Faculty of Science - Course Outline

1. Information about the Course

NB: Some of this information is available on the [UNSW Handbook](#)¹

Year of Delivery	2020			
Course Code	GEOS 3921			
Course Name	COASTAL RESOURCE MANAGEMENT			
Academic Unit	BEES			
Level of Course	3 rd Year undergraduate course			
Units of Credit	6 units of credit			
Session(s) Offered	Trimester 3			
Assumed Knowledge, Prerequisites or Co-requisites	Nil			
Hours per Week	2-4 hours per week lecture- each lecture is different, lectures are not repeated 5 x 2 hour tutorial- selected weeks refer to the course schedule			
Number of Weeks	10 weeks			
Commencement Date	Week 1, Tuesday 14 th September			
Summary of Course Structure (for details see 'Course Schedule')				
Component	HPW	Time	Day	Location
Lectures	2	9 am to 11 am	Tuesday (wk 1-5, 7-10)	Online and recorded
Seminar – only in Week 10!	2	11 am – 1 pm	Thursday (wk 10 only)	Online and recorded
Tutorial classes	2			
Tutorial – Option 1		11 am – 1 pm	Tuesday	Currently only online – recorded but you must log on to the class
Tutorial – Option 2		3 pm – 5 pm	Tuesday	Currently only online – recorded but you must log on to the class
TOTAL	4-6			
Special Details	<p><i>All lectures will be recorded and posted to Moodle; lectures will be delivered live online. Tutorial classes are compulsory and will be run through Blackboard Collaborate, on select weeks – see schedule; preparation for tutorial classes is required. Two tutorial periods are used for field trips within the Eastern Suburbs. Due to the uncertainty over lockdowns and restrictions, and because we have students unable to travel, a virtual (recorded) field trip will be offered. If restrictions are relaxed, there might be a change in plans. Details will be provided and options to take these virtually will be provided.</i></p>			

2. Staff Involved in the Course

Staff	Role	Name	Contact Details	Consultation Times
Course Convenor		A/Prof Jes Sammut	0403154863 j.sammut@unsw.edu.au Skype: Jesmond1965	By appointment, please send an email to schedule a time.
Additional Teaching Staff	Lecturers & Facilitators	Dr Angela Liu	TBA in class	TBA in class
		Dr Damon Bolton		

¹ UNSW Online Handbook: <http://www.handbook.unsw.edu.au>

3. Course Details

Course Description² (Handbook Entry)	This course focuses on coastal resource management. Topics include: Australian coastal zone policy; coastal erosion and conservation; soil and water acidification; global shrimp farming issues and management; oyster farming; causes of fish kills and fish disease outbreaks; estuary management; coastal water resource management; recreational and commercial fisheries; marine protected areas (MPAs); coastal wetlands. The course considers Australian and global perspectives on current and emerging coastal resource management issues.	
Course Aims³	This course is intended to give students from various disciplines an opportunity to increase their understanding of current and emerging issues in coastal resource management as well as approaches to management and coastal planning in Australia and the region. This course was also developed to meet job market needs in coastal resource management.	
Student Learning Outcomes⁴	<p>At the successful completion of this course, students should be able to:</p> <ol style="list-style-type: none"> 1. Understand processes that affect coastal degradation, including human impacts on coastal areas 2. Understand and apply coastal policy, frameworks, and commonly used approaches to coastal resource management 3. Discuss the broad and emerging issues that relate to coastal resource management 4. Understand the roles of geography, environmental science, social science and engineering in coastal resource management 5. Understand and apply interdisciplinary approaches to coastal resource management <p>On successful completion of this course, you will have developed skills in:</p> <ul style="list-style-type: none"> - professional report production - project planning and management - data collection, interpretation and analyses (depending on assessment choices) - delivery and communication of findings - stakeholder engagement - reviewing policy, reports and management strategies - formulating management strategies 	
Graduate Attributes Developed in this Course⁵		
Science Graduate Attributes⁵	Select the level of FOCUS <i>0 = NO FOCUS</i> <i>1 = MINIMAL</i> <i>2 = MINOR</i> <i>3 = MAJOR</i>	Activities / Assessment
Research, inquiry and analytical thinking abilities	3	Activities: written report, real-life type investigative project Assessment: written reports
Capability and motivation for intellectual development	2	Activities: written report, field trips, real-life type investigative project Assessment: written reports, class participation
Ethical, social and professional understanding	1	Activities: written report, field trips, real-life type investigative project, case studies, round table role-play Assessment: written reports, class participation
Communication	2	Activities: written report, real-life type investigative project, case studies, round table role-play Assessment: written reports, class participation
Teamwork, collaborative and management skills	3	Activities: written report, real-life type investigative project, case studies, round table role-play Assessment: class participation
Information literacy	3	Activities: written report, real-life type investigative project, case studies, round table role-play

