1. Staff contact details

Contact details and consultation times for course convenor

Course Convenor:
Name: Prof Sami Kara
Office location: Ainsworth Building, 301A
Tel: (02) 9385 5757
Email: S.Kara@unsw.edu.au

Lecturer:
Name: Dr Bernard Kornfeld
Office location: Ainsworth Building, 301
Tel: 0407600268
Email: bernard.kornfeld@celsian.com.au

Contact details and consultation times for additional lecturers/demonstrators/lab staff
Name: Sepideh Moshrefi
Office location: Ainsworth Building, 301
Tel: (02) 9385 6851
Email: s.moshrefi@unsw.edu.au

Please see the course Moodle.

3. Course details

Credit points

This is a 6 unit-of-credit (UoC) course and involves 3 hours per week (h/w) of face-to-face contact.
The normal workload expectations of a student are approximately 25 hours per term for each UOC, including class contact hours, other learning activities, preparation and time spent on all assessable work. The additional time should be spent in making sure that you understand the lecture material, completing the set assignments, further reading, and revising for any examinations.

Contact hours

<table>
<thead>
<tr>
<th></th>
<th>Day</th>
<th>Time</th>
<th>Location</th>
</tr>
</thead>
<tbody>
<tr>
<td>Lectures</td>
<td>Wednesday</td>
<td>6pm - 8pm</td>
<td>Chemical Sc M18</td>
</tr>
<tr>
<td>Demonstrations</td>
<td>Wednesday</td>
<td>8pm – 9pm</td>
<td>Chemical Sc M18</td>
</tr>
</tbody>
</table>

Please refer to your class timetable for the learning activities you are enrolled in and attend only those classes.

Summary and Aims of the course

This course introduces students to the strategic aspects of manufacturing management, in terms of an analysis of the environment in which manufacturing companies compete. In particular, it explores the relation of manufacturing strategy to business, financial and marketing strategies.

This course aims to provide an introduction to the strategic aspects of manufacturing management, in terms of an analysis of the environment in which manufacturing companies compete, the various dimensions of competitiveness, and how individual companies can maximise effective utilisation of their assets, and hence increase their overall ability to compete.

Student learning outcomes

This course is designed to address the learning outcomes below and the corresponding Engineers Australia Stage 1 Competency Standards for Professional Engineers as shown. The full list of Stage 1 Competency Standards may be found in Appendix A.

After successfully completing this course, you should be able to:

<table>
<thead>
<tr>
<th>Learning Outcome</th>
<th>EA Stage 1 Competencies</th>
</tr>
</thead>
<tbody>
<tr>
<td>1. Understand the nature of manufacturing strategy and its relation to corporate strategy</td>
<td>PE1.3, PE1.5, PE2.3, PE3.6</td>
</tr>
<tr>
<td>2. Develop a systematic plan for strategy implementation</td>
<td>PE1.3, PE1.5, PE2.3, PE3.6</td>
</tr>
<tr>
<td>3. Understand the different types of globalised manufacturing and their implications</td>
<td>PE1.3, PE1.5, PE2.3, PE3.6</td>
</tr>
</tbody>
</table>
4. Teaching strategies

The subject will be presented in the form of lectures and tutorials. Each weekly class will consist of an hour of a tutorial example or case study related to the material covered in the previous lecture in the first hour, followed by 1-1.5 hrs lecture. Before each week’s lecture, there will be key readings uploaded on Moodle. It is critical that students MUST read these before they come to classroom.

