Phone

(+61 2) 9385 8500 – Nucleus Student Hub
(+61 2) 9385 7661 – Engineering Industrial Training
(+61 2) 9385 3179 – UNSW Study Abroad and UNSW Exchange (for inbound students)

(+61 2) 9385 4097 – School Office**

**Please note that the School Office will not know when/if your course convenor is on campus or available

Email

Engineering Student Support Services – current student enquiries

- e.g. enrolment, progression, clash requests, course issues or program-related queries

Engineering Industrial Training – Industrial training questions

UNSW Study Abroad – study abroad student enquiries (for inbound students)

UNSW Exchange – student exchange enquiries (for inbound students)

UNSW Future Students – potential student enquiries

- e.g. admissions, fees, programs, credit transfer

School Office – School general office administration enquiries

- NB: the relevant teams listed above must be contacted for all student enquiries. The School will only be able to refer students on to the relevant team if contacted

Course Details

Units of Credit 6

Summary of the Course

This course covers fundamental statistics, design of experiment (DOE), and development of process improvement strategy. Teaching will focus on using engineering industry-based problems, supplemented with the use statistics software package - Minitab. Students will also learn how to compile report to effectively present information from a managerial perspective.

Course Aims

The course will introduce statistics, mathematics and associated techniques for analysing complex engineering processes for the purpose of improvement. Major disciplines covered include issue analysis, data collection, statistical data analysis, process modelling, decision-making and implementation. The course focuses on developing experimental techniques using statistical methods to test the performance of the processes in an engineering industry.

Course Learning Outcomes

After successfully completing this course, you should be able to:

<table>
<thead>
<tr>
<th>Learning Outcome</th>
<th>EA Stage 1 Competencies</th>
</tr>
</thead>
<tbody>
<tr>
<td>1. Demonstrate critical thinking and derive improvement strategies from a managerial perspective</td>
<td>PE2.1, PE2.2, PE2.4</td>
</tr>
<tr>
<td>2. Perform both parametric and non-parametric hypothesis tests for a range of engineering research problems</td>
<td>PE1.1, PE1.2, PE1.3</td>
</tr>
<tr>
<td>3. Design and plan experiments to collect data to uncover critical information and knowledge in industry-based problems</td>
<td>PE1.2, PE2.1, PE2.3</td>
</tr>
<tr>
<td>4. Demonstrate effective written communication skills for management</td>
<td>PE2.4, PE3.2, PE3.3</td>
</tr>
</tbody>
</table>

Teaching Strategies

Synchronous online lectures, statistics software package demonstrations, online quizzes, team assignments and online final exam in the course are designed to cover the core knowledge areas in engineering statistics. They do not simply reiterate the texts, but build on the lecture topics using examples and cases taken directly from industry to show how the theory is applied in practice and the details of when, where and how it should be applied.

</tbody>
</table>

Assessment 1: Online Quiz

Assessment length: 75 minutes  
Due date: Thursday Week 3, 7 and 9 at 2PM Sydney Time  
Deadline for absolute fail: Not Applicable  
Marks returned: One week after completing the assessment unless supplementary quizzes are needed

Students have to conduct 3 online Moodle quizzes during exam time according to the UNSW Timetable. Each quiz will worth 5% of their final assessment mark.

Assessment criteria

- Correct value entered (in filling-the-box questions)
- Correct choice of answer (in multiple choice questions)

Students are expected to submit their working out at the end each quiz. The working out can be in the form of handwritten notes, Excel files, Minitab files or equivalent that demonstrate the student's own work. A separate link will be provided for the submission of the working out.

Assessment 2: Data Mining Assignment Part 1

Start date: Week 4  
Submission notes: This assessment will be conducted via VIVA format  
Due date: Week 7  
Deadline for absolute fail: 1 week after the assessment is due  
Marks returned: 2 weeks after the assessment is due

Students will work in a team (min. 2, max. 4 members per team) to uncover information from a dataset. The dataset will contain performance data (simulated) based on an industry/real-life process. Student team will receive feedback via a marking rubrics and personalised feedback within the 2 weeks after submission. Note that individual mark will be given in this assessment task.

