Course Details

Credit Points 6

Summary of the Course

An off-campus survey camp, where survey projects of substantial extent are carried out involving control survey design and implementation, detail surveys, contour surveys, the design and setting-out of a rural road, and other selected projects. The processing of the field data and the preparation of plans and reports is done during session. Students are required to attend a 4-day residential survey camp at the start of Term 1 equivalent to three contact hours per week, followed by two hours per week project data processing during session.

Course Aims

To broaden and deepen the knowledge of surveying instrumentation, field methods, and surveying software, by students conducting their own field survey over a 4-day intensive period at a site remote from UNSW campus. The aim is to involve students in measurement, survey design, and analysis, and to give them confidence in their ability to carry out field surveys.

Course Learning Outcomes

1. Gain experience with hand held and RTK-GNSS, road surveys, detail surveys, engineering surveys, and close range photogrammetry
2. Gain considerable experience at managing a small group

Teaching Strategies

The field surveys will be conducted as group work. It is not possible for one person to do most of the work and "carry" the others in the group. Following the 4-day intensive camp, on campus processing of the field data, including plan production and reports, as individuals will be required. An extra exercise will be carried out on campus after the camp. There are no lectures in this course. However, there are briefing and debriefing sessions at the field/camp site and training sessions. This course has been very successfully conducted at another site (Morpeth) since 1976 and Berry since 2008, with continual modifications to the exercises as instrument and software have developed. In 2021, for the first time, we will move the camp to the Cataract Scout Park. We will shorten the camp by one day, modify some of the previous exercises accordingly and introduce some new on-campus exercises to be conducted after the camp week. Each year we make improvements to the survey exercises and requirements.

There are a set of back-up exercises that can be carried out if there is heavy rain and flooding that prevents students from conducting the planned fieldwork.

Additional Course Information

Students are expected to have completed GMAT1110, GMAT2500 and GAMT2550 as pre-requisitie to this course. GMAT2700 and GMAT2120 are highly recommended to have completed as well. Please discuss with the course coordinator prior to enrolling if unsure.

Assessment Details

Assessment 1: Control Survey Report

Start date: 02/03/2021 10:00 AM

Details:

Students do a control survey as a group of 3. This includes testing of hand held GPS and its use for finding survey marks; control survey fieldwork and recovery sketches and analysis and report of the control survey. Design and measure as a group, then analysis and report as individuals. Students are given feedback in the field after they design their network and before measurements. More feedback is given during the off campus data analysis. After marking of their reports students are invited to individual feedback from the lecturer.

Late submissions will be penalised at the rate of 10% per day after the due time and date have expired.

Assessment 2: Detail Survey Project

Start date: 02/03/2021 10:00 AM

Details:

Students do a detail topographic and contour survey of part of the site as a group of 3. This project builds on the output of the control survey project. Design and measure as a group, then analysis, plans and report as individuals. Students are given feedback in the field after they design their network and before measurements. More feedback is given during the off campus data analysis. After marking of their reports students are invited to request individual feedback from the lecturer.

Late submissions will be penalised at the rate of 10% per day after the due time and date have expired.

Assessment 3: Road Survey Project

Start date: 02/03/2021 10:00 AM
Details:

Surveying students do a rural road design and set-out survey as a group of 3. Design and measure as a group. Group submission of plans, individual report submission. Students are given feedback in the field after they design their network and before measurements. More feedback is given during the off campus data analysis. After marking of their reports students are invited to individual feedback from the lecturer.

Late submissions will be penalised at the rate of 10% per day after the due time and date have expired

Assessment 4: Other survey

Start date: 02/03/2021 10:00 AM

Details:

Several smaller assessment tasks are included in this category. Survey students undertake a tunnel survey on UNSW campus; a close range photogrammetry survey; and a survey of a 300m catenary cable and subsequent least squares curve fit analysis. Individual reports are submitted.

Late submissions will be penalised at the rate of 10% per day after the due time and date have expired

Additional details:

The various exercises will have different due dates depending on circumstances. The lecturer will keep students informed during term.
Attendance Requirements

Students are strongly encouraged to attend all classes and review lecture recordings.

Resources

Prescribed Resources

Students should refer to the documents made available on the Moodle site. Students should also refer to lecture notes from previous courses especially GMAT2500 and GMAT2550.

Recommended Resources

Course Evaluation and Development

This course has evolved over many years. It is an intensive field camp experience and has been previously conducted in Morpeth and Berry. This is the first time it will take place at Cataract Scout Park. Week 1 will provide a compulsory student briefing. This will also be recorded. Students will be expected to practice using equipment (eg uploading and downloading from total station, using RTK etc) in week 1 & 2 in preparation for the survey camp.

During the survey camp there will be an initial WHS briefing and orientation before commencing survey tasks. There will be briefing sessions before each task and/or each night. This is a valuable time where students can ask questions in a relaxed environment and learn from each other as well as receiving guidance from the lecturers.

After camp, a series of tasks with staggered deadlines will be conducted in the lab with assistance from the lecturers.

Laboratory Workshop Information

Lab and workshop information will be provided on Moodle. Lecturers will be available during the timetabled lab sessions to answer questions and provide assistance.
Submission of Assessment Tasks

Please refer to the Moodle page of the course for further guidance on assessment submission.
Academic Honesty and Plagiarism

Beware! An assignment that includes plagiarised material will receive a 0% Fail, and students who plagiarise may fail the course. Students who plagiarise are also liable to disciplinary action, including exclusion from enrolment.

Plagiarism is the use of another person’s work or ideas as if they were your own. When it is necessary or desirable to use other people’s material you should adequately acknowledge whose words or ideas they are and where you found them (giving the complete reference details, including page number(s)). The Learning Centre provides further information on what constitutes Plagiarism at:

https://student.unsw.edu.au/plagiarism
Academic Information

Key UNSW Dates - eg. Census Date, exam dates, last day to drop a course without academic/financial liability etc.

Final Examinations:

Final exams in Term 1 will be held online between 30th April - 13th May inclusive. You are required to be available on these dates. Please do not to make any personal or travel arrangements during this period.

Supplementary Examinations:

Supplementary Examinations for Term 1 2021 will be held on 24th - 28th May inclusive should you be required to sit one. You are required to be available on these dates. Please do not to make any personal or travel arrangements during this period.
