Course Details & Outcomes

Course Description

This course will introduce students to some of the major theoretical and empirical work in Health
Psychology. Its primary focus will be on the promotion and maintenance of health-related behaviour and the prevention of illness. The course will begin with a brief overview of the history of the field of health psychology, as well as basic models of health behaviour. The course will then cover health promotion strategies and methods (for example, improving diet-related behaviour and attitudes, initiating and maintaining exercise programs), as well as living with and managing symptoms and illness. The course content will be delivered through a combination of face-to-face lectures, tutorials, and online activities.

Course Aims

The aim of this course is to provide students with a better understanding of some of the primary influences on the emergence of health psychology, knowledge relating to some of the core topics in the area of health psychology and, in particular, further your understanding of the scientific relationships between behavioural principles and physical wellbeing. The course also aims to provide students with the knowledge that will enable them to critically evaluate the usefulness of psychological theory and research findings for understanding illness and enhancing health.

### Learning and Teaching Technologies

**Moodle - Learning Management System**

### Additional Course Information

**Psychology Student Guide:** The [School of Psychology Student Guide](#) contains School policies and procedures relevant for all students enrolled in undergraduate or Masters psychology courses, such as:

- Attendance requirements
- Assignment submissions and returns
- Assessments
- Special consideration
- Student code of conduct
- Student complaints and grievances
- Equitable Learning Services
- Health and safety

It is expected that students familiarise themselves with the information contained in this guide

Assessment Details

Major project

Assessment Overview

You will take part in a “learning in action” project. This project will give you the opportunity to apply some of the concepts learned in class and, at the same time, think about how health psychology can make a difference to the health and well-being of people in the community. You will work in groups to design the project starting in week 1 tutorials. In week 3, you and your group will “pitch” your project idea in tutorial and will receive feedback from your tutor and your peers. In the second half of the term, you and your group will give a 10-minute presentation of your project to the class in tutorial (10%). You will receive feedback on your presentation from teaching staff and your peers. You will also (individually) write a report on the project (25%). Your report should not exceed 2,000 words, and must be submitted electronically in week 10. You will receive written feedback on your report from your tutor within 10 working days of submission.

Assessment Length

Presentations are 10 minutes; papers are no more than 2,000 words

Assignment submission Turnitin type

This assignment is submitted through Turnitin and students can see Turnitin similarity reports.

Mid-term test

Assessment Overview

In week 5, a 50 minute test will be given to gauge your understanding and application of concepts covered in the course to that point. This test will cover all lecture material from weeks 1-4, all relevant readings, and tutorials through week 4. The test will consist of multiple choice and short answer questions. Marks will be released within 10 working days. Feedback is available through inquiry with the course convener.

Assessment Length

50 minutes

Assignment submission Turnitin type

Not Applicable

Final exam

Assessment Overview

There will be a 2-hour examination held during the University examination period in order to gauge your understanding and application of concepts covered throughout the course. You should not organise travel during this period until the final examination schedule has been released and the date of the exam is known. The examination will include both multiple choice
and short answer questions. Feedback is available through inquiry with the course convenor.

Assessment Length

2 hours

Assignment submission Turnitin type

Not Applicable

General Assessment Information

Special Consideration: Students who experience circumstances outside of their control that prevent them from completing an assessment task by the assigned due date due can apply for Special Consideration. Special Consideration applications should include a medical certificate or other documentation and be submitted via myUNSW within 3 days of the sitting/due date.

Important note: UNSW has a “fit to sit/submit” rule, which means that if you sit an exam or submit a piece of assessment, you are declaring yourself fit to do so and cannot later apply for Special Consideration. This is to ensure that if you feel unwell or are faced with significant circumstances beyond your control that affect your ability to study, you do not sit an examination or submit an assessment that does not reflect your best performance. Instead, you should apply for Special Consideration as soon as you realise you are not well enough or are otherwise unable to sit or submit an assessment.

Once your application has been assessed, you will be contacted via your student email address and advised of the official outcome. If the special consideration application is approved, you may be given an extended due date, or an alternative assessment/supplementary examination may be set. For more information about special consideration, please visit: https://student.unsw.edu.au/special-consideration.