5. Course schedule

<table>
<thead>
<tr>
<th>Week</th>
<th>Topic</th>
<th>Location</th>
<th>Suggested Readings</th>
<th>Week</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>The Nature and Role of Manufacturing Strategy</td>
<td>None</td>
<td>Chemical Sc M18</td>
<td>Unit 1 lecture notes and reading material on Moodle</td>
</tr>
<tr>
<td>2</td>
<td>Porter’s Model and the Value Chain</td>
<td>Review of previous lecture and exercises</td>
<td>Chemical Sc M18</td>
<td>Unit 2 lecture notes and reading material on Moodle</td>
</tr>
<tr>
<td>3</td>
<td>Competitive Positioning</td>
<td>Review of previous lecture and exercises</td>
<td>Chemical Sc M18</td>
<td>Unit 3 lecture notes and reading material on Moodle</td>
</tr>
<tr>
<td>4</td>
<td>Product Technology and Process Choice</td>
<td>Review of previous lecture and exercises</td>
<td>Chemical Sc M18</td>
<td>Unit 4 lecture notes and reading material on Moodle</td>
</tr>
<tr>
<td>5</td>
<td>Process Positioning and Core Competencies</td>
<td>Review of previous lecture and exercises</td>
<td>Chemical Sc M18</td>
<td>Unit 5 lecture notes and reading material on Moodle</td>
</tr>
<tr>
<td>6</td>
<td>Capacity Strategies</td>
<td>Review of previous lecture and exercises</td>
<td>Chemical Sc M18</td>
<td>Unit 6 lecture notes and reading material on Moodle</td>
</tr>
<tr>
<td>7</td>
<td>Focused Manufacturing</td>
<td>Review of previous lecture and exercises</td>
<td>Chemical Sc M18</td>
<td>Unit 7 lecture notes and reading material on Moodle</td>
</tr>
<tr>
<td>Week</td>
<td>Topic</td>
<td>Location</td>
<td>Suggested Readings</td>
<td>Week</td>

# 6. Assessment

## Assessment overview

<table>
<thead>
<tr>
<th>Assessment</th>
<th>Group Project? (# Students per group)</th>
<th>Length</th>
<th>Weight</th>
<th>Learning outcomes assessed</th>
<th>Assessment criteria</th>
<th>Due date and submission requirements</th>
<th>Deadline for absolute fail</th>
<th>Marks returned</th>
</tr>
</thead>
<tbody>
<tr>
<td>Assignment 1</td>
<td>No</td>
<td>Max 3000 words</td>
<td>30%</td>
<td>1 and 2</td>
<td>Lecture materials from week 1-3</td>
<td>Will be released on the 26th February and submission on the 11th March via Moodle</td>
<td>14th March</td>
<td>Midnight 25th March</td>
</tr>
<tr>
<td>Assignment 2</td>
<td>No</td>
<td>Max 4000 words</td>
<td>30%</td>
<td>1 and 2</td>
<td>Lecture material from weeks 4-6</td>
<td>Will be released on the 11th March and submission on the 25th March via Moodle</td>
<td>28th March</td>
<td>Midnight 8th April</td>
</tr>
<tr>
<td>Integrated Case Study Final Report</td>
<td>No</td>
<td>Max 6000 words</td>
<td>40%</td>
<td>1, 2, 3 and 4</td>
<td>All course content from weeks 1-10 inclusive.</td>
<td>Will be released on the 8th April and submission on the 6th May via Moodle</td>
<td>9th May</td>
<td>Midnight, 20th May</td>
</tr>
</tbody>
</table>
Assignments

The assessment tasks will be provided during class on the dates described in the Reference source not found. table. The assessment tasks and their details will be provided on Moodle at https://moodle.telt.unsw.edu.au/login/index.php

Presentation

All non-electronic submissions should have a standard School cover sheet, which is available from this course’s Moodle page.

All submissions are expected to be neat and clearly set out. Your results are the pinnacle of all your hard work and should be treated with due respect. Presenting results clearly gives the marker the best chance of understanding your method; even if the numerical results are incorrect.

Submission

Work submitted late without an approved extension by the course coordinator or delegated authority is subject to a late penalty of 20 percent (20%) of the maximum mark possible for that assessment item, per calendar day.

The late penalty is applied per calendar day (including weekends and public holidays) that the assessment is overdue. There is no pro-rata of the late penalty for submissions made part way through a day.

Work submitted after the 'deadline for absolute fail' is not accepted and a mark of zero will be awarded for that assessment item.

For some assessment items, a late penalty may not be appropriate. These are clearly indicated in the course outline, and such assessments receive a mark of zero if not completed by the specified date. Examples include:
   a. Weekly online tests or laboratory work worth a small proportion of the subject mark, or
   b. Online quizzes where answers are released to students on completion, or
   c. Professional assessment tasks, where the intention is to create an authentic assessment that has an absolute submission date, or
   d. Pass/Fail assessment tasks.

Marking

Marking guidelines for assignment submissions will be provided at the same time as assignment details to assist with meeting assessable requirements. Submissions will be marked according to the marking guidelines provided.

Special consideration and supplementary assessment

If you have experienced an illness or misadventure beyond your control that will interfere
with your assessment performance, you are eligible to apply for Special Consideration prior to submitting an assessment or sitting an exam.

