Welcome

Welcome to the School of Psychology! The School attaches the highest priority to the attainment of research excellence and to the advancement of knowledge relevant to psychology as a scientific and professional discipline. Accordingly, it aims to foster an intellectually stimulating learning environment and to ensure that the infrastructure necessary for the serious pursuit of scholarly and research interests is available to its academic staff and students.

Postgraduate students are special beneficiaries of, and vitally important contributors to, the development and maintenance of this distinctive research-based climate and culture. Postgraduate students are strongly encouraged to present their research findings at scientific and professional meetings, to submit their work for review and publication in refereed journals of international stature and, more generally, to see themselves as active participants in the psychological research community. The School's goal is to ensure that, on completion of their degrees, students are capable of carrying out high quality research on questions of genuine significance, and are fully prepared to contribute to the advancement of knowledge within the discipline.

Contacts

Procedural matters and grievances:

Prof Mike Le Pelley
Postgraduate Research Coordinator
Mathews 1003
Email: m.lepelley@unsw.edu.au

Prof Bronwyn Graham
Postgraduate Research Coordinator
Mathews 1302
Email: bgraham@psy.unsw.edu.au

For issues regarding scholarships, induction, the first-year Research Plan, or Confirmation of Candidature, please contact Bronwyn Graham. For issues regarding thesis submission or examination, please contact Mike Le Pelley. For issues regarding ongoing candidature, please contact either Postgraduate Coordinator.

Enrolment:

Samuel Chu
Administrative Officer (Postgraduate Support)
Mathews 1506
Phone: 55753
Email: samuel.chu@unsw.edu.au

Candidature issues or variations:

Candidature Management Officer, Science
Email: science.grs@unsw.edu.au

Desk allocation:

John Bolzan
Senior Technical Officer
Mathews 138
Phone: 53022
Email: jbolzan@unsw.edu.au

Psychology computer account & mailing lists:

Jonathan Solomon

General Administrative Matters:

Linda Camilleri
Project Administrator
Mathews Level 16
Phone: 53034
Email: l.camilleri@unsw.edu.au

HDR Student Support Officer:

Dr Susanne Schweizer
Mathews 906
Email: s.schweizer@unsw.edu.au

School Grievance Officer:

Prof Peter Lovibond
Mathews 914
Email: p.lovibond@unsw.edu.au

Postgraduate Representatives:

Cassandra Ma
Email: cassandra.ma@unsw.edu.au
David Cohen
Email: david.cohen@student.unsw.edu.au

You can find information on University policies and procedures relating to HDR courses at the [Higher Degree Research Hub](#).

Postgraduate Committee

There is a School Postgraduate Committee that consists of the Head of School, and the two Postgraduate Coordinators, Prof Mike Le Pelley and Prof Bronwyn Graham. The function of this Committee is to monitor student progress, respond to specific individual problems, and make decisions about general procedures and policy.

Mentoring program

The School of Psychology offers a mentoring program for its PhD students. The aim of the program is to guide and support PhD students through the challenges of higher degree research and building a research career. The mentors are early and midcareer researchers (EMCRs) in the School who have recently completed their PhD and often have a lot of wisdom to share. The second aim of the program is to provide opportunities for students to build connections with other researchers in the School. As such PhD students are typically matched with a mentor outside their immediate area of research to broaden the student's network.

The format of the mentoring program is loosely structured around a monthly meeting schedule and a peer mentoring manual to guide these meetings. The manual covers key topics of concern for students – including time management, networking, motivation, difficult conversations and career pathways. Ultimately, these meetings are designed to be flexible and student-led. Typically, meetings take place on campus or over a coffee but can also take place remotely over Teams or Zoom. Sometimes a mentor will be paired with more than one student, and so meetings could take place in a group. The mentoring program also hosts Q&A or seminars on topics of interest to HDR students throughout the year.

An open call is made to HDR students and EMCs at the beginning of every academic year to invite new students and mentors to the program and to gauge if existing participants wish to continue in the program. If you have any questions or would like to express your interest in the mentoring program, please contact the program coordinator Belinda Liddell, b.liddell@unsw.edu.au.

