

Standard MPsych(Clin) Progression Plan

- The standard progression plan provides an overview of the typical workload across the 2-year MPsych(Clin) program. There would be some changes to these hours from year-to-year although the plan provides a good estimate of the contact hours associated with the various stages of the program.
- Please note that given the professional nature of the program, classes and placement work will occur outside the standard university term dates (during term break, O week and flex week).
- All program hours stated are estimates and includes only class and placement hours. These hours do NOT include time for completion of course assignments, reading, out-of-class tasks, client work preparation, report writing and other placement related admin duties.
- Any questions associated with the progression plan should be directed to Dr Chien Gooi (Program Director).

MASTER OF PSYCHOLOGY (CLINICAL)

NB Clinic/coursework time is defined as including class time, direct client time, supervision and formal meetings; does not include time for completion of course assignments, client preparation, report writing and other placement related admin duties.

Standard MPsych(Clin)/PhD Progression Plan

- The standard progression plan provides an overview of the typical workload across the 4-year combined program. There would be some changes to these hours from year-to-year although the plan provides a good estimate of the contact hours associated with the various stages of the program.
- Please note that given the professional nature of the program, classes and placement work will occur outside the standard university term dates (during term break, O week and flex week).
- All program hours stated are estimates and includes only class and placement hours. These hours do NOT include time for completion of course assignments, reading, out-of-class tasks, client work preparation, report writing and other placement related admin duties.
- Any questions associated with the progression plan should be directed to Prof Angela Nickerson (Combined Program Coordinator) or Dr Chien Gooi (Program Director).
