

Course Outline

PSYC7423

Assessment in Forensic Psychology

School of Psychology

Faculty of Science

T1, 2022

Last updated 28.01.2022

1. Staff

Position	Name	Email	Consultation times and locations	Contact Details
Course Convenor	Amanda White	Amanda.j.white@unsw.edu.au	By Appointment	Email
Lecturer	Amanda White	Amanda.j.white@unsw.edu.au	By Appointment	Email

2. Course information

Units of credit:	6
Pre-requisite(s):	Enrolled Master of Psychology (Forensic) or Combined PhD/Master of Psychology (Forensic) student
Teaching times and locations:	Postgraduate Timetable; Tuesdays 10-1pm, MAT312

2.1 Course summary

This course teaches students about standardised tests and procedures used by psychologists to evaluate intellectual, cognitive and adaptive functioning, as well as psychological tests used to evaluate general psychological functioning. Emphasis will be placed on tests typically used by forensic psychologists in forensic contexts.

2.2 Course aims

This course teaches students how to use, administer and interpret the principles and techniques of standardised psychological assessment and how and when this can be applied, with specific reference to the forensic context. Students will be taught the skills to use, administer and interpret major psychological tests, including the Wechsler scales, and overview other tests that forensic psychologists will require in their work. The course will also address how to communicate assessment findings in report writing.

2.3 Course learning outcomes (CLO)

At the successful completion of this course the student should be able to:

1. Demonstrate understanding about the psychometric principles and theories underlying standardised psychological testing methodology.
2. Apply knowledge of psychological testing in order to evaluate the utility of individual tests and their use in the forensic context at an individual and group level
3. Demonstrate skills in the administration and scoring of Wechsler Scales and other cognitive and psychological tests.
4. Demonstrate understanding of the limitations of psychological test measurement and how this is integrated in the context of a broader forensic assessment
5. Interpret the validity of test results and individual test profiles

6. Communicate effectively and accurately in a written report the results of tests scores for forensic audience.

2.4 Relationship between course and program learning outcomes and assessments

CLO	Program Learning Outcomes								Assessment
	1. Knowledge of the Discipline	2. Ethical, legal & professional matters	3. Assessment & Measurement	4. Intervention Strategies	5. Research & evaluation	6. Communication & Interpersonal Relationships	7. Working Cross Culturally	8. Practice Across the Lifespan	
1.	Lectures, practicals, placements		Lectures, practicals, placements		Lectures, practicals, placements		Lectures, practicals, placements	Lectures, practicals, placements	1, 2, 3
2.	Lectures, practicals, placements	Lectures, practicals, placements	Lectures, practicals, placements		Lectures, practicals, placements		Lectures, practicals, placements	Lectures, practicals, placements	2,3
3.	Lectures, practicals, placements		Lectures, practicals, placements			Lectures, practicals, placements			1,2
4.	Lectures, practicals, placements		Lectures, practicals, placements				Lectures, practicals, placements	Lectures, practicals, placements	2,3
5.	Lectures, practicals, placements		Lectures, practicals, placements			Lectures, practicals, placements		Lectures, practicals, placements	1,2,3
6.	Lectures, practicals, placements		Lectures, practicals, placements			Lectures, practicals, placements			2,3

3. Strategies and approaches to learning

3.1 Learning and teaching activities

Working with the Scientist-Practitioner model, a sound understanding of psychological testing including underlying frameworks, theories and development and the utilisation of such tests is essential to a practicing forensic psychologist. The course will focus on issues and considerations that are common to practicing forensic psychologists.

Presented through lectures and tutorials with an emphasis on practical learning to ensure students develop sound assessment skills. Specific skills in test and assessment procedures will be taught in practical sessions. Assessments will focus on evaluating test administration, interpretation and communication of results to enhance learning via lecture and tutorials.

Students are encouraged to work both independently and in small groups to practice and master test administration and learn about interpretation. The course hours will be enhanced by students utilising time in the Test Library to familiarise themselves with the vast number of tests available for psychologists.

3.2 Expectations of students

It is expected that students are aware of UNSW Assessment policy and understand how to apply for special consideration if they are unable to complete an assignment/exam due to illness and/or misadventure.