⁴ [Learning and Teaching Unit: Learning Outcomes](#)

⁵ Contextualised Science Graduate Attributes: <http://www.science.unsw.edu.au/our-faculty/science-graduate-attributes>

		Assessment: written reports
Major Topics (Syllabus Outline)	The major topics that this course will cover include some of the most well-known and emerging coastal issues, threats and pressures in Australia and the region such as soil and water acidification, the commercial fishing industry, shrimp farming, 'natural' disasters and climate change. This course will also examine coastal policy in Australia, the issues surrounding marine parks and the challenges associated with managing the Australian coast.	
Relationship to Other Courses within the Program	Coastal Resource Management follows on from Environmental Impact Assessment where there was a strong vocational emphasis. Likewise, the material in Coastal Resource Management is also directed towards improving professional skills and will enable students to understand how government agencies, industry and the community participate in coastal resource assessment, planning and management.	

4. Rationale and Strategies Underpinning the Course

Teaching Strategies	The material in this course is taught through a mixture of lectures, tutorials, field classes (most likely videos because of the pandemic) and participation in a round table discussion. This mixture of teaching methodologies will be employed to ensure that there are various avenues for students to interact, communicate and learn at various levels of the course. Given the current COVID-19 situation, and the inability to conduct face-to-face teaching, you are encouraged to contact Jes if you need guidance or any assistance.
Rationale for learning and teaching in this course^{6,7}	The lecture content for this course is designed to enable students to critically study and understand current and emerging issues in coastal resource management. The majority of the course will be taught with a geographical perspective in mind. By providing different geographical perspectives and approaches it is hoped that students will develop a greater understanding of the connections between coastal physical processes and human dimensions to coastal protection and management. This course will draw on case studies in both Australia and in the Asia Pacific region to provide students with an additional level of understanding of such relationships and connections.

⁶[Reflecting on your teaching](#)

5. Course Schedule

Some of this information is available on the [Online Handbook](#)⁷ and the [UNSW Timetable](#)⁸.

Week	Lecture topics	Lecturer	Tutorial class	Assignment (see also 'Assessment Tasks & Feedback' for submission dates)
Week 1 13 Sept	Introduction- course overview and Estuary classification	<i>Jes</i>	No tutorial	VERY BRIEF report for SWOT analysis submitted for assessment (10%)
Week 2 20 Sept	Dune and beach management	<i>Jes</i>	SWOT analysis	La Perouse briefing note (15%)
Week 3 27 Sept	CASE STUDY: Acid sulfate soils	<i>Jes</i>	La Perouse field trip – likely to be offered as a video due to COVID; Video will be available regardless.	
Week 4 4 Oct	Costal resource conflicts, management, ideology and the role of science and government Q&A session	<i>Jes</i>	No tutorial Jes will be online in the tutorial class time to answer questions or for any consultations	Preparation for Round Table (15%)
Week 5 11 Oct	Aquaculture case studies (shrimp, oyster and fish farming)	<i>Jes & Dr Angela Liu</i>	Environmental round table	Round table participation (10%)
Week 6 18 Oct	FLEXI WEEK - NO LECTURES			
Week 7 25 Oct	Marine parks, policy and science	<i>Dr Damon Bolton</i>	No tutorial	Project proposal submitted – PART A MAJOR PROJECT (20%)
Week 8 1 Nov	Coastal vegetation communities & wetlands	<i>Jes</i>	Randwick Environment Park field trip – Likely to be offered as a video Jes will be online in the tutorial class time to answer questions or for any consultations	
Week 9 8 Nov	Paradigms of management	<i>Jes</i>	No tutorial	
Week 10 15 Nov	Strengthening fisheries governance: what it entails and the role of science Course review and career advice	<i>Dr Irna Sari</i> Sustainable Fisheries Advisor, SEA Project, Indonesia <i>Jes</i>	Final project presentations in tutorial class	Final project submitted – PART B MAJOR ASSIGNMENT (30% including project & presentation grade) Presentations in class

