

# MANF9543

Computer Aided Design / Computer Aided Manufacture

Term Three // 2020

## Course Overview

### Staff Contact Details

#### Convenors

Name	Email	Availability	Location	Phone
Ronald Chan	r.chan@unsw.edu.au	Consultation for this course is available immediately after each lecture. For additional consultation, please make an appointment with the staff by email.	Room 507, Ainsworth Building	9385 1535

### School Contact Information

#### Location

UNSW Mechanical and Manufacturing Engineering

Ainsworth building J17, Level 1

Above Coffee on Campus

#### Hours

9:00–5:00pm, Monday–Friday\*

\*Closed on public holidays, School scheduled events and University Shutdown

#### Web

[School of Mechanical and Manufacturing Engineering](#)

[Engineering Student Support Services](#)

[Engineering Industrial Training](#)

[UNSW Study Abroad and Exchange](#) (for inbound students)

[UNSW Future Students](#)

#### Phone

(+61 2) 9385 8500 – Nucleus Student Hub

(+61 2) 9385 7661 – Engineering Industrial Training

(+61 2) 9385 3179 – UNSW Study Abroad and UNSW Exchange (for inbound students)

(+61 2) 9385 4097 – School Office\*\*

\*\*Please note that the School Office will not know when/if your course convenor is on campus or available

## **Email**

[Engineering Student Support Services](#) – current student enquiries

- e.g. enrolment, progression, clash requests, course issues or program-related queries

[Engineering Industrial Training](#) – Industrial training questions

[UNSW Study Abroad](#) – study abroad student enquiries (for inbound students)

[UNSW Exchange](#) – student exchange enquiries (for inbound students)

[UNSW Future Students](#) – potential student enquiries

- e.g. admissions, fees, programs, credit transfer

[School Office](#) – School general office administration enquiries

- NB: the relevant teams listed above must be contacted for all student enquiries

## Course Details

### Credit Points 6

### Summary of the Course

This course teaches students the principles and applications of CAD/CAM in product and manufacturing design and is highly relevant to future trends in automation and manufacturing processes. It teaches the underlying theory of CAD/CAM, but most importantly teaches students the skills needed to design using CAD/CAM. The School operates a number of design platforms, most notably SolidWorks and Autodesk Fusion 360 software. The course teaches the essential steps that one takes to develop a product from concept to manufacture starting with CAD, and progressing to simulation, using CAM and CAE software support.

### Course Aims

This course will enable students to explore and gain further understanding of how CAD/CAM can be used in Manufacturing Industry. This course will also provide students with opportunity to explore innovation in design using SolidWorks, Fusion 360 and the Denford CAM software.

### Course Learning Outcomes

After successfully completing this course, you should be able to:

Learning Outcome	EA Stage 1 Competencies
1. Apply the design concepts for any design task in CAD/CAM environment.	PE1.1, PE1.5, PE2.3
2. Apply the best use of Computer Aided Manufacture techniques in a modern factory.	PE1.2, PE2.2, PE2.3
3. Create a concept of CAD/CAM application for the Rapid Prototyping Technology.	PE1.2, PE2.2, PE2.3
4. By the conclusion of this course the student will be able to develop knowledge and skills in designing using both SolidWorks and SolidCAM software.	PE2.2, PE2.3, PE3.3

### Teaching Strategies

*Online synchronous lectures in the course are designed to cover the terminology and core concepts and theories in the area of manufacturing process design. They do not simply reiterate the texts but build on the lecture topics using examples taken directly from industry to show how the theory is applied in practice and the details of when, where and how it should be applied. The first assessment prompts students in applying engineering design using CAD. The second assessment exposes students to the real-world situation by applying CAD and CAM to produce a commercial product. Demonstrations will be provided during the course of completing this project. The group demonstrations are arranged to provide teams with personalised feedback.*

### Additional Course Information

This is a 6 unit-of-credit (UoC) course and involves 4hours per week (h/w) of face-to-face/online contact.

The normal workload expectations of a student are approximately 25 hours per term for each UOC, including class contact hours, other learning activities, preparation and time spent on all assessable work.

You should aim to spend about 9 h/w on this course. The additional time should be spent in making sure that you understand the lecture material, completing the set assignments, further reading, and revising for any examinations.