It is expected that students have read through the [School of Psychology Student Guide](#), including the statement on Inherent Requirements of the program, and the Master of Psychology (Forensic) Program Guide available on the School website <https://www.psy.unsw.edu.au/current-students/postgraduate-coursework/master-psychology-forensic>.

Students registered with Equitable Learning Services must contact the Course Convenor immediately if they intend to request any special arrangements for later in the course, or if any special arrangements need to be made regarding access to the course material. Letters of support must be emailed to the Course Convenor as soon as they are made available.

Students must attend 80% of lectures and workshops to ensure they are consistently working towards achieving the professional graduate competencies for specialised areas of practice required by the APAC Accreditation Standards. These Accreditation Standards are incorporated in Program and Course Learning Outcomes. Any absence must be accompanied by a medical certificate or other reason for absence. Additional self-study material may be assigned by the Course Convenor to ensure that the trainee has covered any material missed as a result of being absent from workshops or meetings.

Information on any course changes will be made available either on Moodle and/or by email. It is the student's responsibility to check for changes.

4. Course schedule and structure

This course consists of approximately 33 hours of seminars. Students are expected to take an additional 70 hours of self-determined study to complete assignments, assessments, and readings.

Week	Lecture Topic/s	Tutorial Activity	Related CLO
Week 1	Introduction to Forensic Assessment *	Wechsler tests WAIS-IV	1,2,3,4
Week 2	Wechsler Scales and Intelligence testing- WAIS-IV	Wechsler tests WAIS-IV	1,2,3,5
Week 3	WAIS-IV Scoring and Interpretation	Wechsler tests WAIS-IV	1,2,3,5
Week 4	WAIS/WMS	Wechsler Tests WAIS-IV	1,2,3, 5
Week 5	Wechsler testing	Wechsler tests WMS-IV	2,3,4,5
Week 6	Psychometric interpretation	Wechsler tests WMS-IV	4,5,6
Week 7	Cognitive and Adaptive Testing*	Wechsler tests (WMS-IV & WAIS-IV) & Adaptive Functioning Tests	2,3,4,5
Week 8	Performance and Symptom Validity Testing*	Psychological tests	3,4,5
Week 9	Psychological Tests within a Forensic Battery	Psychological tests	1,2,3,4, 5
Week 10	Psychological Tests within a Forensic Battery	Psychological tests	1,2,3,4, 5

Week 11	Communicating results/Additional considerations in Assessment	Psychological tests	1,2,3,4, 5,6
----------------	---	---------------------	-----------------

* Denotes 'Flipped classroom'

5. Assessment

5.1 Assessment tasks

All assessments in this course have been designed and implemented in accordance with UNSW Assessment Policy.

Assessment task	Length	Weight	Mark	Due date
Summative Assessments				
Assessment 1: Test administration vivas	2 hours	Pass/Fail	N/A	End of Week 8
Assessment 2: Wechsler report	Varied	40%	/100	End of Week 9
Assessment 3: Test battery*	2,500 words	40%	/100	End of Week 12
Compulsory Activities				
Class participation (especially within flipped classroom context)		20%	/100	Weeks 1-11

Assessment 1: All students need to meet the criterion of complete competency in test administration. This will be assessed individually. Students must demonstrate mastery of the test. Failure to pass this component will be considered a failure of the course.

Assessment 2: Students will be provided a case study and an unscored Weschler profile. They will in 3 stages, be required to correctly score, interpret and write the 'test results' area of a cognitive report.

Assessment 3: Students will be provided a case study and required to identify a reasonable and valid set of tests that will efficiently and effectively answer a specific referral question.

Compulsory Activities: consistent class participation is expected, which means that pre-class readings and preparation for discussions are necessary.

UNSW grading system: <https://student.unsw.edu.au/grades>

UNSW assessment policy: <https://student.unsw.edu.au/assessment>

5.2 Assessment criteria and standards

Further details and marking criteria for each assessment will be provided to students closer to the assessment release date (see 4.1: UNSW Assessment Design Procedure).

5.3 Submission of assessment tasks

Written assessments: In accordance with UNSW Assessment Policy must be submitted online via Turnitin. No paper or emailed copies will be accepted.

Late penalties: deduction of marks for late submissions will be in accordance with School policy (see the [School of Psychology Student Guide](#)).

