Course Details

Credit Points 4

Summary of the Course

The project provides an opportunity for you to bring together engineering principles learned over your previous years of study and apply these principles to innovatively solve problems such as the development of a specific design, process and/or the investigation of a hypothesis. Master projects are complex, open-ended problems that allow room for your creativity, and the acquisition, analysis and interpretation of results. There are multiple possible solutions or conclusions at the outset and sufficient complexity to require a degree of project planning. The project requires you to formulate problems in scientific or engineering terms, manage an technical project and find solutions by applying scientific and engineering methods. You will also develop the ability to work in a research and development environment.

Course Aims

The Research Thesis is an individual project in which each student works under the guidance of a nominated member of the academic staff (the "Supervisor"). An additional member of academic staff (the "Co-supervisor") may also be nominated depending on the set up of the project. The research may involve laboratory experiments, field or industry-based investigations, design applications or theoretical research. The Research Thesis aims to provide students with the opportunity to:

- Undertake and execute an academic research project;
- Produce a self-contained research thesis, which may be understood and used by others with technical background knowledge in the same discipline area as the thesis topic, and may potentially be suitable for publication;
- Present their research in a seminar or video.

Course Learning Outcomes

After successfully completing this course, you should be able to:

<table>
<thead>
<tr>
<th>Learning Outcome</th>
<th>EA Stage 1 Competencies</th>
</tr>
</thead>
<tbody>
<tr>
<td>1. Develop a design or a process or investigate a hypothesis following industry and professional engineering standards.</td>
<td>PE2.1, PE2.2, PE2.3, PE2.4</td>
</tr>
<tr>
<td>2. Critically reflect on a specialist body of knowledge related to their thesis topic.</td>
<td>PE1.3</td>
</tr>
<tr>
<td>3. Apply scientific and engineering methods to solve an engineering problem.</td>
<td>PE2.1</td>
</tr>
<tr>
<td>4. Analyse data objectively using quantitative and mathematical methods.</td>
<td>PE1.2, PE2.1, PE2.2</td>
</tr>
<tr>
<td>5. Demonstrate oral and written communication in professional and lay domains.</td>
<td>PE3.2</td>
</tr>
</tbody>
</table>
Teaching Strategies

The course is taught as an individual research project, to develop a level of research skills and autonomy.

Private Study

As a rough guide only, an average student would be expected to spend approximately 10 hours per week on work related to this course. More guidance is needed initially from the supervisor when the topic is being defined to establish the objectives and methodology of the thesis.

Supervision

There are no specific hours assigned to this course. Meetings between the supervisor(s) and the student may take place periodically or by private arrangement. Should supervisors be on study leave or unavailable for a considerable period of the session, alternative arrangements need to be established and made known to both the student and course coordinator.

Consultation

The course convenor and tutors will be available via Microsoft Teams to liaise with enrolled students as needed.

Additional Course Information

Selecting a Research Topic

Your priority is to find a supervisor and agree on a topic by week 2 of the term. Once enrolled in the course, make sure that you get access to the Microsoft Teams site - if not please contact the course convenor for access.

In the Teams page, there are a list of potential topics under the General tab -> Files -> Available Projects.

Once you have a supervisor and topic, you will need to fill out a form MERE Research Thesis / Masters Project Supervisor Nomination Form T2, 2021 which will send an email to your supervisor for approval. Do this by the end of W2.

One Project, Three Courses

Three courses cover writing your Research Thesis and related assessments.

- Research Thesis A: The focus of A is to complete a literature review.
- Research Thesis B: You will write a progress review, including a methodology and make a short reflection video. Your work in Thesis B will be to collect your data and start writing your results up.
- Research Thesis C: In this part, you will finish analysing your results and write up the rest of your thesis, using parts from Thesis A and B. In addition, you will present your results in a research presentation.
Assessment

Assessment Tasks

<table>
<thead>
<tr>
<th>Assessment task</th>
<th>Weight</th>

<th>Student Learning Outcomes Assessed</th>
</tr>
</thead>
<tbody>
<tr>
<td>Master project and report</td>
<td>100%</td>
<td>06/08/2021 11:59 PM</td>
<td>1, 4, 5</td>
</tr>
<tr>
<td>Thesis Proposal Draft</td>
<td>N/A</td>
<td>19/07/2021 09:00 AM</td>
<td>1, 2, 5</td>
</tr>
</tbody>
</table>

Assessment Details

Assessment 1: Master project and report

Length: 10 pages

Details:

The Thesis Proposal consists of a:

- Literature Review (~ 8 pages): This should detail relevant literature in the student's own words and identify how the student's work builds on previous work
- Project Plan (~ 1 page): The student clearly explains what resources and methodologies will be used to solve the question
- Risk Assessment (~ 1 page): This section should show the risks associated with the resourcing and timing of the project and how the student might mitigate those risks