# Assessment

## Assessment Tasks

Assessment task	Weight	Due Date	Student Learning Outcomes Assessed
Quizzes	55%	Week 4 and 9 during the tutorial session	1, 2, 3, 4
Team Project	45%	23/11/2020 12:00 AM	1, 2, 3, 4

## Assessment Details

### Assessment 1: Quizzes

**Length:** 2 hours per quiz

**Details:** Students are to complete two individual online quizzes on Moodle. Quiz 1 examines students skill in CAD, and Quiz 2 examines student skill in both CAD and CAM.

### Assessment 2: Team Project

**Length:** 30 pages excluding title page and appendix

**Details:** Student will form a team (max. 6 members per team) to work on a team project that involves the design, analysis, manufacture and testing of an engineering product. Student teams are to present their work in the form of a portfolios and accompany with a product compliance testing session.

## Attendance Requirements

Students are strongly encouraged to attend all classes and review lecture recordings.

## Course Schedule

[View class timetable](#)

### Timetable

Date	Type	Content
O Week: 8 September - 9 September		
Week 1: 14 September - 18 September	Lecture	<ul style="list-style-type: none"> <li>• CAD VS CAM CS CAE</li> <li>• Revision of basic CAD modelling operations</li> </ul>
	Tutorial	<ul style="list-style-type: none"> <li>• Part modelling exercise in Solidworks</li> </ul>
Week 2: 21 September - 25 September	Lecture	<ul style="list-style-type: none"> <li>• Building assemblies using parts and sub-assemblies</li> <li>• Mating practice in Solidworks</li> </ul>
	Tutorial	<ul style="list-style-type: none"> <li>• Building assemblies exercise in Solidworks</li> </ul>
Week 3: 28 September - 2 October	Lecture	<ul style="list-style-type: none"> <li>• Engineering drawing standards</li> <li>• Layout planning</li> <li>• Dimensioning</li> <li>• Bill of materials</li> <li>• Exploded view and animation</li> </ul>
	Tutorial	<ul style="list-style-type: none"> <li>• Part and assembly engineering drawings exercise</li> <li>• Practice CAD exam</li> </ul>
Week 4: 5 October - 9 October	Assessment	<ul style="list-style-type: none"> <li>• CAD Exam</li> </ul>
	Tutorial	<ul style="list-style-type: none"> <li>• Major assignment introduction</li> </ul>
Week 5: 12 October - 16 October	Lecture	<ul style="list-style-type: none"> <li>• Best practice in FDM design</li> <li>• Selecting FDM parameters</li> <li>• Diagnostic and troubleshooting of FDM</li> </ul>
	Tutorial	<ul style="list-style-type: none"> <li>• Slicer exercise in Cura</li> <li>• Continue support on major assignment</li> </ul>
Week 6: 19 October - 23 October	Lecture	<ul style="list-style-type: none"> <li>• Introduction to Fusion 360 and Denford VR</li> <li>• 2.5D milling operations</li> </ul>
	Tutorial	<ul style="list-style-type: none"> <li>• CAM Exercise in Fusion 360</li> <li>• Continue support on major assignment</li> </ul>
Week 7: 26 October - 30 October	Lecture	<ul style="list-style-type: none"> <li>• Material removal rate analysis</li> <li>• Feed and Speed analysis</li> </ul>
	Tutorial	<ul style="list-style-type: none"> <li>• Milling analysis in Fusion 360</li> <li>• Continue support on major assignment</li> </ul>
Week 8: 2 November - 6 November	Lecture	<ul style="list-style-type: none"> <li>• 3D Milling Operations</li> <li>• Four and five-axis milling</li> </ul>
	Tutorial	<ul style="list-style-type: none"> <li>• CAM Exercise in Fusion 360</li> <li>• Practice CAM exam</li> </ul>
Week 9: 9 November -	Assessment	<ul style="list-style-type: none"> <li>• CAM exam</li> </ul>

13 November	Tutorial	<ul style="list-style-type: none"> <li>• <i>Continue support on major assignment</i></li> </ul>
Week 10: 16 November - 20 November	Presentation	<ul style="list-style-type: none"> <li>• Presentation of major assignment</li> </ul>
	Tutorial	<ul style="list-style-type: none"> <li>• <i>Continue support on major assignment</i></li> </ul>

## **Resources**

### **Prescribed Resources**

Additional lecture notes and materials will be given via Moodle.