Assessment criteria

- Executive Summary – is the executive summary presented with high quality and accurate information
with recommendation in plain English? (/5)

• Organisation – are the information presented in an organised manner and well the team organize themselves? (/10)

• Accuracy – are the questions answered accurately during the VIVA assessment? (/10)

**Additional details**

**Assignment 1 Executive Summary Submission**

• Each team is to produce an Executive Summary with supporting documents to address the assignment task.

• The submission needs to be uploaded to Moodle by Week 7, Monday, 9am (Sydney Time).

• Only 1 submission is required per team.

• Please nominate only 1 team member to make the final submission, further submission will automatically overwrite the previous submission.

**Assignment 1 Viva Assessment**

• Evaluation period: Monday to Friday, Week 7

• Possible time slot period: See Booking Page on Moodle

• Evaluation duration: Maximum 20 minutes

• Regardless of your evaluation time, your team is required to submit your Written Part on Moodle by Week 7, Monday, 9am (Sydney Time)

**Assessment 3: Data Mining Assignment Part 2**

**Start date:** Week 7  
**Submission notes:** The report will be submitted via Moodle  
**Due date:** Week 10 Friday 5PM  
**Deadline for absolute fail:** One week after due date  
**Marks returned:** Upon release of the course result

This is a continuation of "Data Mining Assignment Part 1". Student team would use the feedback they received from the VIVA assessment to complete a formal report. An assignment template will be provided to assist student teams in completing the report.

**Assessment criteria**

• Improved Executive Summary – is the executive summary presented with high quality and accurate information with recommendation in plain English? (/2)

• Summary of Key Findings – provide a summary of your key finding in NON-STATISTICAL language (/3)
• Graphical Evidences – insert at least one appropriate data visualisation tool that supports each key finding (/5)

• Hypothesis Tests – provide a formal hypothesis test to support each key finding (/5)

• Recommendation – provide a concise and clear recommendation using NON-STATISTICAL language for each key finding (/5)

• Documentation – readability of the document (/5)

Assessment 4: Final Exam

Start date: Final exam period
Submission notes: Moodle Exam
Due date: Final exam period
Marks returned: Upon release of course result

The final exam will be centrally managed and will cover all contents in the course.

Assessment criteria

• Correct value entered (in filling-the-box questions)
• Correct choice of answer (in multiple choice questions)

Students are expected to submit their working out at the end of the exam. The working out can be in the form of handwritten notes, Excel files, Minitab files or equivalent that demonstrate the student’s own work. A separate link will be provided for the submission of the working out.
**Attendance Requirements**

Students are strongly encouraged to attend all classes and review lecture recordings.

**Course Schedule**

### Timetable

<table>
<thead>
<tr>
<th>Date</th>
<th>Type</th>
<th>Content</th>
</tr>
</thead>
</table>
| Week 1: 14 February - 18 February | Lecture | **Introduction to Experimental Design**  
  - Strategy of Experimentation  
  - Basic Principle of Experimental Design  
  - Data Visualisation Tools  
  - Revision of Basic Probability Distribution |
| Week 2: 21 February - 25 February | Lecture | **Simple Comparative Experiments Part I**  
  - Hypothesis Test Revision  
  - Confidence Intervals  
  - Student's t-test vs Z-test |
| Week 3: 28 February - 4 March | Lecture | **Simple Comparative Experiments Part II**  
  - Student's t-test vs Z-test  
  - Paired t-test  
  - Comparison of sample variances |
| Assessment          |          | Online Quiz 1                                    |
| Week 4: 7 March - 11 March | Lecture | **Analysis of Variance (ANOVA)**  
  - Introduction to ANOVA (one-way and two-way)  
  - Fixed Effect Model  
  - ANOVA Model Adequacy Checks  
  - Tukey's Comparison Test |
| Week 5: 14 March - 18 March | Lecture | **Experimental Design - Randomised Blocks I**  
  - Statistical Analysis of RCBD  
  - Latin Square Design |
| Week 6: 21 March - 25 March | Lecture | **Flexibility Week**  
  - Revision |

Resources

Prescribed Resources

You can find a free e-copy of the textbook from the UNSW library.