Special Consideration: Students who are unable to complete an assessment task by the assigned due date can apply for special consideration. Students should also note that UNSW has a Fit to Sit/Submit rule for all assessments. If a student wishes to submit an application for special consideration for an exam or assessment, the application must be submitted prior to the start of the exam or before an assessment is submitted. If a student sits the exam/submits an assignment, they are declaring themselves well enough to do so and are unable to subsequently apply for special consideration. If a student becomes ill on the day of the exam, they must provide evidence dated within 24 hours of the exam, with their application.

Special consideration applications must be submitted to the online portal along with Third Party supporting documentation. Students who have experienced significant illness or misadventure during the assessment period may be eligible. Only circumstances deemed to be outside of the student's control are eligible for special consideration. Except in unusual circumstances, the duration of circumstances impacting academic work must be more than 3 consecutive days, or a total of 5 days within the teaching period. If the special consideration application is approved, students may be given an extended due date, or an alternative assessment/supplementary examination may be set. For more information see <https://student.unsw.edu.au/special-consideration>.

Alternative assessments: will be subject to approval and implemented in accordance with UNSW Assessment Implementation Procedure.

5.4. Feedback on assessment

Feedback on all pieces of assessment in this course will be provided in accordance with UNSW Assessment Policy.

Assessment	When	Who	Where	How
Assessment 1: Test administration vivas	Immediate	Lecturer	In person	Verbally
Assessment 2: Weschler marking WAIS-IV	Week 5 (<u>one week later than due date</u>)	Lecturer	In class	Written and verbally
Assessment 2: Weschler marking WMS-IV	Week 7 (<u>one week later</u>)	Lecturer	In class	Written and verbally
Assessment 2: Weschler report	Week 10 (<u>one week later</u>)	Lecturer	In class	Written
Assessment 3: Test battery	Exam Period	Lecturer	By email	Written

6. Academic integrity, referencing and plagiarism

The APA referencing style is to be adopted in this course. Students should consult the most recent edition of the publication manual itself (rather than third party interpretations of it) in order to properly adhere to APA style conventions. Students do not need to purchase a copy of the manual, it is available in the library or online. This resource is used by assessment markers and should be the only resource used by students to ensure they adopt this style appropriately.

Referencing is a way of acknowledging the sources of information that you use to research your assignments. You need to provide a reference whenever you draw on someone else's words, ideas or research. Not referencing other people's work can constitute plagiarism.

Further information about referencing styles can be located at <https://student.unsw.edu.au/referencing>

Academic integrity is fundamental to success at university. Academic integrity can be defined as a commitment to six fundamental values in academic pursuits: honesty, trust, fairness, respect, responsibility and courage.¹ At UNSW, this means that your work must be your own, and others' ideas should be appropriately acknowledged. If you don't follow these rules, plagiarism may be detected in your work.

Further information about academic integrity and **plagiarism** can be located at:

- The *Current Students* site <https://student.unsw.edu.au/plagiarism>, and
- The *ELISE* training site <http://subjectguides.library.unsw.edu.au/elise>

The *Conduct and Integrity Unit* provides further resources to assist you to understand your conduct obligations as a student: <https://student.unsw.edu.au/conduct>.

7. Readings and resources

Textbook	Subsections of the following text will be prescribed in various weeks: Goldstein, G., Allen, D., & DeLuca, J. (Ed.). (2019). <i>Handbook of psychological assessment</i> (4 th ed.). London, UK: Academic Press. This resource is available electronically from the library.
Course information	Available on Moodle
Required readings	Must have read APS Code of Ethics and Ethical guidelines APS Ethical Guidelines for Psychological Assessment and the use of Psychological Tests School of Psychology Student Guide Master of Psychology (Forensic) Program Guide <u>All flipped classroom and reading materials will be made available in Moodle.</u>

¹ International Center for Academic Integrity, 'The Fundamental Values of Academic Integrity', T. Fishman (ed), Clemson University, 2013.

8. Administrative matters

The [School of Psychology Student Guide](#) contains School policies and procedures relevant for all students enrolled in undergraduate or Masters psychology courses, such as:

- Attendance requirements
- Assignment submissions and returns

- Assessments
- Special consideration
- Student code of conduct
- Student complaints and grievances
- Equitable Learning Services
- Health and safety

It is expected that students familiarise themselves with the information contained in this guide.

9. Additional support for students