### **Recommended Resources**

Additional lecture notes and materials will be given via Moodle.

### **Course Evaluation and Development**

Feedback on the course is gathered periodically using various means, including the UNSW myExperience process, informal discussion in the final class for the course, and the School's Student/Staff meetings. Your feedback is taken seriously, and continual improvements are made to the course based, in part, on such feedback.

# Submission of Assessment Tasks

## Assessment submission and marking criteria

Should the course have any non-electronic assessment submission, these should have a standard School cover sheet.

All submissions are expected to be neat and clearly set out. Your results are the pinnacle of all your hard work and should be treated with due respect. Presenting results clearly gives the marker the best chance of understanding your method; even if the numerical results are incorrect.

Marking guidelines for assignment submissions will be provided at the same time as assignment details to assist with meeting assessable requirements. Submissions will be marked according to the marking guidelines provided.

## Late policy

Work submitted late without an approved extension by the course coordinator or delegated authority is subject to a late penalty of 20 percent (20%) of the maximum mark possible for that assessment item, per calendar day.

The late penalty is applied per calendar day (including weekends and public holidays) that the assessment is overdue. There is no pro-rata of the late penalty for submissions made part way through a day.

Work submitted after the 'deadline for absolute fail' is not accepted and a mark of zero will be awarded for that assessment item.

For some assessment items, a late penalty may not be appropriate. These are clearly indicated in the course outline, and such assessments receive a mark of zero if not completed by the specified date. Examples include:

1. Weekly online tests or laboratory work worth a small proportion of the subject mark, or
2. Online quizzes where answers are released to students on completion, or
3. Professional assessment tasks, where the intention is to create an authentic assessment that has an absolute submission date, or
4. Pass/Fail assessment tasks.

## Examinations

You must be available for all quizzes, tests and examinations. For courses that have final examinations, these are held during the University examination periods: February for Summer Term, May for T1, August for T2, and November/December for T3.

Please visit myUNSW for Provisional Examination timetable publish dates. For further information on exams, please see the [Exams](#) webpage.

## Special Consideration

If you have experienced an illness or misadventure beyond your control that will interfere with your

assessment performance, you are eligible to apply for Special Consideration prior to submitting an assessment or sitting an exam.

UNSW now has a [Fit to Sit / Submit rule](#), which means that if you attempt an exam or submit a piece of assessment, you are declaring yourself fit enough to do so and cannot later apply for Special Consideration.

For details of applying for Special Consideration and conditions for the award of supplementary assessment, please see the information on UNSW's [Special Consideration page](#).

**Please note** that students will **not** be required to provide **any** documentary evidence to support absences from any classes missed **because of COVID-19 public health measures such as isolation**. UNSW will **not** be insisting on medical certificates from anyone deemed to be a positive case, or when they have recovered. Such certificates are difficult to obtain and put an unnecessary strain on students and medical staff.

Applications for special consideration **will** be required for assessment and participation absences – but no documentary evidence **for COVID 19 illness or isolation** will be required in T3.

## Academic Honesty and Plagiarism

UNSW has an ongoing commitment to fostering a culture of learning informed by academic integrity. All UNSW students have a responsibility to adhere to this principle of academic integrity. Plagiarism undermines academic integrity and is not tolerated at UNSW. *Plagiarism at UNSW is defined as using the words or ideas of others and passing them off as your own.*

Plagiarism is a type of intellectual theft. It can take many forms, from deliberate cheating to accidentally copying from a source without acknowledgement. UNSW has produced a website with a wealth of resources to support students to understand and avoid plagiarism, visit: [student.unsw.edu.au/plagiarism](http://student.unsw.edu.au/plagiarism). The Learning Centre assists students with understanding academic integrity and how not to plagiarise. They also hold workshops and can help students one-on-one.

You are also reminded that careful time management is an important part of study and one of the identified causes of plagiarism is poor time management. Students should allow sufficient time for research, drafting and the proper referencing of sources in preparing all assessment tasks.

If plagiarism is found in your work when you are in first year, your lecturer will offer you assistance to improve your academic skills. They may ask you to look at some online resources, attend the Learning Centre, or sometimes resubmit your work with the problem fixed. However more serious instances in first year, such as stealing another student's work or paying someone to do your work, may be investigated under the Student Misconduct Procedures.

