1. Staff contact details

Contact details and consultation times for course convenor

Name: Prof Sami Kara
Office location: Room: 301A Ainsworth Building,
Tel: (02) 9385 5757
Email: S.Kara@unsw.edu.au
Microsoft Teams Video Chat Hours: Wednesday 5:00pm-6:00pm

There will be Microsoft video chat hours scheduled every Wednesday from 5:00-6:00 pm prior to the online class. Moodle discussion should be used for all course related communication.

Contact details and consultation times for additional lecturers/demonstrators/lab staff

Name: Sepideh Moshrefi
Office location: Room: 301 Ainsworth Building,
Tel: (02) 9385 6851
Email: s.moshrefi@unsw.edu.au

Please see the course Moodle.

3. Course details

Credit points

This is a 6 unit-of-credit (UoC) course and involves 3 hours per week (h/w) of scheduled online contact.

The normal workload expectations of a student are approximately 25 hours per term for each
UOC, including class contact hours, other learning activities, preparation and time spent on all assessable work.

You should aim to spend about 9 h/w on this course. The additional time should be spent in making sure that you understand the lecture material, completing the set assignments, further reading, and revising for any examinations.

**Contact hours**

<table>

<td></td>
</tr>
<tr>
<td>Wednesday</td>
<td>8pm – 9pm</td>
<td>Online by using Blackboard Ultra in Moodle Microsoft Teams Chat Channel</td>
</tr>
</tbody>
</table>

All classes in T2 2020 will be online. Please consult this course’s Moodle module for details about delivery.

**Summary and Aims of the course**

This subject is primarily concerned with the efficient and effective management of materials flow through manufacturing organisations in such a way that wastage (particularly in the form of excess inventory) is reduced, materials throughput time is sped up, and customer requirements are met in a timely manner.

This course aims firstly to give students grounding in the basic issues confronting production managers today and secondly to present a set of possible solutions to those issues, considering recent advances in computing and information technology.

This course enables you to investigate the basic issue related to Production Planning and Control, which is how much of what material items to produce (or order) at what specific times in order to satisfy customer demand in an optimal way. The main thrust of this subject is a study of the dynamics of how materials flow through a manufacturing organisation, an evaluation of the various production planning and control techniques available to optimise this flow and how effective production planning and control can contribute to a company’s competitive advantage.

This course introduces students to the dynamics of material flow through a manufacturing system, basic and advanced techniques of production planning and control and their
realization. Therefore, this course is an extension of the MANF6860 Manufacturing Strategy, which mainly deals with long term strategic planning process.

**Student learning outcomes**

This course is designed to address the learning outcomes below and the corresponding Engineers Australia Stage 1 Competency Standards for Professional Engineers as shown. The full list of Stage 1 Competency Standards may be found in Appendix A.

After successfully completing this course, you should be able to:

<table>
<thead>
<tr>
<th>Learning Outcome</th>
<th>EA Stage 1 Competencies</th>
</tr>
</thead>
<tbody>
<tr>
<td>1. Understand the strategic implications of the Production Planning and Control (PPC)</td>
<td>PE1.1</td>
</tr>
<tr>
<td>2. Understand the concepts demand management, forecasting and the link between demand management and MPS</td>
<td>PE1.1, PE2.2</td>
</tr>
<tr>
<td>3. Understand the main PPC systems and appreciate the importance of capacity planning</td>
<td>PE1.1, PE2.2</td>
</tr>
<tr>
<td>4. Understand the importance of controlling production activities</td>
<td>PE1.1, PE2.2</td>
</tr>
</tbody>
</table>

**4. Teaching strategies**

There will be a live lecture via Blackboard Ultra each week from 6:00 to 8:00pm. Lectures will also be made available as lecture recordings. There will also be a demonstration class from 8:00-9:00pm for selected weeks where it is necessary.

**5. Course schedule**

</thead>
<tbody>
<tr>
<td>Assignment 1</td>
<td>No</td>
<td>Max 1000 words</td>
<td>30%</td>
<td>1 and 2</td>
<td>Lecture materials weeks 1 and 2</td>
<td>Assignment will be released after the week 2 lecture and will be due midnight, Wednesday 24th June via Moodle</td>
<td>Midnight Monday 29th June</td>
<td>Two weeks after submission</td>
</tr>
<tr>
<td>Assignment 2</td>
<td>No</td>
<td>Max 1000 words</td>
<td>30%</td>
<td>1, 2 and 3</td>
<td>Lecture material from weeks 5, 6 and 7</td>
<td>Assignment will be released after the week 6 lecture and will be due midnight, Wednesday 22nd July via Moodle</td>
<td>Midnight Monday 27th July</td>
<td>Two weeks after submission</td>
</tr>
<tr>
<td>Assignment 3</td>
<td>No</td>
<td>Max 1500 words</td>
<td>40%</td>
<td>1, 2, 3, 4</td>
<td>All course content from weeks 2-10 inclusive.</td>
<td>Assignment will be released after the week 8 lecture and will be due midnight, Wednesday 5th August via Moodle</td>
<td>Midnight Monday 10th August</td>
<td>Two weeks after submission</td>
</tr>
</tbody>
</table>
Assignments

Further information about the assignments will be provided on Moodle.