HDR Student Support Officer and Postgraduate Representatives

In addition to the mentoring program, the HDR Student Support Officer is available for student support. Students can contact the HDR Student Support Officer with any issues pertaining to their candidature. Importantly, the HDR Student Support Officer is not involved in students' progress assessment. However, before contacting the HDR Student Support Officer, students should make sure the issue isn't best discussed with their supervisor(s) directly, or the Postgraduate Coordinators for candidature-related issues, or the Grievance Officer if they would like to raise a complaint or issue.

The support provided by the HDR Student Support Officer is anonymous and issues raised will be treated confidentially. To schedule a meeting with the HDR Student Support Officer please email Dr Susanne Schweizer at s.schweizer@unsw.edu.au.

The School of Psychology also has two Postgraduate Representatives: HDR students who liaise with academic staff. If you have concerns that you would like to raise with the Postgraduate Coordinators anonymously, you can also do so via the Postgraduate Representatives (contact information is on p2).

Supervision

The relationship that a PhD student forms with their supervisor is one of the most important that they will have, not only during the period of their candidature but also in the years that follow. The quality of the research that is undertaken towards the PhD may well depend in part on the quality of this relationship. The intellectual satisfaction that is gained from the experience of doing this research is likely to be a reflection to some extent of the student-supervisor relationship as well. To be effective, such relationships need to be cultivated by both the supervisor and the student. Good research student supervision is a priority for the academic staff in this School.

As stated in the UNSW [Higher Degree Research Supervision Guidelines](#), it may be helpful to reach an agreement with your supervisor on such things as regularity of meetings (e.g., at least one formal meeting per month), deadlines for written work, the resources available to be used in your research, and any part-time work that you may undertake during your candidature). During any formally scheduled meetings, some students and supervisors find it useful to take notes regarding their committed undertakings prior to the next meeting.

The role of the co-supervisor varies widely from person to person. In some cases, the co-supervisor might provide on-going advice on aspects of the research, while in other cases the co-supervisor might only be involved to the extent of being a formal reviewer of the Research Plan. In the absence of the supervisor for any lengthy period, the co-supervisor might take on a greater involvement during that time.

Duration of candidature

The expected duration of the PhD is 3.5 years and the MSc 2 years. Note that the University may be compelled to withdraw the student's place if the candidature exceeds four years for PhD and three years for MSc. To maintain their enrolment under these circumstances, students may be required to pay full fees.

Seminar attendance

To contribute to your training as researchers, attendance at the following is required for all postgraduate research students. **Note that failure to attend these seminars on a regular basis will result in a suspension of your student research account.**

School Colloquium

These presentations of research by visiting and local scholars are held weekly during session (schedules and venues are announced by email at the start of each session, and a timetable should be available on the 'Research' page of the School of Psychology website). Colloquia are a very important way in which you can learn about research in Psychology, not just in your own area of interest but in a wide range of topics. They are often a useful way to pick up information about aspects of psychology that you would never otherwise come across. In addition, it can be instructive to see how other people go about presenting their research: You can learn much about the "do's and don'ts" of how to communicate to an audience. Finally, the question period is a useful time for you to ask questions of the speaker and you are certainly encouraged to do so. As frightening as it might seem at first, the skill of asking questions is something that is worth developing, and the colloquium is an ideal forum in which to do this.

Postgraduate Student Seminar

A meeting of research students is held each Tuesday during session (meetings are currently held online, starting at 1pm; a schedule will be provided). The main aim of these seminars is to provide a forum for the presentation and discussion of research being conducted by postgraduate students in the School. These seminars are an excellent opportunity for you to find out more about the excellent research being conducted by HDR students in the School, and provide a chance for students to gain experience of presenting their research to a wider audience. Students are expected to give TWO presentations during their candidature (see [Monitoring Progress](#) below).