**Please note** that UNSW now has a [Fit to Sit / Submit rule](https://www.library.unsw.edu.au/), which means that if you sit an exam or submit a piece of assessment, you are declaring yourself fit enough to do so and cannot later apply for Special Consideration.

For details of applying for Special Consideration and conditions for the award of supplementary assessment, please see the information on UNSW’s [Special Consideration page](https://www.library.unsw.edu.au/).

### 7. Expected resources for students

Relevant readings are provided at the end of each unit on Moodle. However, further readings can be found in journals such as Harvard Business Review, Long Range Planning, Management Decision, Management Review, Journal of Management Studies, Californian Management Review, Sloan Management Review. These can be accessed via the UNSW Library [https://www.library.unsw.edu.au/](https://www.library.unsw.edu.au/).

UNSW Library website: [https://www.library.unsw.edu.au/](https://www.library.unsw.edu.au/)

### 8. Course evaluation and development

Feedback on the course is gathered periodically using various means, including the UNSW myExperience process, informal discussion in the final class for the course, and the School’s Student/Staff meetings. Your feedback is taken seriously, and continual improvements are made to the course based, in part, on such feedback.

In this course, recent improvements resulting from student feedback include using Engineering Lecture Recording & Streaming (LRS) Service to provide better lecture recording, using microphone and introducing more content.

### 9. Academic honesty and plagiarism

UNSW has an ongoing commitment to fostering a culture of learning informed by academic integrity. All UNSW students have a responsibility to adhere to this principle of academic integrity. Plagiarism undermines academic integrity and is not tolerated at UNSW. **Plagiarism at UNSW is defined as using the words or ideas of others and passing them off as your own.**

Plagiarism is a type of intellectual theft. It can take many forms, from deliberate cheating to accidentally copying from a source without acknowledgement. UNSW has produced a website with a wealth of resources to support students to understand and avoid plagiarism, visit: [student.unsw.edu.au/plagiarism](https://student.unsw.edu.au/plagiarism). The Learning Centre assists students with understanding academic integrity and how not to plagiarise. They also hold workshops and can help students one-on-one.
You are also reminded that careful time management is an important part of study and one of the identified causes of plagiarism is poor time management. Students should allow sufficient time for research, drafting and the proper referencing of sources in preparing all assessment tasks.

If plagiarism is found in your work when you are in first year, your lecturer will offer you assistance to improve your academic skills. They may ask you to look at some online resources, attend the Learning Centre, or sometimes resubmit your work with the problem fixed. However more serious instances in first year, such as stealing another student’s work or paying someone to do your work, may be investigated under the Student Misconduct Procedures.

Repeated plagiarism (even in first year), plagiarism after first year, or serious instances, may also be investigated under the Student Misconduct Procedures. The penalties under the procedures can include a reduction in marks, failing a course or for the most serious matters (like plagiarism in an honours thesis) even suspension from the university. The Student Misconduct Procedures are available here: www.gs.unsw.edu.au/policy/documents/studentmisconductprocedures.pdf

10. Administrative matters and links

All students are expected to read and be familiar with UNSW guidelines and polices. In particular, students should be familiar with the following:

- Attendance
- UNSW Email Address
- Special Consideration
- Exams
- Approved Calculators
- Academic Honesty and Plagiarism
- Equitable Learning Services
### Program Intended Learning Outcomes

**PE1: Knowledge and Skill Base**
- PE1.1 Comprehensive, theory-based understanding of underpinning fundamentals
- PE1.2 Conceptual understanding of underpinning maths, analysis, statistics, computing
- PE1.3 In-depth understanding of specialist bodies of knowledge
- PE1.4 Discernment of knowledge development and research directions
- PE1.5 Knowledge of engineering design practice
- PE1.6 Understanding of scope, principles, norms, accountabilities of sustainable engineering practice

**PE2: Engineering Application Ability**
- PE2.1 Application of established engineering methods to complex problem solving
- PE2.2 Fluent application of engineering techniques, tools and resources
- PE2.3 Application of systematic engineering synthesis and design processes
- PE2.4 Application of systematic approaches to the conduct and management of engineering projects

**PE3: Professional and Personal Attributes**
- PE3.1 Ethical conduct and professional accountability
- PE3.2 Effective oral and written communication (professional and lay domains)
- PE3.3 Creative, innovative and pro-active demeanour
- PE3.4 Professional use and management of information
- PE3.5 Orderly management of self, and professional conduct
- PE3.6 Effective team membership and team leadership