Presentation

All non-electronic submissions should have a standard School cover sheet, which is available from this course's Moodle page.

All submissions are expected to be neat and clearly set out. Your results are the pinnacle of all your hard work and should be treated with due respect. Presenting results clearly gives the marker the best chance of understanding your method; even if the numerical results are incorrect.

Submission

Work submitted late without an approved extension by the course coordinator or delegated authority is subject to a late penalty of 20 percent (20%) of the maximum mark possible for that assessment item, per calendar day.

The late penalty is applied per calendar day (including weekends and public holidays) that the assessment is overdue. There is no pro-rata of the late penalty for submissions made part way through a day.

Work submitted after the 'deadline for absolute fail' is not accepted and a mark of zero will be awarded for that assessment item.

For some assessment items, a late penalty may not be appropriate. These are clearly indicated in the course outline, and such assessments receive a mark of zero if not completed by the specified date. Examples include:
   a. Weekly online tests or laboratory work worth a small proportion of the subject mark, or
   b. Online quizzes where answers are released to students on completion, or
   c. Professional assessment tasks, where the intention is to create an authentic assessment that has an absolute submission date, or
   d. Pass/Fail assessment tasks.

Marking

Marking guidelines for assignment submissions will be provided at the same time as assignment details to assist with meeting assessable requirements. Submissions will be marked according to the marking guidelines provided.

Special consideration and supplementary assessment

If you have experienced an illness or misadventure beyond your control that will interfere with your assessment performance, you are eligible to apply for Special Consideration prior to submitting an assessment or sitting an exam.
Please note that UNSW now has a Fit to Sit / Submit rule, which means that if you attempt an exam or submit a piece of assessment, you are declaring yourself fit enough to do so and cannot later apply for Special Consideration.

For details of applying for Special Consideration and conditions for the award of supplementary assessment, please see the information on UNSW's Special Consideration page.

7. Expected resources for students

Textbook

Other Reference Books

Other available literature in the area of production and operations management in the library can be used for certain topics:

UNSW Library website: https://www.library.unsw.edu.au/

8. Course evaluation and development

Feedback on the course is gathered periodically using various means, including the UNSW myExperience process, informal discussion in the final class for the course, and the School's Student/Staff meetings. Your feedback is taken seriously, and continual improvements are made to the course based, in part, on such feedback.

9. Academic honesty and plagiarism

UNSW has an ongoing commitment to fostering a culture of learning informed by academic integrity. All UNSW students have a responsibility to adhere to this principle of academic integrity. Plagiarism undermines academic integrity and is not tolerated at UNSW. Plagiarism at UNSW is defined as using the words or ideas of others and passing them off as your own.

Plagiarism is a type of intellectual theft. It can take many forms, from deliberate cheating to accidentally copying from a source without acknowledgement. UNSW has produced a website with a wealth of resources to support students to understand and avoid plagiarism, visit: student.unsw.edu.au/plagiarism. The Learning Centre assists students with
understanding academic integrity and how not to plagiarise. They also hold workshops and can help students one-on-one.

You are also reminded that careful time management is an important part of study and one of the identified causes of plagiarism is poor time management. Students should allow sufficient time for research, drafting and the proper referencing of sources in preparing all assessment tasks.

If plagiarism is found in your work when you are in first year, your lecturer will offer you assistance to improve your academic skills. They may ask you to look at some online resources, attend the Learning Centre, or sometimes resubmit your work with the problem fixed. However more serious instances in first year, such as stealing another student’s work or paying someone to do your work, may be investigated under the Student Misconduct Procedures.

Repeated plagiarism (even in first year), plagiarism after first year, or serious instances, may also be investigated under the Student Misconduct Procedures. The penalties under the procedures can include a reduction in marks, failing a course or for the most serious matters (like plagiarism in an honours thesis) even suspension from the university. The Student Misconduct Procedures are available here: 

10. Administrative matters and links

All students are expected to read and be familiar with UNSW guidelines and polices. In particular, students should be familiar with the following:

- Attendance
- UNSW Email Address
- Special Consideration
- Exams
- Approved Calculators
- Academic Honesty and Plagiarism
- Equitable Learning Services
## Appendix A: Engineers Australia (EA) Competencies

**Stage 1 Competencies for Professional Engineers**

<table>
<thead>
<tr>
<th><strong>Program Intended Learning Outcomes</strong></th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>PE1: Knowledge and Skill Base</strong></td>
<td></td>
</tr>
<tr>
<td>PE1.1</td>
<td>Comprehensive, theory-based understanding of underpinning fundamentals</td>
</tr>
<tr>
<td>PE1.2</td>
<td>Conceptual understanding of underpinning maths, analysis, statistics, computing</td>
</tr>
<tr>
<td>PE1.3</td>
<td>In-depth understanding of specialist bodies of knowledge</td>
</tr>
<tr>
<td>PE1.4</td>
<td>Discernment of knowledge development and research directions</td>
</tr>
<tr>
<td>PE1.5</td>
<td>Knowledge of engineering design practice</td>