It is expected that all students will consistently attend the School Colloquium and Postgraduate Student Seminars throughout their candidature. Remedial action may be taken if attendance is not satisfactory. Students are also very much encouraged to attend colloquia even in the later stages of their candidature. These seminars are intended to be interactive: you are strongly encouraged to ask questions of the speaker – both because it is a useful skill for you to develop, but also because it might help the speaker think about aspects of their research in a new way.

Additional course requirements may be specified for some students in order to fill significant gaps in their preparation for postgraduate research in psychology. In most cases these will be determined at the time of admission, but further prescriptions may be indicated by the Postgraduate Committee where necessary. A student whose thesis is in the area of clinical or forensic psychology may be permitted to take relevant Masters courses under certain conditions with the consent of their supervisor, the Postgraduate Committee, and the relevant Masters Committee. Any arrangement of this nature can only be approved, however, if it is clear that it will not significantly hinder the student's rate of progress in their research program.

Monitoring progress

Continued enrolment of all HDR candidates is subject to satisfactory progress being made, as assessed in accordance with University procedures. These requirements are outlined below.

1. Research Integrity Training

All new HDR candidates are required to complete UNSW Research Integrity training during their first year of candidature. You should be automatically enrolled in this course on Moodle. If you have any questions, then either email a Postgraduate Coordinator, or your Candidature Management Officer directly. You can find out more information on this training module [here](#).

2. Thesis Research Plan

All students are required to submit a Research Plan of approximately 4,000 words (**and no more than 4,500 words**) for consideration by the Postgraduate Committee. This Research Plan will be reviewed a panel typically made up of your co-supervisor and one other member of academic staff.

You are expected to submit your Research Plan **by the end of your second term**. If you find you are having difficulties meeting this deadline, make sure that your supervisor and the Postgraduate Coordinator are aware of the problems so that progress can be expedited. It is important that you discuss the content of your Research Plan with your supervisor who will need to approve the final written version before

submission. It may also be useful to consult with your co-supervisor, who will typically be one of the formal reviewers of the Research Plan.

Your Research Plan should be submitted in electronic copy only to Linda Camilleri, copying in one of the Postgraduate Coordinators (Mike Le Pelley).

The Research Plan should contain the following headings and information:

a. Aims, Significance, and Background

This section should clearly state the aims of the research and what significant contribution to knowledge can be expected from it. It should include a brief review of the literature on the theoretical and empirical issues relevant to the proposed research.

b. Research Plan

This section should include: (1) a description of the methods and techniques to be used, (2) an outline of at least one of the proposed experiments/studies, (3) a timeline (at least until the end of the first year) for the completion of activities/experiments, and, if relevant, (4) a brief consideration of any ethical issues raised by the research, and how you propose to deal with them.

The Research Plan should provide sufficient information on the specific issues and methodological details to enable reviewers (who are broadly familiar with the area in which you are working) to evaluate the significance and effectiveness of the studies planned. If you wish (and particularly if explicitly suggested by your supervisor), you may submit a more extensive literature review to the Committee either prior to, or at the same time as, the Research Plan. Although the Committee and panel reviewers would not be required to examine such a document, it may be useful for reviewers to consult if they require more detail on theoretical background etc. Such an extensive review will also, of course, be helpful when you later come to write up your thesis.

Candidates will convene a panel meeting to be held approximately four weeks after the submission of the Research Plan. The panel will consist of the primary supervisor and the two reviewers of the Research Plan. That meeting will provide an opportunity for the candidate to obtain helpful and perhaps critical comments and suggestions from independent sources. At the conclusion of that meeting, the candidate and supervisor will complete a "PhD Research Plan Review Form" outlining issues that were raised in the panel meeting: any major areas of concern, or other suggested improvements that could be made to the plan. The candidate, supervisor, and panel members will sign the form acknowledging its contents. **Any major issues that are noted will need to be addressed before candidature can be confirmed: this will typically require revision of the Research Plan, which should be re-submitted (along with a copy of the preceding PhD Research Plan Review Form) to Linda Camilleri and Mike Le Pelley.**

It will typically take around 6 weeks from the time of submission for this process to be completed (panel meeting scheduled and held; report written; any required revisions made; final Research Plan approved). This is why we request that the Research Plan is submitted by the end of your second term of full-time candidature.

