Course Details

Units of Credit 6

Summary of the Course

This subject is primarily concerned with the efficient and effective management of materials flow through manufacturing organizations in such a way that wastage (particularly in the form of excess inventory) is reduced, materials throughput time is sped up, and customer requirements are met in a timely manner. This course enables you to investigate the basic issue related to Production Planning and Control, which is how much of what material items to produce (or order) at what specific times in order to satisfy customer demand in an optimal way. The main thrust of this subject is a study of the dynamics of how materials flow through a manufacturing organization, an evaluation of the various production planning and control techniques available to optimize this flow, and how effective production planning and control can contribute to a company’s competitive advantage.

Course Aims

This course aims firstly to give students grounding in the basic issues confronting production managers today and secondly to present a set of possible solutions to those issues, considering recent advances in computing and information technology. This course introduces students to the dynamics of material flow through a manufacturing system, basic and advanced techniques of production planning and control, and their realization. Therefore, this course is an extension of the MANF6860 Manufacturing Strategy, which mainly deals with long-term strategic planning process.

Course Learning Outcomes

After successfully completing this course, you should be able to:

<table>
<thead>
<tr>
<th>Learning Outcome</th>
<th>EA Stage 1 Competencies</th>
</tr>
</thead>
<tbody>
<tr>
<td>1. Understand the strategic implications of the Production Planning and Control (PPC)</td>
<td>PE1.1</td>
</tr>
<tr>
<td>2. Understand the concept demand management, forecasting and the link between demand management and MPS</td>
<td>PE1.1, PE2.1, PE2.2</td>
</tr>
<tr>
<td>3. Understand the main PPC systems and appreciate the importance of capacity planning</td>
<td>PE1.1, PE2.1, PE2.2</td>
</tr>
<tr>
<td>4. Understand the importance of controlling production activities</td>
<td>PE1.1, PE2.1, PE2.2</td>
</tr>
</tbody>
</table>

Teaching Strategies

There will be a live lecture via MsTeams each week from. Lectures will also be made available as lecture recordings in MsTeams. There will also be a demonstration class for selected weeks where it is necessary.
Assessment

</tr>
<tr>
<td>3. Assignment 3</td>
<td>40%</td>
<td>Thursday, Week 10, by 11:59 PM</td>
<td>1, 2, 3, 4</td>
</tr>
</tbody>
</table>

Assessment 1: Assignment 1

**Start date:** Thursday, Week 2, 09:00 AM  
**Assessment length:** Maximum 1000 words  
**Submission notes:** Submission will be done via Moodle  
**Due date:** Thursday, Week 4, by 11:59 PM  
**Deadline for absolute fail:** UNSW late submission penalty will apply.

This assignment is an individual assignment that covers week 1 and 2 lectures particularly focus on demand forecasting and management. The results will be returned within two weeks of the date.

This assignment is submitted through Turnitin and students can see Turnitin similarity reports.

**Assessment criteria**

A detailed assessment description and a rubric will be uploaded to Moodle.

**Additional details**

Further information about the assignments and assessment rubric will be provided on Moodle.

Assessment 2: Assignment 2

**Start date:** Thursday, Week 5, 09:00 AM  
**Assessment length:** Maximum 1000 words  
**Submission notes:** Submission will be done via Moodle  
**Due date:** Tuesday, Week 7, 11:59 PM  
**Deadline for absolute fail:** UNSW late submission penalty will apply.

This assignments covers weeks 4, 5, and 6 with a particular emphasis on master developing a master production schedule and converting it to a material requirement planning. This assignment is an individual assignment and they will be marked and returned within 2 weeks of the due date.

This assignment is submitted through Turnitin and students can see Turnitin similarity reports.
Assessment criteria

A detailed assessment description and a rubric will be uploaded to Moodle.

Additional details

Further information about the assignments and assessment rubric will be provided on Moodle.

Assessment 3: Assignment 3

Start date: Thursday, Week 7, 09:00 AM  
Assessment length: Maximum 2000 words  
Submission notes: Submission will be done via Moodle  
Due date: Thursday, Week 10, by 11:59 PM  
Deadline for absolute fail: UNSW late submission penalty will apply.

This assignment will cover week 7-10 lectures with a particular emphasis on capacity planning and production control. It will be an individual assignment and it will be marked and returned within 2 weeks of the due date.

This assignment is submitted through Turnitin and students can see Turnitin similarity reports.

Assessment criteria

A detailed assessment description and a rubric will be uploaded to Moodle.

Additional details

Further information about the assignments and assessment rubric will be provided on Moodle.
Attendance Requirements

Students are strongly encouraged to attend all classes and review lecture recordings.

