

Curriculum Vitae

Timothy Scott Trudgian timothy.trudgian@unsw.edu.au

July 6, 2026

Education and Employment

BSc (Hons), The Australian National University, December 2005

DPhil, University of Oxford, June 2010

Lecturer, Merton College, Oxford, September 2009–July 2010

Postdoctoral Research Fellow, University of Lethbridge, July 2010–June 2012

ARC Early Career Research Fellow, The Australian National University, 2012–2016

ARC Future Fellow, University of New South Wales Canberra, 2017–2021

Associate Professor, University of New South Wales, Canberra, 2020–2023

Professor, University of New South Wales, Canberra, 2024–present

Research Publications

1. Introducing complex numbers, *Austral. Senior Math. J.*, 2009, 23(2):59–62.
2. On a conjecture of Shanks, *J. Number Theory*, 2010, 130(12):2635–2638.
3. On the success and failure of Gram’s Law and the Rosser Rule, *Acta Arith.*, 2011, 148(3):225–256.
4. Improvements to Turing’s Method, *Math. Comp.*, 2011, 80(276):2259–2279.
5. An improved upper bound for the argument of the Riemann zeta-function on the critical line, *Math. Comp.*, 2012, 81(278):1053–1061.
6. On Selberg’s method and multiplicities of the zeroes of the Riemann zeta-function, *Comment. Math. Univ. St. Pauli*, 2011–12, 60(1–2):227–229.
7. Between the problems of Pólya and Turán, *J. Austral. Math. Soc.*, 2012, 93(1–2):157–171 (with M. J. Mossinghoff).
8. Twin progress in number theory, *Austral. Math. Soc. Gaz.*, 2013, 40(3):202–208.
9. A new upper bound for $|\zeta(1 + it)|$, *Bull. Aust. Math. Soc.*, 2014, 89(2):259–264.
10. An improved upper bound for the argument of the Riemann zeta-function on the critical line II, *J. Number Theory*, 2014, 134:280–292.
11. There are no socialist primes less than 10^9 , *Integers*, 2014, 14(A63):4pp.
12. An improved upper bound for the error in the zero-counting formulae for Dirichlet L -functions and Dedekind zeta-functions, *Math. Comp.*, 2015, 84(293):1439–1450.
13. Linear relations of the zeroes of the zeta-function, *Math. Comp.*, 2015, 84(294):2047–2058 (with D. G. Best).
14. A still sharper region where $\pi(x) - \text{li}(x)$ is positive, *Math. Comp.*, 2015, 84(295):2433–2446 (with P. Demichel and Y. Saouter).
15. A log-free zero-density estimate and small gaps in coefficients of L -functions, *Int. Math. Res. Not. IMRN*, 2015, 12:4242–4268 (with A. Akbary).
16. Explicit bounds on the logarithmic derivative and the reciprocal of the Riemann zeta-function, *Funct. Approx. Comment. Math.*, 2015, 52(2):253–261.