Further information regarding guidelines for the Research Plan can be obtained from your supervisor or the Postgraduate Coordinator, but see also the UNSW [Higher Degree Research Supervision Guidelines](#) for the rationale for progress reviews, and the importance of developing an appreciation of constructive criticism.

3. Oral Presentation of Research Plan

You are required, between your second and fourth term of enrolment, to present a summary of your proposed research at one of the weekly Postgraduate Seminars. This is required so that you may gain experience in preparing and presenting your work before your peers and so that your fellow students are informed about your work. This 'proposal talk' should be around 15-20 mins in duration (and no more than 20 mins).

4. Mid-Candidature Presentation

At some point later in the candidature period (typically between your sixth and eighth term of full-time equivalent enrolment), you will be expected to present a longer and more extensive oral summary of your research at the Postgraduate Seminar. (For Combined students, this presentation is scheduled later in their candidature.) This mid-candidature presentation should be around 45 mins in duration (and no more than 50 mins).

5. Annual Progress Review (APR)

At the end of each year of full-time equivalent enrolment, the University requires every postgraduate research student to complete an APR; this review allows the Postgraduate Committee to assess whether your progress has been satisfactory, and provides you with an opportunity to formally alert the Committee to any problems that you have experienced or delays that have interfered with your progress. During the APR process, you will be asked to itemise your achievements for the year and the milestones aimed for by the next year's review. Your supervisor will also complete a short report on your progress, and will typically accompany you to the Progress Review meeting at which you will discuss your progress with a Review Panel. The APR will then be evaluated by the Postgraduate Committee to confirm whether progress has been satisfactory or not. If progress is not considered satisfactory, steps will be taken to try to get the project back on track. This may include suspension of part-time teaching and/or research assistance, and a break from coursework if in the Combined PhD/MPsychol program. Note that if the Postgraduate Committee finds that progress is unsatisfactory it may recommend to the Faculty Higher Degree Committee the suspension, cancellation or transfer (e.g., from PhD to MSc) of the student's enrolment.

The enrolment of all candidates in the PhD degree is subject to confirmation. Satisfactory progress, as assessed in accordance with the University procedures for confirmation of candidature between six and twelve months after enrolment, is required in order for the candidature to be confirmed. The APR at the end of your first year of (full-time-equivalent) candidature will be the **Confirmation of Candidature** review, at which you will be required to demonstrate that you have made satisfactory progress to date, and that you have completed: Research Integrity Training (see point 1 above); the Thesis Research Plan process (see point 2 above); and have attended the UNSW HDR Welcome and Orientation event (hosted by the Graduate Research School).

The Confirmation of Candidature review need not be at all extensive if your Research Plan has been accepted. However, the APR from the end of second year and beyond should be more extensive, being the only opportunity to provide a written report on what you have achieved. This report, and the proposed milestones, should prove helpful to you in moving toward a timely and successful completion of your research thesis.

SETTING MILESTONES: In each APR, your progress will be assessed against milestones that should have been achieved if you are making satisfactory progress in your candidature. These milestones must be

realistic; if a milestone is **not** achieved that may be taken as cause for concern that your candidature will not be completed in a timely fashion (i.e., thesis submission within four years from enrolment), so milestones should be set with this in mind.

You should arrange a meeting with your supervisor at the end of your first term of full-time candidature to develop a set of 1-3 milestones against which progress will be assessed in the Confirmation of Candidature review. This set of milestones should be emailed to the Postgraduate Coordinators.

6. Data Management Plan

If you will collect data of any sort, then you'll need a plan for storing the data. The University provides an online portal, [ResToolKit](#), which helps formulate a data management plan, and provides a place for storage. Your supervisor likely has an existing method for storing and managing data, and so you should discuss this with them. Detailed guidelines on what is required when it comes to data management, can be found [here](#).

