School of Civil and Environmental Engineering
Term 2, 2021

CVEN9630 Groundwater Hydrology and Resources Analysis

COURSE DETAILS

Units of Credit	6
Contact hours	4 hours online remote delivery per week
Classes: & Assignment Guidance	Wednesday online live lecture 18:00-20:00 (weeks 1-10) Thursday online live lecture 18:00-20:00 (weeks 1-10) For details see schedule on page 3
Course Coordinator and Lecturer	A/Prof Martin S. Andersen m.andersen@unsw.edu.au and Moodle forum
Lecturers	Dr Helen Rutledge h.rutledge@unsw.edu.au

INFORMATION ABOUT THE COURSE

This course is a part of the Groundwater Resources M. Eng. Sci. program.

IMPORTANT NOTE: Since this is an online remotely delivered course, we rely on communicating with students through email and UNSW Moodle during the duration of the semester. It is the responsibility of the student to regularly check for announcements on Moodle and to make sure their provided email address is functional and regularly checked!

HANDBOOK DESCRIPTION

See handbook: <https://www.handbook.unsw.edu.au/postgraduate/courses/2021/CVEN9630>

OBJECTIVES

The aim of this course is to develop a student's understanding of the occurrence of groundwater and how it is interlinked with surface water. In addition, the student will understand the basic methods of groundwater investigations and development.

List of programme attributes:

- The skills involved in scholarly enquiry
- An in-depth engagement with the relevant disciplinary knowledge in its interdisciplinary context
- Capacity for analytical and critical thinking and for creative problem solving
- Ability to engage independent and reflective learning
- Information literacy and the skills to appropriately locate, evaluate and use relevant information
- A respect for ethical practice and social responsibility
- Skills for effective communication

TEACHING STRATEGIES

Private Study

- Review lecture material and textbook
- Do set problems and assignments

	<ul style="list-style-type: none"> • Join Moodle discussions of problems • Reflect on class problems and assignments • Download materials from Moodle • Keep up with notices and find out marks via Moodle
Lectures	<ul style="list-style-type: none"> • Find out what you must learn • See methods that are not in the textbook • Follow worked examples • Hear announcements on course changes
Assignment Guidance	<ul style="list-style-type: none"> • Be guided by the lecturers • Practice solving set problems • Ask questions
Assessments: Reading and major assignments	<ul style="list-style-type: none"> • Demonstrate your knowledge and skills • Demonstrate higher understanding and problem solving

EXPECTED LEARNING OUTCOMES

At the conclusion of this course, students should be able to:

1. Have an ability to understand what groundwater is and where it occurs
2. Understand the connectivity of surface water and groundwater resources, and
3. Understand how to investigate and develop groundwater resources

For each hour of contact it is expected that a student will put in at least 1.5 hours of private study.

This course is designed to address the learning outcomes below and the corresponding Engineers Australia Stage 1 Competency Standards for Professional Engineers as shown. The full list of Stage 1 Competency Standards may be found in Appendix A.

After successfully completing this course, you should be able to:

Learning Outcome		EA Stage 1 Competencies
1.	<i>Understand groundwater, its occurrence, distribution and value.</i>	<i>PE1.1, PE1.3, PE3.1</i>
2.	<i>Knowledge of the physical and chemical characteristics of groundwater flow and storage.</i>	<i>PE1.2, PE2.1</i>
3.	<i>Knowledge of state-of-the-art investigation techniques used to quantify groundwater flow and storage.</i>	<i>PE1.2, PE1.3, PE3.1</i>
4.	<i>Application of physical relationships to quantitatively assess groundwater flow and storage.</i>	<i>PE1.2, PE2.1</i>
5.	<i>Knowledge of the design of groundwater extraction and monitoring infrastructure.</i>	<i>PE1.5, PE2.3, PE3.1</i>
6.	<i>Comprehend difficult groundwater investigation problems by solving questions based on real-world measurements.</i>	<i>PE1.2, PE2.1, PE3.2</i>