Resources

Prescribed Resources

Recommended Resources

Other available literature in the area of production and operations management in the library can be used for certain topics

UNSW Library website: https://www.library.unsw.edu.au/

Course Evaluation and Development

Feedback on the course is gathered periodically using various means, including the UNSW myExperience process, informal discussion in the final class for the course, and the School’s Student/Staff meetings. Your feedback is taken seriously, and continual improvements are made to the course based, in part, on such feedback. As part of the course improvement strategy, individual assignemnt will replace the group assignments.
Submission of Assessment Tasks

Assessment submission and marking criteria

Should the course have any non-electronic assessment submission, these should have a standard School cover sheet.

All submissions are expected to be neat and clearly set out. Your results are the pinnacle of all your hard work and should be treated with due respect. Presenting results clearly gives the marker the best chance of understanding your method; even if the numerical results are incorrect.

Marking guidelines for assignment submissions will be provided at the same time as assignment details to assist with meeting assessable requirements. Submissions will be marked according to the marking guidelines provided.

Late policy

Work submitted late without an approved extension by the course coordinator or delegated authority is subject to a late penalty of five percent (5%) of the maximum mark possible for that assessment item, per calendar day.

The late penalty is applied per calendar day (including weekends and public holidays) that the assessment is overdue. There is no pro-rata of the late penalty for submissions made part way through a day. This is for all assessments where a penalty applies.

Work submitted after five days (120 hours) will not be accepted and a mark of zero will be awarded for that assessment item.

For example:

- Your course has an assessment task worth a total of 100 marks.
- You submit the assessment 2 days (or part thereof) late (i.e. from 24-48 hours after the deadline).
- The submission is graded and awarded a mark of 65/100.
- A late penalty of 10 marks is deducted from your awarded mark (2 days @ 5% of 100 marks).
- Your adjusted final score is 55/100.

For some assessment items, a late penalty may not be appropriate. These are clearly indicated in the course outline, and such assessments receive a mark of zero if not completed by the specified date.

Examples include:

1. Weekly online tests or laboratory work worth a small proportion of the subject mark, or
2. Online quizzes where answers are released to students on completion, or
3. Professional assessment tasks, where the intention is to create an authentic assessment that has an absolute submission date, or
4. Pass/Fail assessment tasks.

Examinations

You must be available for all quizzes, tests and examinations. For courses that have final examinations,
these are held during the University examination periods: February for Summer Term, May for T1, August for T2, and November/December for T3.

Please visit myUNSW for Provisional Examination timetable publish dates. For further information on exams, please see the Exams webpage.

**Special Consideration**

If you have experienced an illness or misadventure beyond your control that will interfere with your assessment performance, you are eligible to apply for Special Consideration prior to submitting an assessment or sitting an exam.

UNSW now has a Fit to Sit / Submit rule, which means that if you attempt an exam or submit a piece of assessment, you are declaring yourself fit enough to do so and cannot later apply for Special Consideration.

For details of applying for Special Consideration and conditions for the award of supplementary assessment, please see the information on UNSW’s Special Consideration page.

**Please note** that students will not be required to provide any documentary evidence to support absences from any classes missed because of COVID-19 public health measures such as isolation. UNSW will not be insisting on medical certificates from anyone deemed to be a positive case, or when they have recovered. Such certificates are difficult to obtain and put an unnecessary strain on students and medical staff.

Applications for special consideration will be required for assessment and participation absences – but no documentary evidence for COVID-19 illness or isolation will be required.

**Special Consideration Outcomes**

Assessments have default Special Consideration outcomes. The default outcome for the assessment will be advised when you apply for Special Consideration. Below is the list of possible outcomes:
<table>
<thead>
<tr>
<th><strong>Outcome</strong></th>
<th><strong>Explanation</strong></th>
<th><strong>Example</strong></th>
</tr>
</thead>
<tbody>
<tr>
<td>Time extension</td>
<td>Student provided more time to submit the assessment</td>
<td>e.g. 1 more week of time granted to submit a report</td>
</tr>
<tr>
<td>Supplementary assessment</td>
<td>Student provided an alternate assessment at a later date/time</td>
<td>e.g. a supplementary exam is scheduled during the supplementary exam period of the term</td>
</tr>
<tr>
<td>Substitute item</td>
<td>The mark for the missed assessment is substituted with the mark of another assessment</td>
<td>e.g. mark for Quiz 1 applied also applied as mark for Quiz 2, meaning if a student achieved a mark of 20/30 for Quiz 1 and was granted Special Consideration for Quiz 2, a mark of 20/30 would be applied for Quiz 2, etc</td>
</tr>
<tr>
<td>Exemption</td>
<td>All course marks are recalculated excluding this assessment and its weighting</td>
<td>e.g. The course has an assessment structure of:</td>
</tr>
<tr>
<td></td>
<td></td>
<td>- Assignments 30%,</td>
</tr>
<tr>
<td></td>
<td></td>
<td>- Lab report 30%,</td>
</tr>
<tr>
<td></td>
<td></td>
<td>- Final Exam 40%.</td>
</tr>
<tr>
<td></td>
<td></td>
<td>If the Lab report is missed and student is granted Special Consideration, then the assessment structure may be reweighted as follows:</td>
</tr>
<tr>
<td></td>
<td></td>
<td>- Assignments 50%</td>
</tr>
<tr>
<td></td>
<td></td>
<td>- Final Exam 50%</td>
</tr>
<tr>
<td></td>
<td></td>
<td>as though the Lab report did not exist</td>
</tr>
<tr>
<td>Non-standard</td>
<td>Course Coordinator is contacted for the outcome when special consideration is granted as the outcome differs on a case-by-case basis</td>
<td>e.g. typical for group assessments where time extension supplementary assessment could be granted to the group member, time extension could be granted to the whole group, etc. Clarify with your Course Convenor for</td>
</tr>
</tbody>
</table>

