.
- Developing rigorous analysis, critique, and reflection, and ability to apply knowledge and skills to solving problems. These will be achieved by the laboratory experiments and interactive checkpoint assessments and lab exams during the labs.
- Developing digital and information literacy and lifelong learning skills through assignment work.
- Developing independent, self-directed professionals who are enterprising, innovative, creative and responsive to change, through challenging design and project tasks.

Appendix C: Engineers Australia (EA) Professional Engineer Stage 1 Competency Standards

<table>
<thead>
<tr>
<th>Competency Standards</th>
<th>Learning Outcomes</th>
</tr>
</thead>
<tbody>
<tr>
<td>PE1: Knowledge and Skill Base</td>
<td></td>
</tr>
<tr>
<td>PE1.1 Comprehensive, theory-based understanding of underpinning fundamentals</td>
<td>1, 2, 3</td>
</tr>
<tr>
<td>PE1.2 Conceptual understanding of underpinning maths, analysis, statistics, computing</td>
<td>1, 2</td>
</tr>
<tr>