COURSE PROGRAM

Online live delivery time: 18:00 – 20:00			
Week	Date	Topic	Lecturer
1	Wednesday 2 nd June	Lecture 1 (chapter 1): Introduction to Hydrogeology	Martin Andersen
	Thursday 3 rd June	Lecture 2 (chapter 2): Physical properties and Darcy's Law Lecture 3 (chapter 3): Transport equations and steady-state flow	Martin Andersen
2	Wednesday 9 th June	Lecture 4 (chapter 4): Aquifer storage and abstraction impacts	Martin Andersen
	Thursday 10 th June	Assignment guidance	Martin Andersen
3	Wednesday 16 th June	Lecture 5 (chapter 5): Groundwater modelling fundamentals	Martin Andersen
	Thursday 17 th June	Assignment guidance	Martin Andersen
4	Wednesday 23 rd June	Lecture 7 (chapter 11): Drilling techniques Lecture 8 (chapter 13): Abstraction bore design and maintenance	Martin Andersen
	Thursday 24 th June	Lecture 9 (chapter 7): Well hydraulics	Martin Andersen
5	Wednesday 30 th June	Lecture 10 (chapter 8): Pumping test interpretation	Martin Andersen
	Thursday 1 st July	Assignment guidance	Martin Andersen
6	Wednesday 7 th July	Flexibility week – no lectures – individual assignment work	
	Thursday 8 th July		
7	Wednesday 14 th July	Lecture 6 (chapter 6): Recharge, discharge and SW-GW connectivity	Martin Andersen
	Thursday 15 th July	Lecture 15 (chapter 15): Groundwater isotopes	Martin Andersen
8	Wednesday 21 st July	Lecture 14 (chapter 14): Groundwater chemistry	Helen Rutledge
	Thursday 22 nd July	Assignment guidance	Martin Andersen
9	Wednesday 28 th July	Lecture 11 (chapter 9): Geophysical techniques: Electrical Lecture 12 (chapter 12): Geophysical logging	Martin Andersen
	Thursday 29 th July	Lecture 13 (chapter 10): Geophysical techniques: Seismic	Martin Andersen
10	Wednesday 4 th August	Assignment guidance	Martin Andersen
	Thursday 5 th August	Guest lecture: TBA	TBA

ASSESSMENT

The major assignments contain specific tasks and questions to be answered by each individual student in their own time **after** the scheduled online class times. Please note that the assignments do require significant time to complete, as they form the core part of assessing a student's understanding of the knowledge provided in this course. The purpose of these exercises is to enable students to develop the necessary depth of understanding of groundwater resources so that they can enter the workforce and contribute accordingly.

The final grade is calculated based on the weights of individual assessments. Passing this course requires a final grade of 50%. Please note that the Course Coordinator reserves the right to adjust the final scores by scaling if agreed to by the Head of School. Details of each assessment component, the marks assigned to it, the criteria by which marks will be assigned, and the dates of submission are set out below.

NOTES:

- 1) Feedback will be given for Assignment 1 before 27th of June.
- 2) There is no exam at the end of session for this course.

PENALTIES

Late work will be penalised at the rate of 10% per day after the due time and date have expired.

ASSESSMENT OVERVIEW

Item	Length	Weight	Learning outcomes assessed	Assessment Criteria <i>(this needs to explicitly describe what students are expected to demonstrate in the task)</i>	Due date and submission requirements	Deadline for absolute fail	Marks returned
Assignment 1: Fundamental hydrogeology	9 main questions	15%	PE 1.1 PE 1.2 PE 1.3 PE 2.1 PE 3.2	<i>The correctness of answers to questions about the fundamentals of hydrogeology including: groundwater in a geological context using geological maps; calculating hydraulic heads and deriving equipotential maps and flowlines; applying Darcy's Law in various configurations. This assignment is designed to capture the students understanding of the course material delivered in Lecture note Chapters 1-2. Marks are given for correct answers and summed to form an assignment grade.</i>	16 June 6 pm	18 June 6 pm	Before 27 June
Assignment 2: Groundwater Flow Modelling; Groundwater Storage; Transient Groundwater Flow to Wells; Hydraulic Test Interpretations	5 main questions each with a number of sub-questions	40%	PE 1.1 PE 1.2 PE 1.3 PE 1.5 PE 2.1 PE 2.2 PE 3.2 PE 3.4	<i>The correctness of answers to questions of increasing difficulty is quantified. The students will apply technical knowledge and engineering principles to: steady state groundwater flow model; groundwater storage; transient flow to wells and hydraulic test interpretation. Questions are designed to develop and capture the student's in-depth knowledge of the material delivered in the Lecture note Chapters 3-8. Marks will be based on a student's logical thinking, as far as this can be reasonably inferred, and for correct answers and summed to form an assignment grade.</i>	14 July 6 pm	16 July 6 pm	28 July
Assignment 3: Hydro-geochemical and Isotopic Investigations	3 main questions each with a number of sub-questions	30%	PE 1.1 PE 1.2 PE 1.3 PE 1.5 PE 2.1 PE 2.2 PE 3.2 PE 3.4.	<i>The correctness of answers to questions of increasing difficulty is quantified. The students will apply technical knowledge and engineering principles to: hydrogeochemical and isotopic knowledge and methods for groundwater investigations. Questions are designed to develop and capture the student's in-depth knowledge of Chapters 14 and 15. Marks will be based on a student's logical thinking, as far as this can be reasonably inferred, and for correct answers and summed up to form an assignment grade.</i>	28 July 6 pm	30 July 6 pm	11 August
Assignment 4: Bore design; Geophysical Well-Logging; Geo-Electrical and Seismic	5 main questions each with a number of sub-questions	15%	PE 1.1 PE 1.2 PE 1.3 PE 1.5 PE 2.1 PE 2.2	<i>The correctness of answers to questions of increasing difficulty is quantified. The students will apply technical knowledge and engineering principles to: aspects of bore design; geophysical well-logging; geo-electrical and seismic survey interpretation. Questions are designed to develop and capture the student's in-depth knowledge of</i>	11 August 6 pm	13 August 6 pm	31 July