17. The sum of the unitary divisor function, *Publ. Inst. Math. (Beograd) (N.S.)*, 2015, 97(111):175–180.
18. An improved explicit bound on $|\zeta(\frac{1}{2} + it)|$, *J. Number Theory*, 2015, 147:842–851 (with D. J. Platt).
19. Linnik’s approximation to Goldbach’s conjecture, and other problems, *J. Number Theory*, 2015, 153:54–62 (with D. J. Platt).
20. A short extension of two of Spira’s results, *J. Math. Inequal.*, 2015, 9(3):795–798.
21. Robin’s inequality for 11-free integers, *Integers*, 2015, 15(A12):5pp. (with K. A. Broughan).
22. On consecutive primitive elements in a finite field, *Bull. Lond. Math. Soc.*, 2015, 47(3):418–426 (with S. D. Cohen and T. Oliveira e Silva).
23. Bounds on the number of Diophantine quintuples, *J. Number Theory*, 2015, 157:233–249.
24. Nonnegative trigonometric polynomials and a zero-free region for the Riemann zeta-function, *J. Number Theory*, 2015, 157:329–349 (with M. J. Mossinghoff).
25. A proof of the conjecture of Cohen and Mullen on sums of primitive roots, *Math. Comp.*, 2015, 84(296):2979–2986 (with S. D. Cohen and T. Oliveira e Silva).
26. Updating the error term in the prime number theorem, *Ramanujan J.*, 2016, 39(2):225–234.
27. On the first sign change of $\theta(x) - x$, *Math. Comp.*, 2016, 85(299):1539–1547 (with D. J. Platt).
28. On Grosswald’s conjecture on primitive roots, *Acta Arith.*, 2016, 172(3):263–270 (with S. D. Cohen and T. Oliveira e Silva).
29. Zeroes of partial sums of the Riemann zeta-function, *LMS J. Math. Comput.*, 2016, 19(1):37–41 (with D. J. Platt).
30. Diophantine quintuples containing triples of the first kind, *Period. Math. Hungar.*, 2016, 72(2):235–242 (with D. J. Platt).
31. Improvements to Turing’s Method II, *Rocky Mountain J. Math.*, 2016, 46(1):325–332.
32. Searching for Diophantine quintuples, *Acta Arith.*, 2016, 173(4):365–382 (with M. Cipu).
33. Resolving Grosswald’s conjecture on GRH, *Funct. Approx. Comment. Math.*, 2016, 55(2):215–225 (with K. McGown and E. Treviño).
34. On the least square-free primitive root modulo p , *J. Number Theory*, 2017, 170:10–16 (with S. D. Cohen).
35. The T_4 and G_4 construction of Costas arrays, *J. Combin. Math. Combin. Comput.*, 2017, 100:217–221 (with Q. Wang).
36. On the sum of two squares and at most two powers of 2, *Amer. Math. Monthly*, 2017, 124(8):737–740 (with D. J. Platt).
37. The Liouville function and the Riemann hypothesis, *Exploring the Riemann Zeta Function*, pp. 201–221, Springer, Cham, 2017 (with M. J. Mossinghoff).
38. Linear combinations of primitive elements of a finite field, *Finite Fields Appl.*, 2018, 51:388–406 (with S. D. Cohen, T. Oliveira e Silva and N. Sutherland).
39. Square-full primitive roots, *Int. J. Number Theory*, 2018, 14(4):1013–1021 (with M. Munsch).
40. Existence results for primitive elements in cubic and quartic extensions of a finite field, *Math. Comp.*, 2019, 88(316):931–947 (with G. Bailey, S. D. Cohen and N. Sutherland).
41. Quadratic non-residues that are not primitive roots, *Math. Comp.*, 2019, 88(317):1251–1260 (with T. Jarso).
42. Fujii’s development on Chebyshev’s conjecture, *Int. J. Number Theory*, 2019, 15(3):639–644 (with D. J. Platt).