Facilities and resources

All **full-time** research students are provided with desk space and secure storage. Early in your candidature, you will probably share an office or lab space with one or more other students, though later in your candidature (at the writing-up stage) an attempt can be made to find you more private space. Note that if you exceed 16 full-time terms of enrolment (eight terms for MSc students), you will need to put in a request to the Postgraduate Coordinator to keep your desk-space. Additionally, **once you submit your thesis you will need to vacate your desk**. However, if further work is required on the thesis after examination, or if you want to use the post-submission period to work on papers, job applications, etc, then desk space and computing facilities for this purpose should be arranged through the Technical Support Unit (TSU, located in Mathews 138). Once the thesis has been accepted, however, the School can no longer provide such facilities.

A pigeonhole is provided for incoming mail (in Mathews 1511), and correspondence related to your work can be posted using the mail bag located in the same room. You may request stationery items through the Project Administrator (Mathews Level 16), however specific expensive items must be paid for from your research account (see below).

The School will also attempt to provide each postgraduate research student with their own computer and access to computing facilities, including free access to the local area network printers, campus network services, and to the internet. Access to telephones is considered essential only for research-related activities such as contacting potential research participants. It is the supervisor's responsibility to provide such access. Any additional, expensive items must be charged to your research account.

Student Research Accounts: The School will provide a total of \$4,000 for your PhD candidature¹ to be spent on research costs, including travel and conference/workshop registration. If you have research needs beyond these funds, you should discuss them with your supervisor who may be able to contribute from the funds that they receive for postgraduate student infrastructure, or to support a request for funds from the

¹ Scientia Scholarship students will instead receive \$1,000 of research costs funded by the School, to supplement the research funding from the University per the terms of their scholarship.

Head of School. In general, you will gain access to these funds after you have had your confirmation of candidature meeting, though exceptions can be made in extreme circumstances.

Development and Research Training Grant Scheme: In addition, the University operates the Development and Research Training Grant Scheme (DRTG) which provides funding to support students' development and research training activities and aims to enhance their candidature experience. Currently enrolled candidates can submit one funding request per round of the scheme, capped at \$1,500. The scheme is administered via the Graduate Research School and further information (including eligibility information) is available at the Higher Degree Research Hub [here](#).

Top-up Scholarship Funding for Combined PhD/Masters students: For students taking the Combined PhD/Masters courses (programs 1404 and 1405) the School of Psychology funds top-up scholarships to cover the 6-month period from 3.5 years to 4 years of candidature. To access this funding, please email the Postgraduate Coordinators 2-3 months before your initial 3.5-year scholarship is due to expire and you will be provided with the appropriate forms to complete.

Photocopying: Photocopying can be done on the School photocopiers in Mathews 1511 and 1010.

Other information: You can find information on University policies and procedures relating to HDR courses at the [Higher Degree Research Hub](#).

Ethics and access to subject pools

Before beginning your research, you must have the relevant ethical approval to undertake such research. It is the responsibility of the supervisor to ensure that such approval is obtained, but of course it is your responsibility to undertake research in an ethical manner. Please note, however, that ethical approval is not automatic, and can sometimes take months to process.

First-year psychology students participate in research for course credit. It should be noted that the "peak" times for such participation are at the beginning of each term; at other times, participation rates can be frustratingly low. Please note that there are strict guidelines for accessing this subject pool and your ethics approval is predicated upon observation of these. Forms can be downloaded [here](#).

Conferences, publications and intellectual property

During the course of your research, you should try to write up papers for publication. Apart from the benefit for your later career, such papers can help you in developing your ideas. In addition, the feedback you will receive from the journal editor and reviewers may help in subsequent studies and in writing up the thesis. Presentations at conferences are also beneficial because they afford expert feedback on concepts and assist in discerning current trends in the field of interest. In normal circumstances it is expected that the candidate will be the first author on publications based directly on their thesis. If there are patent issues relevant to your research, then you and your supervisor should discuss these with reference to the relevant sections of the [Intellectual Property Policy](#).