⁷ UNSW Virtual Handbook: <http://www.handbook.unsw.edu.au>

⁸ UNSW Timetable: <http://www.timetable.unsw.edu.au/>

6. Assessment Tasks and Feedback

Task	Knowledge & abilities assessed	Assessment Criteria	% of total mark	Date of		Feedback		
				Release	Submission	WHO	WHEN	HOW
Week 1 report and Week 2 Tutorial class SWOT Analysis	Knowledge of SWOT analysis and its application to a coastal industry	Demonstrated understanding of SWOT analyses, appropriate application of the technique to a coastal industry.	10% for report	Week 1	Week 1 Friday 17 th September - online	Angela & Jes	End of Week 2	Online feedback via Turn-it-in
Briefing note - La Perouse field trip	Knowledge of significant environmental heritage of La Perouse, ability to prepare a briefing note	Briefing notes are assessed on structure, research effort, accuracy of information, clear and concise written expression.	15%	Week 1	Week 2 Friday 24 th September - online	Angela & Jes	Week 3	Online feedback via Turn-it-in
Tutorial class Environmental Round Table + briefing note	Knowledge of issue under discussion, ability to present a viewpoint for discussion, ability to engage with other stakeholders. Ability to coordinate with group partner and prepare for discussion using wiki page.	Working in groups and coordinating preparation. Participation in discussion, willingness to engage with other stakeholders	25% (15% for report and 10% for participation)	Groups will be formed in the Week 2 tutorial classes	Week 4 Friday 8 th October – briefing note; online Week 5 tutorial class participation.	Angela & Jes	Week 7	Grade will be made available online
Major project Part A: Project proposal	Knowledge of coastal resource management issue, ability to research and summarise information, ability to meet project deadlines.	Assignments will be assessed upon research effort, accuracy of information, clear and concise written expression.	20%	Week 1	Week 7 Tuesday - 26 th October - online	Angela & Jes	Early Week 9	Online feedback via Turn-it-in
Major project Part B: Final project	Knowledge of a coastal resource management issue, ability to prepare a management plan or a communication document,	Assignments will be assessed upon clear articulation of management issues, accuracy of science	30%	Week 1	Week 10 - Friday 19 th November – online	Angela & Jes	End of Week 11	Online feedback via Turn-it-in

	ability to meet project deadlines, ability to apply knowledge in a real-world scenario, ability to respond to constructive feedback.	content, identification of appropriate management/communication strategies, clear description of management actions/effective creative use of communication tool							THERE IS NO EXAM – Yippee!

7. Additional Resources and Support

Text Books	<p>There is no set text for this course. However, the following book may be useful: Harvey, N. and Caton, B. (2010) <i>Coastal Management in Australia</i>. Oxford University Press, South Melbourne. Available online as a free e-book, there is a link on the Moodle course page.</p> <p>A text that students find useful for completing geography assignments is: Hay, I. (1996) <i>Communicating in Geography and the Environmental Sciences</i>, Oxford University Press, Melbourne.</p>
Course Manual	<p>The lecture content is available on the UNSW Moodle course pages. Students enrolled in GEOS 3921 will automatically have access to the Moodle resources for this course. Links to relevant readings and journals have been provided. Additional readings will be recommended throughout the course.</p>
Required Readings	<p>Literature search skills are a necessary job requirement and you are encouraged to hone your skills. Third year students should have sufficient experience to efficiently seek out supporting references. It is your responsibility to conduct literature searches in advance of the tutorial classes. However, a list of recommended readings and internet sites is provided in the lectures and on the Moodle course pages.</p>
Additional Readings	See above
Recommended Internet Sites	<p>NSW Planning, Industry & Development (coastal management) - https://www.planning.nsw.gov.au/policy-and-legislation/coastal-management</p>

8. Required Equipment, Training and Enabling Skills

Equipment Required	Nil
Enabling Skills Training Required to Complete this Course	Nil

9. Course Evaluation and Development

Student feedback is gathered periodically by various means. Such feedback is considered carefully with a view to acting on it constructively wherever possible. This course outline conveys how feedback has helped to shape and develop this course.