43. Primitive values of quadratic polynomials in a finite field, *Math. Comp.*, 2019, 88(318):1903–1912 (with A. R. Booker, S. D. Cohen and N. Sutherland).
44. Lehmer numbers and primitive roots modulo a prime, *J. Number Theory*, 2019, 203:68–79 (with S. D. Cohen).
45. Explicit upper bounds on the least primitive root, *Proc. Amer. Math. Soc.*, 2020, 148(3):1049–1061 (with K. J. McGown).
46. Improved bounds on Brun’s constant, *From Analysis to Visualization. JBCC 2017*, pp. 395–406, Springer Proc. in Math. and Stat., vol. 313. Springer, Cham, 2020 (with D. J. Platt).
47. An elementary bound on Siegel zeroes, *J. Number Theory*, 2020, 212:448–457 (with T. Morrill).
48. On integers n for which $\sigma(2n + 1) \geq \sigma(2n)$, *J. Number Theory*, 2020, 215:138–148 (with M. Kobayashi).
49. The least primitive root modulo p^2 , *J. Number Theory*, 2020, 215:20–27 (with B. Kerr and K. J. McGown).
50. A tale of two omegas, *75 Years of Mathematics of Computation*, pp. 343–364, Contemp. Math., 754, Amer. Math. Soc., Providence, RI, 2020 (with M. J. Mossinghoff).
51. The error term in the prime number theorem, *Math. Comp.*, 2021, 90(328):871–881 (with D. J. Platt).
52. The distribution of k -free numbers, *Math. Comp.*, 2021, 90(328):907–929 (with M. J. Mossinghoff and T. Oliveira e Silva).
53. The Riemann hypothesis is true up to $3 \cdot 10^{12}$, *Bull. Lond. Math. Soc.*, 2021, 53(3):792–797 (with D. J. Platt).
54. A harmonic sum over nontrivial zeros of the Riemann zeta-function, *Bull. Aust. Math. Soc.*, 2021, 104(1):59–65 (with R. P. Brent and D. J. Platt).
55. Oscillations in weighted arithmetic sums, *Int. J. Number Theory*, 2021, 17(1):1697–1716 (with M. J. Mossinghoff).
56. Accurate estimation of sums over zeros of the Riemann zeta-function, *Math. Comp.*, 2021, 90(332):2923–2935 (with R. P. Brent and D. J. Platt).
57. Two explicit divisor sums, *Ramanujan J.*, 2021, 56(1):141–149 (with M. Cully-Hugill).
58. Sign changes in the prime number theorem, *Ramanujan J.*, 2022, 57(1):165–173 (with D. J. Platt and T. Morrill).
59. Some explicit and unconditional results on gaps between zeroes of the Riemann zeta-function, *Trans. Amer. Math. Soc.*, 2022, 375(5):3239–3265 (with A. Simonič and C. L. Turnage-Butterbaugh).
60. Uniform effective estimates for $|L(1, \chi)|$, *J. Number Theory*, 2022, 236:245–260 (with A. Langasco).
61. Four consecutive primitive elements in a finite field, *Math. Comp.*, 2022, 91(335):1521–1532 (with T. Jarso).
62. The mean-square of the error term in the prime number theorem, *J. Number Theory*, 2022, 238:740–762 (with R. P. Brent and D. J. Platt).
63. Wolstenholme and Vandiver primes, *Ramanujan J.*, 2022, 58(3):913–941 (with A. R. Booker, S. Hathi, and M. J. Mossinghoff).
64. Oscillations in the Goldbach conjecture, *J. Théor. Nombres Bordeaux*, 2022, 34:295–307 (with M. J. Mossinghoff).

65. Explicit lower bounds on $L(1, \chi)$, *J. Number Theory*, 2022, 240:641–655 (with M. J. Mossinghoff and V. V. Starichkova).
66. Primitive elements with prescribed traces, *Finite Fields Appl.*, 2022, 84(102094), 13pp. (with A. R. Booker, S. D. Cohen and N. Leong).
67. Primitive element pairs with a prescribed trace in the cubic extension of a finite field, *Bull. Aust. Math. Soc.*, 2022, 106(3):458–462 (with A. R. Booker, S. D. Cohen and N. Leong).
68. Fake Mu’s, *Proc. Amer. Math. Soc.*, 2023, 151(8):3229–3244 (with G. Martin and M. J. Mossinghoff).
69. On the Montgomery–Odlyzko method regarding gaps between zeros of the zeta-function, *J. Math. Anal. Appl.*, 2023, 527(2), Paper No. 127548, 7pp. (with D. A. Goldston and C. L. Turnage-Butterbaugh).
70. New bounds for numbers of primes in element orders of finite groups, *Math. Nachr.*, 2023, 296:5227–5231 (with C. Bellotti and T. M. Keller).
71. An explicit upper bound for $L(1, \chi)$ when χ is quadratic, *Res. Number Theory*, 2023, 9(4), no. 72, 20pp. (with D. R. Johnston, O. Ramaré).
72. Explicit zero-free regions for the Riemann zeta-function, *Res. Number Theory*, 2024, 10(1), no. 11, 27pp. (with M. J. Mossinghoff and A. Yang).
73. Toward optimal exponent pairs, *Math. Comp.*, 2025, 94(353):1467–1502 (with A. Yang).
74. New exponent pairs, zero density estimates, and zero additive energy estimates: a systematic approach, To appear in *Math. Comp.*, 2026 (with T. Tao and A. Yang).
75. A round of Pintz to celebrate oscillations in sums, To appear in *Anal. Math.*, 2026 (with D. R. Johnston).
76. On the error term of the fourth moment of the Riemann zeta-function, *Submitted* (with N. Palojärvi).
77. The determination of norm-Euclidean cyclic cubic fields, *Submitted* (with G. K. Bagger, A. R. Booker, B. Kerr, K. J. McGown, and V. Starichkova).
78. Applying hypersurface bounds to a conjecture by Carlet, *Submitted* (with Z. Gemmell).
79. Zero-free regions inspired by work of Heath-Brown, *Submitted* (with C. Bellotti and A. Yang).
80. An update on the Linnik–Goldbach and Romanov problems, To appear in *Acta Arith.* (with D. R. Johnston).
81. A conjecture of Glasby, Praeger, and Unger on permutations of S_n , *Submitted* (with C. Bellotti).
82. On an arithmetic sum connected with zero-density estimates, *In preparation* (with S. Chourasiya and N. Palojärvi).
83. Zeroes of real, quadratic L -functions, *In preparation* (with D. J. Platt).
84. A new bound on Linnik’s constant building on contributions by Heath-Brown, *In preparation* (with M. J. Mossinghoff and A. Yang).
85. Computational problems arising from Artin’s conjecture, *In preparation* (with G. K. Bagger and V. Starichkova).
86. On number field discriminants and low-lying zeros of Dedekind zeta-functions, *In preparation* (with S. Zuniga-Alterman).
87. Consecutive square-free primitive roots, *In preparation* (with S. D. Cohen, T. Jarso, and D. R. Johnston).
88. Burgess’ bounds for character sums with prime moduli, *In preparation* (with B. Kerr and J. Punch).