Additional details:

<table>
<thead>
<tr>
<th>Criterion</th>
<th>Rubric</th>
<th>Weighting</th>
</tr>
</thead>
<tbody>
<tr>
<td>Literature Review</td>
<td>The student clearly answers what is the problem to be solved and what is its significance. Gaps in the literature should be explained and the hypotheses and aims clearly stated.</td>
<td>50%</td>
</tr>
<tr>
<td>Project Plan</td>
<td>The student clearly explains how they will answer the research question and how will they use their resources (time, computing power, laboratory equipment etc.) to answer the question in the time allocated. The student clearly indicates areas for which they will undertake training or upskilling.</td>
<td>20%</td>
</tr>
<tr>
<td>Risk Assessment</td>
<td>The student has shown a clear risk assessment of the feasibility of the different areas of the project. Preliminary results are indicated and knowledge about the tasks during the thesis, their relative importance, dependencies and likely success is used to show a high probability for success for the project.</td>
<td>20%</td>
</tr>
<tr>
<td>Document Presentation</td>
<td>The document is well presented with clear diagrams showing the progression of the project, milestones and dependencies. The document is well-written and citations are consistently</td>
<td>10%</td>
</tr>
</tbody>
</table>
Turnitin setting: This assignment is submitted through Turnitin and students do not see Turnitin similarity reports.

Assessment 2: Thesis Proposal Draft

Details: Submit a thesis proposal draft to your supervisor by 9am Monday, Week 8 to get comments and feedback that can be incorporated in your thesis.

Additional details:

Your supervisor can provide you feedback for your report if you submit 2 weeks before the deadline.

Turnitin setting: This is not a Turnitin assignment
Attendance Requirements

Students are strongly encouraged to attend all classes and review lecture recordings.

Resources

Prescribed Resources

Students are expected to:

- Read topic material provided by their supervisor
- Read materials provided by course coordinator, including rubrics, formatting guides and exemplars.
- Conduct research by creating a library of academic articles to draft their literature review.

The following resources will be helpful in searching for appropriate literature:

<table>
<thead>
<tr>
<th>Resource</th>
<th>Description</th>
<th>Webpage</th>
</tr>
</thead>
<tbody>
<tr>
<td>UNSW Library</td>
<td>Featuring research help zone and many other services!</td>
<td><a href="https://www.library.unsw.edu.au/study/services-and-facilities">https://www.library.unsw.edu.au/study/services-and-facilities</a></td>
</tr>
<tr>
<td>Scopus Literature</td>
<td>Advanced search features</td>
<td>scopus.com</td>
</tr>
<tr>
<td>Google Scholar</td>
<td>Includes some pdfs</td>
<td>scholar.google.com.au</td>
</tr>
</tbody>
</table>

Recommended Resources

Students should consult the following:

- Honours Thesis Writing for Engineering Students
- Online iWrite thesis writing tutorial

References on writing style and technical communication skill:

Webpages for various societies have a number of resources and publications (including journal publications and textbooks) that might be helpful. For example, the following societies might be relevant:

**Society**                          **Webpage**

American Association of Petroleum Geologists geobyte.com
American Petroleum Institute – For Petroleum Standards api.org
Australian Petroleum Production & Exploration Association appea.com.au
Australian Society of Exploration Geophysicists aseg.org.au
Earthbyte Group (Large datasets and software for geoscience) earthbyte.org
European Association of Geoscientists & Engineers  
Petroleum Exploration Society of Australia  
Society of Exploration Geophysicists  
Society of Petroleum Engineers (SPE)  
Society of Petrophysicists & Well Log Analysts  
Geoscience Australia

course evaluation and development

Feedback from students is welcomed, and is used to continuously improve the course outcomes and experiences for students.

Laboratory Workshop Information

Please contact your supervisor for laboratory equipment, access or other special resources you might need to complete your thesis.
**Submission of Assessment Tasks**

The School has developed a guideline to help you when submitting a course assignment.

We encourage you to retain a copy of every assignment submitted for assessment for your own record either in hardcopy or electronic form.

All assessments must have an assessment cover sheet attached.

**Course completion**

Course completion requires submission of all assessment items. Failure to submit all assessment items may result in the award of an Unsatisfactory Failure (UF) grade for the Course unless special consideration has been submitted and approved. Please note, a competency hurdle of 50% is applied to the final assessment.

**Late Submission of an Assignment**

Full marks for an assignment are only possible when an assignment is received by the due date.

We understand that at times you may not be able to submit an assignment on time, and the School will accommodate any fair and reasonable extension. We would recommend you review the UNSW Special Consideration guidelines – see section below.

Late submission will not be accepted and will be considered as no submission.