Mechanisms of Review	Last Review Date	Comments or Changes Resulting from Reviews
Major Course Review	2017	<p>An exam is no longer held in this course to reduce student workload and enable students to focus on assessment skills that are more related to skill development.</p> <p>A second fieldtrip was added in 2011 in response to student feedback</p>
	Student feedback	<p>Alumni commonly report that this course, along with EIA, helped them to secure their first career-related jobs. Past students have been employed by consultancies, government agencies, non-government agencies and overseas development agencies.</p> <p>Quotes from past students:</p> <p>“My employer said I got the job because at the interview I had a good understanding of resource management from different stakeholder perspectives. They were impressed when I talked about De Jure and De facto management. I think it gave me the edge over the other applicants.”</p> <p>“My supervisor asked me to do a SWOT Analysis. I surprised her when I got it done quicker than she expected.”</p> <p>“The communicating science assignment was part of my job application portfolio and it really impressed the interview panel when I showed it to them. They asked if I did a double degree that included design!”</p> <p>“My communicating science assignment was published by Council and it got sponsored.”</p> <p>“I liked the course so much that I am going to take a break from Environmental Law and do development work overseas.” (and they did)</p> <p>“Hey, I am working as an Environmental Education Officer and loving it. CRM was a great primer for the job.”</p> <p>“It matters a lot that the lecturer cares about our career planning. I found my path through CRM. I learned a lot about the “people” part of resource management after years learning about environmental processes. I don’t have to be a lab rat to stay in the science space.”</p> <p>“I’ve been working on acid sulfate soil management for the Council and helped to amend their LEP. I still use my CRM class notes ☺ ”</p> <p>“The course inspired me to do a Masters Degree in development work. I scored a year’s assignment in Indonesia working with an NGO and I am going to then enroll in the postgraduate degree.”</p> <p>“I can’t walk past a fish shop now without stopping to see what they sell, where it came from, whether the prawns look fresh and if the shop is incorrectly labeling fish! Thanks Jes...you ruined my appetite for prawns!”</p> <p>“Until I did this course, I wasn’t really sure what I was going to do with my degree. By the end of the course I felt a lot more confident on where I could get a job and the kind of job I wanted.”</p> <p>“Jes was a great help during and after the course. I didn’t worry about the “experience in” wording of the job advert after CRM. I HAD EXPERIENCE because of the course and EIA</p>

	<p>too. I got a job quickly using CRM and EIA to make my pitch. I also used my major project and briefing notes as examples of what I can do.”</p> <p>“I wrote a successful grant application. Woo hoo! The ACIAR template you gave me for the assignment was such a big help.”</p> <p>“Thanks! I’m seeing through the career planning fog after this course. Heel clicks – coastal management, here I come!”</p> <p>“I got involved in a local fish kill investigation. I used what I learnt to get them to change how they were going to assess the fish kill. They would have blamed it on something else if I hadn’t told them what they should consider.”</p>
--	--

10. Administration Matters

Expectations of Students	<p>Students must attend eighty percent of their classes. If you miss a tutorial class or lecture, you must advise Jes before class. Attending less than 80% may result in penalty to final course marks at 1% for every percent under the required 80%.</p> <p>Students usually must attend two compulsory field trips during this course. However, given the COVID-19 situation, it is likely that the field trips will be virtual (offered as video). You will be expected to watch the videos – Jes will be checking online.</p> <p>Plagiarism or cheating will not be tolerated. You must read UNSW policy on plagiarism.</p> <p>Students must be come prepared to tutorials.</p> <p>Acceptable Use of UNSW Information and Communication Technology Resources https://my.unsw.edu.au/student/resources/ComputingCommunicationRule.html</p> <p>Unless it is a requisite component of a course of study and has the approval of the relevant lecturer or supervisor, UNSW facilities are not to be used for:</p> <ul style="list-style-type: none"> - the deliberate or negligent preparing, storing, displaying of racist, pornographic or other offensive material, - the deliberate receiving or transmitting of racist, pornographic or other offensive material. <p>UNSW facilities are not to be used to harass any person (whether within or outside the University) or interfere with their work. Examples of breaches to this rule could include the sending of obscene, abusive, fraudulent, threatening or repetitive messages, as well as unsolicited non-University work-related e-mail.</p>
Assignment Submissions	<p>All assignments for this course are submitted using Turn-it-in on the Moodle course page. Your work will not be assessed until the electronic version is received. You are expected to make a back-up copy of everything you hand-in.</p> <p>Late work will be penalised by 10% of the value of the assignment per day unless an extension is provided for valid reasons that are supported (e.g. via a medical certificate). After 7 late days the work will be given a value of 0%. This is School policy.</p>