Thesis submission and examination

About 2 months before you intend to submit your thesis, you must lodge a Notification of Intention to Submit (NOITS) with the Graduate Research School. For more information go [here](#). After lodging your NOITS, the Postgraduate Coordinator will request from your supervisor a list of nominated examiners. You may discuss possible thesis examiners with your supervisor. In particular, you may alert your supervisor to anybody who would not be an appropriate examiner and give your reasons. You should not contact potential examiners – this is the responsibility of the supervisor. The final decision regarding examiners is made by the Faculty Higher Degree Committee and their identity cannot be revealed until after receipt of their reports by the University, and then only with their consent. After lodging your NOITS, you will be sent information regarding the format, binding, and method of submission for your thesis.

Part-time teaching

Full-time students may be able to do up to six hours per week of undergraduate teaching (usually tutoring). If available, this opportunity should provide valuable experience as an instructor in psychology as well as benefits of a financial nature. However, teaching (and other part-time work) should be viewed as an activity undertaken in addition to full-time study, and should not interfere with progress toward completion of your research program. You should discuss whether or not part-time teaching would be advisable with your supervisor who will make a recommendation to the Head of School. Limits may be placed on teaching opportunities, particularly for students in the first year of their candidature and for students in a Combined degree.

Grievance procedures

If in the course of your candidature you feel that you are being unfairly treated or have any particular concerns, you should first consult your supervisor. If there is a breakdown in the relationship with your supervisor, you should approach the Head of School, a Postgraduate Coordinator, or the School Grievance Officer, Prof Peter Lovibond (p.lovibond@unsw.edu.au).

Note that the School also has an HDR Student Support Officer, and student Postgraduate Representatives who may participate in staff meetings. Through either of these channels, you can convey to academic staff any concerns that you may wish to keep anonymous.

If you would prefer to obtain confidential advice independent of the School or Faculty, you can:

- Contact your [Candidature Management Officer](#), or the Research Candidature Manager
- Contact legal advocacy services at [Arc](#)
- Consult the:
 - Student [Complaints and Appeals](#) website
 - Student [Code of Conduct](#)
 - Student [Complaint Procedure](#)

The information contained in this guide is correct as at the date noted on the first page. Prospective students should contact UNSW to confirm admission requirements and availability of programs. UNSW reserves the right to change any programs, admission requirement or other information herein without any prior notice. CRICOS Provider No. 000098G.

Appendix: Typical timetable for candidature

TIME FROM ENROLMENT	ACTIVITY
Within first term	Attend UNSW HDR Welcome and Orientation event. Attend School of Psychology HDR induction session.
End of first term	Meet with supervisor to agree a set of 1-3 milestones setting out what you should have achieved by the time of the Confirmation of Candidature review – and email this list to Postgraduate Coordinators (see “Monitoring Progress”).
End of second term	Submit Thesis Research Plan (see “Monitoring Progress”).
During second term	Schedule and hold panel meeting for Research Plan; complete and submit PhD Research Plan Review Form (see “Monitoring Progress”).
During third term	Confirmation of Candidature review. You will receive an email with a schedule for this meeting; complete required documentation on GRIS and submit to your supervisor at least a week prior to the meeting (see “Monitoring Progress”).
Between second and fourth terms	Give oral presentation of Research Plan. You will receive an email scheduling this talk (see “Monitoring Progress”).
End of each year	Annual Progress Review – complete documentation on GRIS and submit to supervisor at least a week prior to the meeting (see “Monitoring Progress”).
Between year 2 and 4	Give Mid-Candidature Presentation. You will receive an email scheduling this talk (see “Monitoring Progress”).
Start of year 3	Combined PhD/Masters students only: Email Postgrad Coordinators to arrange top-up scholarship funding (see “Facilities and Resources”).
Two months before thesis submission	Submit Notification of Intention to Submit via GRIS (see “Thesis submission and examination”).