**Special Consideration**

You can apply for special consideration through [The Nucleus Student Hub](https://student.unsw.edu.au) when illness or other circumstances interfere with your assessment performance. Sickness, misadventure or other circumstances beyond your control may:

- Prevent you from completing a course requirement
- Keep you from attending an assessable activity
- Stop you submitting assessable work for a course
- Significantly affect your performance in assessable work, be it a formal end-of-semester examination, a class test, a laboratory test, a seminar presentation or any other form of assessment

We ask that you please contact the Course Convenor immediately once you have completed the special consideration application, no later than one week from submission.

More details on special consideration can be found at: [www.student.unsw.edu.au/special-consideration](https://www.student.unsw.edu.au/special-consideration)

**Student Support**

The University and the Faculty provide a wide range of support services for students, including:

- Library training and support services - [www.library.unsw.edu.au](https://www.library.unsw.edu.au)
Equitable Learning Services aims to provide all students with a free and confidential service that provides practical support to ensure that your health condition doesn’t adversely affect your studies.  
https://student.unsw.edu.au/els
Academic Honesty and Plagiarism

Your lecturer and the University will expect your submitted assignments are truly your own work. UNSW has very clear guidelines on what plagiarism is and how to avoid it. Plagiarism is using the words or ideas of others and presenting them as your own. Plagiarism is a type of intellectual theft. It can take many forms, from deliberate cheating to accidentally copying from a source without acknowledgement. The University has adopted an educative approach to plagiarism and has developed a range of resources to support students. All the details on plagiarism, including some useful resources, can be found at www.student.unsw.edu.au/plagiarism.

All Mining Engineering students are required to complete a student declaration for academic integrity which is outlined in the assignment cover sheets. By signing this declaration, you agree that your work is your own original work.

If you need some additional support with your writing skills, please contact the Learning Centre or view some of the resources on their website: www.lc.unsw.edu.au. The Learning Centre is designed to help you improve your academic writing and communication skills. Some students use the Centre services because they are finding their assignments a challenge, others because they want to improve an already successful academic performance.
Academic Information

Course Results

For details on UNSW assessment policy, please visit: www.student.unsw.edu.au/assessment

In some instances your final course result may be withheld and not released on the UNSW planned date. This is indicated by a course grade result of either:

- LE – indicates you have not completed one or more items of assessment; or
- WD – indicates there is an issue with one or more assignment; or
- WC – which indicates you have applied for Special Consideration due to illness or misadventure and the course results have not been finalised.

In either event it would be your responsibility to contact the Course Convener as soon as practicable but no later than five (5) days after release of the course result. If you don’t contact the convener on time, you may be required to re-submit an assignment or re-sit the final exam and may result in you failing the course. You would also have a NC (course not completed) mark on your transcript and would need to re-enroll in the course.

Studying a course in the School of Minerals and Energy Resources Engineering at UNSW

Report writing guide

The School has a Report Writing Guide (RWG) available. A copy of this is available on the course Moodle site.

Computing Resources and Internet Access Requirements

UNSW Minerals and Energy Resources Engineering provides blended learning using the on-line Moodle LMS (Learning Management System). Also see - Transitioning to Online Learning: www.covid19studyonline.unsw.edu.au

It is essential that you have access to a PC or notebook computer. Mobile devices such as smart phones and tablets may compliment learning, but access to a PC or notebook computer is also required. Note that some specialist engineering software is not available for Mac computers.

- Mining Engineering Students: OMB G48
- Petroleum Engineering Students: TETB LG34 & LG 35

It is recommended that you have regular internet access to participate in forum discussion and group work. To run Moodle most effectively, you should have:
• broadband connection (256 kbit/sec or faster)
• ability to view streaming video (high or low definition UNSW TV options)

More information about system requirements is available at www.student.unsw.edu.au/moodle-system-requirements

Accessing Course Materials Through Moodle

Course outlines, support materials are uploaded to Moodle, the university standard Learning Management System (LMS). In addition, on-line assignment submissions are made using the assignment dropbox facility provided in Moodle. All enrolled students are automatically included in Moodle for each course. To access these documents and other course resources, please visit: www.moodle.telt.unsw.edu.au

How We Contact You

At times, the School or your course convenors may need to contact you about your course or your enrolment. Your course convenors will use the email function within Moodle or we will contact you on your @student.unsw.edu.au email address.

We understand that you may have an existing email account and would prefer for your UNSW emails to be redirected to your preferred account. Please see instructions on how to redirect your UNSW emails: "How can I forward my emails to another account?"

How You Can Contact Us

We are always ready to assist you with your inquiries. To ensure your question is directed to the correct person, please use the email address below for:

• Enrolment or other admin questions regarding your program: https://unswinsight.microsoftcrmportals.com/web-forms/
• Course inquiries should be directed to the Course Convenor