Survey Interpretation			PE 3.2 PE 3.4	<i>the material delivered in the Lecture note Chapters 9-13. Marks will be based on a student's logical thinking, as far as this can be reasonably inferred, and for correct answers and summed to form an assignment grade.</i>

RELEVANT RESOURCES

Extensive notes are provided in the form of a book containing individual chapters for the course material.

General texts worth purchasing are:

- Applied Hydrogeology - Fourth Edition (2001) by C.W. Fetter; published by Prentice Hall - For a basic introduction.
- Groundwater hydrology (2005) by Todd, D. K., & Mays, L. W. Wiley, New Jersey.
- Hydrogeology: Principles and Practice (2014) Kevin M. Hiscock & Victor F. Bense. Published by Wiley-Blackwell.
- Groundwater Science (2012) by Charles Fitts. Published by Elsevier.
- Physical and Chemical Hydrogeology - Second Edition (1997) by Domenico and Schwartz; published by John Wiley and Sons - More detailed theoretical discussion of many aspects.
- Groundwater Hydrology - Conceptual and Computational Models (2003) by K.R. Rushton; published by Wiley - Excellent practical and theoretical approach to groundwater resource assessment.
- Water Wells and Boreholes - Misstear, Banks and Clark (2006); published by Wiley
- Geochemistry, Groundwater, and Pollution (2005); Appelo, C.A.J., Postma, D.; 2nd ed. A.A. Balkema, Rotterdam. 649 pp. ISBN: 04 1536 428 0 - Best textbook on the market for groundwater chemistry! It can be ordered via website www.crcpress.com

The UNSW Connected Waters web site provides a portal to the groundwater world. This can be accessed at <http://www.connectedwaters.unsw.edu.au>

The Hydrogeology Journal is the academic publication of the International Association of Hydrogeologists.

The web address for the IAH is <http://www.iah.org/>.

Journal articles are at <http://link.springer.de/link/service/journals/10040/index.htm>

Additional materials may be provided on Moodle during the course.

DATES TO NOTE

Refer to MyUNSW for Important Dates available at: <https://student.unsw.edu.au/dates>

PLAGIARISM

Beware! An assignment that includes plagiarised material will receive a 0% Fail, and students who plagiarise may fail the course. Students who plagiarise are also liable to disciplinary action, including exclusion from enrolment.

Plagiarism is the use of another person's work or ideas as if they were your own. When it is necessary or desirable to use other people's material you should adequately acknowledge whose words or ideas they are and where you found them (giving the complete reference details, including page number(s)). The Learning Centre provides further information on what constitutes Plagiarism at: <https://student.unsw.edu.au/plagiarism>

Appendix A: Engineers Australia (EA) Competencies

Stage 1 Competencies for Professional Engineers

	Program Intended Learning Outcomes
PE1: Knowledge and Skill Base	PE1.1 Comprehensive, theory-based understanding of underpinning fundamentals
	PE1.2 Conceptual understanding of underpinning maths, analysis, statistics, computing
	PE1.3 In-depth understanding of specialist bodies of knowledge
	PE1.4 Discernment of knowledge development and research directions
	PE1.5 Knowledge of engineering design practice
	PE1.6 Understanding of scope, principles, norms, accountabilities of sustainable engineering practice
PE2: Engineering Application Ability	PE2.1 Application of established engineering methods to complex problem solving
	PE2.2 Fluent application of engineering techniques, tools and resources
	PE2.3 Application of systematic engineering synthesis and design processes
	PE2.4 Application of systematic approaches to the conduct and management of engineering projects
PE3: Professional and Personal Attributes	PE3.1 Ethical conduct and professional accountability
	PE3.2 Effective oral and written communication (professional and lay domains)
	PE3.3 Creative, innovative and pro-active demeanour
	PE3.4 Professional use and management of information
	PE3.5 Orderly management of self, and professional conduct
	PE3.6 Effective team membership and team leadership