Repeated plagiarism (even in first year), plagiarism after first year, or serious instances, may also be investigated under the Student Misconduct Procedures. The penalties under the procedures can include a reduction in marks, failing a course or for the most serious matters (like plagiarism in an honours thesis) even suspension from the university. The Student Misconduct Procedures are available here:

[www.gs.unsw.edu.au/policy/documents/studentmisconductprocedures.pdf](http://www.gs.unsw.edu.au/policy/documents/studentmisconductprocedures.pdf)

## Academic Information

### Credit points

Course credit is calculated in Units-Of-Credit (UOC). The normal workload expectation for one UOC is approximately 25 hours per term. This includes class contact hours, private study, other learning activities, preparation and time spent on all assessable work.

Most coursework courses at UNSW are 6 UOC and involve an estimated 150 hours to complete. Each course includes a prescribed number of hours per week (h/w) of scheduled face-to-face and/or online contact. Any additional time beyond the prescribed contact hours should be spent in making sure that you understand the lecture material, completing the set assignments, further reading, and revising for any examinations.

### On-campus class attendance

Public distancing conditions must be followed for all T3 face-to-face classes. To ensure this, only students enrolled in those classes will be allowed in the room. Class rosters will be attached to corresponding rooms and circulated among lab demonstrators. No over-enrolment is allowed in face-to-face class. Students enrolled in online classes can swap their enrolment from online to other additional, **but limited**, number of on-campus classes by Sunday, Week 1. Please refer to your course's Microsoft Teams and Moodle sites for more information about class attendance for in-person and online class sections/activities.

Your health and the health of those in your class is critically important. You must stay at home if you are sick or have been advised to self-isolate by [NSW health](#) or government authorities. Current alerts and a list of hotspots can be found [here](#). **You will not be penalised for missing a face-to-face activity due to illness or a requirement to self-isolate.** We will work with you to ensure continuity of learning during your isolation and have plans in place for you to catch up on any content or learning activities you may miss. Where this might not be possible, an application for fee remission may be discussed. Further information is available on any course Moodle or Teams site.

In certain classroom and laboratory situations where 1.5 metres physical distancing cannot be maintained or there is a high risk that it cannot be maintained, face masks will be considered **mandatory PPE** for students and staff.

For more information, please refer to the FAQs: <https://www.covid-19.unsw.edu.au/safe-return-campus-faqs>

### Guidelines

All students are expected to read and be familiar with UNSW guidelines and policies. In particular, students should be familiar with the following:

- [Attendance](#)
- [UNSW Email Address](#)
- [Special Consideration](#)
- [Exams](#)
- [Approved Calculators](#)
- [Academic Honesty and Plagiarism](#)

## Appendix: Engineers Australia (EA) Professional Engineer Competency Standard

Program Intended Learning Outcomes	
Knowledge and skill base	
PE1.1 Comprehensive, theory based understanding of the underpinning natural and physical sciences and the engineering fundamentals applicable to the engineering discipline	✓
PE1.2 Conceptual understanding of the mathematics, numerical analysis, statistics, and computer and information sciences which underpin the engineering discipline	✓
PE1.3 In-depth understanding of specialist bodies of knowledge within the engineering discipline	
PE1.4 Discernment of knowledge development and research directions within the engineering discipline	
PE1.5 Knowledge of engineering design practice and contextual factors impacting the engineering discipline	✓
PE1.6 Understanding of the scope, principles, norms, accountabilities and bounds of sustainable engineering practice in the specific discipline	
Engineering application ability	
PE2.1 Application of established engineering methods to complex engineering problem solving	
PE2.2 Fluent application of engineering techniques, tools and resources	✓
PE2.3 Application of systematic engineering synthesis and design processes	✓
PE2.4 Application of systematic approaches to the conduct and management of engineering projects	
Professional and personal attributes	
PE3.1 Ethical conduct and professional accountability	
PE3.2 Effective oral and written communication in professional and lay domains	
PE3.3 Creative, innovative and pro-active demeanour	✓
PE3.4 Professional use and management of information	
PE3.5 Orderly management of self, and professional conduct	
PE3.6 Effective team membership and team leadership