Course Evaluation and Development

In this course, recent improvements resulting from student feedback include the continuous use of VIVA assessment as it received positive feedback.
Submission of Assessment Tasks

Assessment submission and marking criteria

Should the course have any non-electronic assessment submission, these should have a standard School cover sheet.

All submissions are expected to be neat and clearly set out. Your results are the pinnacle of all your hard work and should be treated with due respect. Presenting results clearly gives the marker the best chance of understanding your method; even if the numerical results are incorrect.

Marking guidelines for assignment submissions will be provided at the same time as assignment details to assist with meeting assessable requirements. Submissions will be marked according to the marking guidelines provided.

Late policy

Work submitted late without an approved extension by the course coordinator or delegated authority is subject to a late penalty of 20 percent (20%) of the maximum mark possible for that assessment item, per calendar day, for a minimum of zero marks.

The late penalty is applied per calendar day (or part thereof), including weekends and public holidays, that the assessment is overdue.

Work submitted after the ‘deadline for absolute fail’ is not accepted and a mark of zero will be awarded for that assessment item. For example:

- Your course has an assessment task worth a total of 30 marks (Max Possible Mark)
- You submit the assessment 2 days after the due date
- The assessment is marked as usual and achieves a score of 20 marks (Awarded Mark)
- The late policy is applied using Late Mark = Awarded Mark - (Days*Penalty per Day)*Max Possible Mark. Your adjusted final score is 8 marks (20 - ((2*0.2)*30)).

For some assessment items, a late penalty may not be appropriate. These are clearly indicated in the course outline, and such assessments receive a mark of zero if not completed by the specified date. Examples include:

1. Weekly online tests or laboratory work worth a small proportion of the subject mark, or
2. Online quizzes where answers are released to students on completion, or
3. Professional assessment tasks, where the intention is to create an authentic assessment that has an absolute submission date, or
4. Pass/Fail assessment tasks.

Examinations

You must be available for all quizzes, tests and examinations. For courses that have final examinations, these are held during the University examination periods: February for Summer Term, May for T1, August for T2, and November/December for T3.

Please visit myUNSW for Provisional Examination timetable publish dates. For further information on
exams, please see the Exams webpage.

Special Consideration

If you have experienced an illness or misadventure beyond your control that will interfere with your assessment performance, you are eligible to apply for Special Consideration prior to submitting an assessment or sitting an exam.

UNSW now has a Fit to Sit / Submit rule, which means that if you attempt an exam or submit a piece of assessment, you are declaring yourself fit enough to do so and cannot later apply for Special Consideration.

For details of applying for Special Consideration and conditions for the award of supplementary assessment, please see the information on UNSW's Special Consideration page.

Please note that students will not be required to provide any documentary evidence to support absences from any classes missed because of COVID-19 public health measures such as isolation. UNSW will not be insisting on medical certificates from anyone deemed to be a positive case, or when they have recovered. Such certificates are difficult to obtain and put an unnecessary strain on students and medical staff.

Applications for special consideration will be required for assessment and participation absences – but no documentary evidence for COVID-19 illness or isolation will be required.

Special Consideration Outcomes

Assessments have default Special Consideration outcomes. The default outcome for the assessment will be advised when you apply for Special Consideration. Below is the list of possible outcomes:
<table>
<thead>
<tr>
<th>Outcome</th>
<th>Explanation</th>
<th>Example</th>
</tr>
</thead>
<tbody>
<tr>
<td>Time extension</td>
<td>Student provided more time to submit the assessment</td>
<td>e.g. 1 more week of time granted to submit a report</td>
</tr>
<tr>
<td>Supplementary assessment</td>
<td>Student provided an alternate assessment at a later date/time</td>
<td>e.g. a supplementary exam is scheduled during the supplementary exam period of the term</td>
</tr>
<tr>
<td>Substitute item</td>
<td>The mark for the missed assessment is substituted with the mark of another assessment</td>
<td>e.g. mark for Quiz 1 applied also applied as mark for Quiz 2, meaning if a student achieved a mark of 20/30 for Quiz 1 and was granted Special Consideration for Quiz 2, a mark of 20/30 would be applied for Quiz 2, etc</td>
</tr>
</tbody>
</table>
| Exemption             | All course marks are recalculated excluding this assessment and its weighting | e.g. The course has an assessment structure of:  
- Assignments 30%,  
- Lab report 30%,  
- Final Exam 40%.  
If the Lab report is missed and student is granted Special Consideration, then the assessment structure may be reweighted as follows:  
- Assignments 50%  
- Final Exam 50% as though the Lab report did not exist |
| Non-standard          | Course Coordinator is contacted for the outcome when special consideration is granted as the outcome differs on a case-by-case basis | e.g. typical for group assessments where time extension supplementary assessment could be granted to the group member, time extension could be granted to the whole group, etc. Clarify with your Course Convenor for |
Academic Honesty and Plagiarism