Occupational Health and Safety¹²	<p>The following links provide information on relevant Occupational Health and Safety policies and expectations at UNSW http://www.ohs.unsw.edu.au/hs_riskmanagement/index.html, and in the school of BEES http://safety.unsw.edu.au/ A detailed safety briefing will take place before the class field trip.</p>		
Assessment Procedures UNSW Assessment Policy¹³	<p>Student achievement in this course is assessed by assignment submission and class participation/attendance. ALL assessment must be completed and an overall combined grade of 50% must be achieved to pass this course.</p> <p>There is no final exam for this course.</p> <p>Students may apply for special consideration when they have been affected by illness, follow the procedure at the website below; https://student.unsw.edu.au/special-consideration</p> <p>Please do not ask course staff for an extension – you must formally apply for special consideration.</p>		
Equity and Diversity	<p>Those students who have a disability that requires some adjustment in their teaching or learning environment are encouraged to discuss their study needs with the course Convenor prior to, or at the commencement of, their course, or with the Equity Officer (Disability) in the Equity and Diversity Unit (9385 4734 or http://www.studentequity.unsw.edu.au/).</p> <p>Issues to be discussed may include access to materials, signers or note-takers, the provision of services and additional exam and assessment arrangements. Early notification is essential to enable any necessary adjustments to be made.</p>		
Student Complaint Procedure¹⁴	School Contact	Faculty Contact	University Contact
	<p>In the first instance, you should raise issues with your lecturers and tutor. Most issues can be resolved quickly if you make staff aware.</p> <p>A/Prof Scott Mooney is the School's Grievance Officer. https://www.bees.unsw.edu.au/scott-mooney</p>	<p>A/Prof Julian Cox Associate Dean (Education) julian.cox@unsw.edu.au Tel: 9385 8574</p> <p>Or</p> <p>Dr Gavin Edwards Associate Dean (Undergraduate Programs) g.edwards@unsw.edu.au Tel: 9385 8063</p>	<p>Student Conduct and Appeals Officer (SCAO) within the Office of the Pro-Vice-Chancellor (Students) and Registrar.</p> <p>email studentcomplaints@unsw.edu.au</p> <p>University Counselling and Psychological Services¹⁵</p>

11. UNSW Academic Honesty and Plagiarism

PLEASE READ THIS SECTION BEFORE YOU COMMENCE ANY ASSIGNMENTS

What is Plagiarism?

Plagiarism is the presentation of the thoughts or work of another as one's own.

*Examples include:

- direct duplication of the thoughts or work of another, including by copying material, ideas or concepts from a book, article, report or other written document (whether published or unpublished), composition, artwork, design, drawing, circuitry, computer program or software, web site, Internet, other electronic resource, or another person's assignment without appropriate acknowledgement;
- paraphrasing another person's work with very minor changes keeping the meaning, form and/or progression of ideas of the original;
- piecing together sections of the work of others into a new whole;
- presenting an assessment item as independent work when it has been produced in whole or part in collusion with other people, for example, another student or a tutor; and
- claiming credit for a proportion a work contributed to a group assessment item that is greater than that actually contributed.†

For the purposes of this policy, submitting an assessment item that has already been submitted for academic credit elsewhere may be considered plagiarism.

Knowingly permitting your work to be copied by another student may also be considered to be plagiarism.

Note that an assessment item produced in oral, not written, form, or involving live presentation, may similarly contain plagiarised material.

The inclusion of the thoughts or work of another with attribution appropriate to the academic discipline does *not* amount to plagiarism.

The Learning Centre website is main repository for resources for staff and students on plagiarism and academic honesty. These resources can be located via:

<http://www.student.unsw.edu.au/plagiarism>

The Learning Centre also provides substantial educational written materials, workshops, and tutorials to aid students, for example, in:

- correct referencing practices;
- paraphrasing, summarising, essay writing, and time management;
- appropriate use of, and attribution for, a range of materials including text, images, formulae and concepts.

Individual assistance is available on request from The Learning Centre.

Students are also reminded that careful time management is an important part of study and one of the identified causes of plagiarism is poor time management. Students should allow sufficient time for research, drafting, and the proper referencing of sources in preparing all assessment items.

* Based on that proposed to the University of Newcastle by the St James Ethics Centre. Used with kind permission from the University of Newcastle

† Adapted with kind permission from the University of Melbourne