Awards, Grants, and Scholarships

Discovery Project (Chief Investigator), ARC, 2024–2026
Fellow of the Australian Mathematical Society, 2023
UNSW Canberra Research Supervisor Award, 2022
Scientia Education Academy Exemplary Teaching Award: Honourable Mention, 2021
Blue Hat Award¹ 63rd annual AustMS meeting, Melbourne, 2019
Visiting Fellow and Oliver Smithies Visiting Lecturer, Balliol College, Oxford, 2019
National Computational Infrastructure, NCMAS, 2017, 2019, 2020
Future Fellowship, ARC, 2016–2019
Discovery Project (Chief Investigator), ARC, 2016–2018
Outstanding Contribution to Student Learning by an Early Career Academic, ANU, 2014
Discovery Early Career Researcher Award, ARC, 2012–2015
General Sir John Monash Award, 2006–2009

Editorial work

Bulletin of the Australian Mathematical Society, 2022 to present
Mathematics of Computation, 2024 to present
Expositiones Mathematicae, 2024 to present
American Mathematical Monthly, 2025 to present
Ramanujan Journal, 2025 to present

PhD supervision

Adrian Dudek, 2016	Valeriia Starichkova, 2023	Gustav Bagger, 2028 (?)
Matteo Bordignon, 2021	Nicol Leong, 2025	James Punch, 2029 (?)
Aleksander Simonič, 2022	Daniel Johnston, 2025	Giulia Pelizzari, 2029 (?)
Ethan Lee, 2023	Andrew Yang, 2025	Zoë Gemmell, 2029 (?)
Forrest Francis, 2023	Chiara Bellotti, 2026	Matthew Fernando, 2030 (?)
Michaela Cully-Hugill, 2023	Sebastian Tudzi, 2027 (?)	Kieran Lelis, 2030 (?)
Shehzad Hathi, 2023	Shashi Chourasiya, 2027 (?)	

Honours and MRes supervision

Jeffrey Lay, 2014	David Quarel, 2017	Jordan Pertile, MRes, 2027
Kirsty Chalker, 2016	Caitlin Mattner, 2017	
Morgan Hunter, 2016	Michaela Cully-Hugill, 2018	

¹Awarded by students at the AustMS to the best non-student talk. Roughly on par with a Fields Medal, the Governor-Generalcy, and skipping 5-0 Ashes series victories. I received an icosahedron as an Honourable Mention for this same prize in 2022: roughly on par with a clean-sweep in an away series against India.