UNSW has an ongoing commitment to fostering a culture of learning informed by academic integrity. All UNSW students have a responsibility to adhere to this principle of academic integrity. Plagiarism undermines academic integrity and is not tolerated at UNSW. **Plagiarism at UNSW is defined as using the words or ideas of others and passing them off as your own.**

Plagiarism is a type of intellectual theft. It can take many forms, from deliberate cheating to accidentally copying from a source without acknowledgement. UNSW has produced a website with a wealth of resources to support students to understand and avoid plagiarism, visit: [student.unsw.edu.au/plagiarism](http://student.unsw.edu.au/plagiarism). The Learning Centre assists students with understanding academic integrity and how not to plagiarise. They also hold workshops and can help students one-on-one.

You are also reminded that careful time management is an important part of study and one of the identified causes of plagiarism is poor time management. Students should allow sufficient time for research, drafting and the proper referencing of sources in preparing all assessment tasks.

If plagiarism is found in your work when you are in first year, your lecturer will offer you assistance to improve your academic skills. They may ask you to look at some online resources, attend the Learning Centre, or sometimes resubmit your work with the problem fixed. However more serious instances in first year, such as stealing another student’s work or paying someone to do your work, may be investigated under the Student Misconduct Procedures.

Repeated plagiarism (even in first year), plagiarism after first year, or serious instances, may also be investigated under the Student Misconduct Procedures. The penalties under the procedures can include a reduction in marks, failing a course or for the most serious matters (like plagiarism in an honours thesis) even suspension from the university. The Student Misconduct Procedures are available here:

Academic Information

Credit points

Course credit is calculated in Units-Of-Credit (UOC). The normal workload expectation for one UOC is approximately 25 hours per term. This includes class contact hours, private study, other learning activities, preparation and time spent on all assessable work.

Most coursework courses at UNSW are 6 UOC and involve an estimated 150 hours to complete, for both regular and intensive terms. Each course includes a prescribed number of hours per week (h/w) of scheduled face-to-face and/or online contact. Any additional time beyond the prescribed contact hours should be spent in making sure that you understand the lecture material, completing the set assignments, further reading, and revising for any examinations.

On-campus class attendance

**T1-2022 UPDATE**

Public distancing conditions must be followed for all face-to-face classes. To ensure this, only students enrolled in those classes will be allowed in the room. No over-enrolment is allowed in face-to-face classes. Students enrolled in online classes can swap their enrolment from online to on-campus classes by Sunday, Week 1. Please refer to your course's Microsoft Teams and Moodle sites for more information about class attendance for in-person and online class sections/activities.

Your health and the health of those in your class is critically important. You must stay at home if you are sick or have been advised to self-isolate by NSW health or government authorities. Current alerts and a list of hotspots can be found here. You will not be penalised for missing a face-to-face activity due to illness or a requirement to self-isolate. We will work with you to ensure continuity of learning during your isolation and have plans in place for you to catch up on any content or learning activities you may miss. Where this might not be possible, an application for fee remission may be discussed. Further information is available on any course Moodle or Teams site.

In certain classroom and laboratory situations where physical distancing cannot be maintained or there is a high risk that it cannot be maintained, face masks will be considered mandatory PPE for students and staff.

For more information, please refer to the FAQs: https://www.covid-19.unsw.edu.au/safe-return-campus-faqs

Guidelines

All students are expected to read and be familiar with UNSW guidelines and polices. In particular, students should be familiar with the following:

- Attendance
- UNSW Email Address
- Special Consideration
- Exams
- Approved Calculators
• Academic Honesty and Plagiarism