MANF9472 // Term 2, 2022 // published at 25-05-2022 © UNSW Sydney, 2022
Academic Honesty and Plagiarism

UNSW has an ongoing commitment to fostering a culture of learning informed by academic integrity. All UNSW students have a responsibility to adhere to this principle of academic integrity. Plagiarism undermines academic integrity and is not tolerated at UNSW. Plagiarism at UNSW is defined as using the words or ideas of others and passing them off as your own.

Plagiarism is a type of intellectual theft. It can take many forms, from deliberate cheating to accidentally copying from a source without acknowledgement. UNSW has produced a website with a wealth of resources to support students to understand and avoid plagiarism, visit: student.unsw.edu.au/plagiarism. The Learning Centre assists students with understanding academic integrity and how not to plagiarise. They also hold workshops and can help students one-on-one.

You are also reminded that careful time management is an important part of study and one of the identified causes of plagiarism is poor time management. Students should allow sufficient time for research, drafting and the proper referencing of sources in preparing all assessment tasks.

If plagiarism is found in your work when you are in first year, your lecturer will offer you assistance to improve your academic skills. They may ask you to look at some online resources, attend the Learning Centre, or sometimes resubmit your work with the problem fixed. However more serious instances in first year, such as stealing another student’s work or paying someone to do your work, may be investigated under the Student Misconduct Procedures.

Repeated plagiarism (even in first year), plagiarism after first year, or serious instances, may also be investigated under the Student Misconduct Procedures. The penalties under the procedures can include a reduction in marks, failing a course or for the most serious matters (like plagiarism in an honours thesis) even suspension from the university. The Student Misconduct Procedures are available here:

Academic Information

Credit points

Course credit is calculated in Units-Of-Credit (UOC). The normal workload expectation for one UOC is approximately 25 hours per term. This includes class contact hours, private study, other learning activities, preparation and time spent on all assessable work.

Most coursework courses at UNSW are 6 UOC and involve an estimated 150 hours to complete, for both regular and intensive terms. Each course includes a prescribed number of hours per week (h/w) of scheduled face-to-face and/or online contact. Any additional time beyond the prescribed contact hours should be spent in making sure that you understand the lecture material, completing the set assignments, further reading, and revising for any examinations.

On-campus class attendance

**T2-2022 UPDATE**

Public distancing conditions must be followed for all face-to-face classes. To ensure this, only students enrolled in those classes will be allowed in the room. No over-enrolment is allowed in face-to-face classes. Students enrolled in online classes can swap their enrolment from online to on-campus classes by Sunday, Week 1. Please refer to your course's Microsoft Teams and Moodle sites for more information about class attendance for in-person and online class sections/activities.

Your health and the health of those in your class is critically important. You must stay at home if you are sick or have been advised to self-isolate by NSW health or government authorities. Current alerts and a list of hotspots can be found here. You will not be penalised for missing a face-to-face activity due to illness or a requirement to self-isolate. We will work with you to ensure continuity of learning during your isolation and have plans in place for you to catch up on any content or learning activities you may miss. Where this might not be possible, an application for fee remission may be discussed. Further information is available on any course Moodle or Teams site.

In certain classroom and laboratory situations where physical distancing cannot be maintained or there is a high risk that it cannot be maintained, face masks will be considered mandatory PPE for students and staff.

For more information, please refer to the FAQs: https://www.covid-19.unsw.edu.au/safe-return-campus-faqs

Guidelines

All students are expected to read and be familiar with UNSW guidelines and polices. In particular, students should be familiar with the following:

- Attendance
- UNSW Email Address
- Special Consideration
- Exams
- Approved Calculators
• **Academic Honesty and Plagiarism**

*Note: This course outline sets out description of classes at the date the Course Outline is published. The nature of classes may change during the Term after the Course Outline is published. Moodle should be consulted for the up-to-date class descriptions. If there is any inconsistency in the description of activities between the University timetable and the Course Outline (as updated in Moodle), the description in the Course Outline/Moodle applies.*