Alternative assessments: will be subject to approval and implemented in accordance with UNSW Assessment Implementation Procedure and Psychology Student Guide.

Supplementary examinations: will be made available for students with approved special consideration application and implemented in accordance with UNSW Assessment Policy and Psychology Student Guide.

All course assessments have been designed and implemented in accordance with UNSW Assessment Policy.

The APA (7th edition) referencing style is to be adopted in this course. Students should consult the publication manual itself (rather than third party interpretations of it) in order to properly adhere to APA style conventions. Students do not need to purchase a copy of the manual, it is available in the library or online. This resource is used by assessment markers and should be the only resource used by students to ensure they adopt this style appropriately.

Grading Basis

Standard
Requirements to pass course
Total grade of at least 50%.

**Attendance Requirements**

Students are strongly encouraged to attend all classes and review lecture recordings.
General Schedule Information

Each week this course typically consists of 2 hours of lecture material, 2 hours of face-to-face tutorials, and up to 1 hour of online modules. Students are expected to take an additional 5 hours each week of self-determined study to complete assessments, readings, and exam preparation.

Other Useful Information

Academic Information

Upon your enrolment at UNSW, you share responsibility with us for maintaining a safe, harmonious and tolerant University environment.

You are required to:
• Comply with the University’s conditions of enrolment.
• Act responsibly, ethically, safely and with integrity.
• Observe standards of equity and respect in dealing with every member of the UNSW community.
• Engage in lawful behaviour.
• Use and care for University resources in a responsible and appropriate manner.
• Maintain the University's reputation and good standing.

For more information, visit the UNSW Student Code of Conduct Website.

Academic Honesty and Plagiarism

Referencing is a way of acknowledging the sources of information that you use to research your assignments. You need to provide a reference whenever you draw on someone else's words, ideas or research. Not referencing other people's work can constitute plagiarism. Further information about referencing styles can be located at https://student.unsw.edu.au/referencing

Academic integrity is fundamental to success at university. Academic integrity can be defined as a commitment to six fundamental values in academic pursuits: honesty, trust, fairness, respect, responsibility and courage. At UNSW, this means that your work must be your own, and others' ideas should be appropriately acknowledged. If you don't follow these rules, plagiarism may be detected in your work. Further information about academic integrity, plagiarism and the use of AI in assessments can be located at:

• The Current Students site,
• The ELISE training site, and
• The Use of AI for assessments site.

The Student Conduct and Integrity Unit provides further resources to assist you to understand your conduct obligations as a student: https://student.unsw.edu.au/conduct

Submission of Assessment Tasks

Penalty for Late Submissions
UNSW has a standard late submission penalty of:

• 5% per day,
• for all assessments where a penalty applies,
• capped at five days (120 hours) from the assessment deadline, after which a student cannot submit an assessment, and
• no permitted variation.

Any variations to the above will be explicitly stated in the Course Outline for a given course or assessment task.

Students are expected to manage their time to meet deadlines and to request extensions as early as possible before the deadline.

Special Consideration
If circumstances prevent you from attending/completing an assessment task, you must officially
apply for special consideration, usually within 3 days of the sitting date/due date. You can apply by logging onto myUNSW and following the link in the My Student Profile Tab. Medical documentation or other documentation explaining your absence must be submitted with your application. Once your application has been assessed, you will be contacted via your student email address to be advised of the official outcome and any actions that need to be taken from there. For more information about special consideration, please visit: https://student.unsw.edu.au/special-consideration

Important note: UNSW has a “fit to sit/submit” rule, which means that if you sit an exam or submit a piece of assessment, you are declaring yourself fit to do so and cannot later apply for Special Consideration. This is to ensure that if you feel unwell or are faced with significant circumstances beyond your control that affect your ability to study, you do not sit an examination or submit an assessment that does not reflect your best performance. Instead, you should apply for Special Consideration as soon as you realise you are not well enough or are otherwise unable to sit or submit an assessment.
