# 1. Staff contact details

## Contact details and consultation times for course convenor

Name: Associate Professor Jay Katupitiya

Office location: Ainsworth 510E

Tel: +61 (2) 9385 4096

Email: [J.Katupitiya@unsw.edu.au](mailto:J.Katupitiya@unsw.edu.au)

Moodle: <https://moodle.telt.unsw.edu.au/login/index.php>

**Consultation:** Please contact the course convenor by email or phone to make appointments when you need consultation.

## Contact details and consultation times for additional lecturers/demonstrators/lab staff

Name: Dr Mohammad Deghat

Office location: Ainsworth 510M

Tel: +61 (2) 9385 1650

Email: [M.Deghat@unsw.edu.au](mailto:M.Deghat@unsw.edu.au)

Moodle: <https://moodle.telt.unsw.edu.au/login/index.php>

**Consultation:** Please contact the lecturer by email or phone to make appointments when you need consultation.

Please see the course [Moodle](#).

# 3. Course details

## Credit points

This is a 6 unit-of-credit (UoC) course and involves 3 hours per week (h/w) of face-to-face contact.

The normal workload expectations of a student are approximately 25 hours per term for each UOC, including class contact hours, other learning activities, preparation and time spent on all assessable work.

You should aim to spend about 15 h/w on this course. The additional time should be spent in making sure that you understand the lecture material, completing the set assignments, further reading, and revising for any examinations.

### Contact hours

	Day	Time	Location
<b>Lectures</b>	Thursday	10 am-12 noon	Colombo Theatre A
(Web stream)	Any	Any	Moodle
<b>Demonstrations</b>	Monday	9 am – 10 am	Ainsworth 203/204
(Weeks 4, 7 and 10 only)	Thursday	4 pm – 5 pm	Ainsworth 204
(Weeks 4, 7 and 10 only)	Thursday	5 pm – 6 pm	Ainsworth 203
<b>Lab</b>	Monday	11 am – 1 pm	TBA
(Weeks 4, 8 & 10 only)	Monday	1 pm – 3 pm	TBA
(Weeks 4, 8 & 10 only)	Tuesday	9 am – 11 am	TBA
(Weeks 4, 8 & 10 only)	Tuesday	11 am – 1 pm	TBA
(Weeks 4, 8 & 10 only)	Tuesday	3 pm – 5 pm	TBA
(Weeks 4, 8 & 10 only)	Wednesday	9 am – 11 am	TBA
(Weeks 4, 8 & 10 only)	Wednesday	11 am – 1 pm	TBA

Please refer to your class timetable for the learning activities you are enrolled in and attend only those classes.

### Summary and Aims of the course

This course focuses on the design of digital control systems and their implementation on linear time invariant systems.

This course will give you a thorough understanding of computer-controlled systems. Its core content can be broadly categorized into mathematical means of modelling Mechatronic Systems, model validation, design of digital controllers using a variety of different methods and the implementation of controllers on real-life systems. The systems being modelled and controlled are largely motion control systems.

The course has laboratory experiments (i) to model an inverted pendulum system and to design a classical controller (ii) to implement digital control systems on speed and position control rigs.

The courses in the Mechatronics discipline are built up on four different areas: mechanical design, computing, electronics and microprocessors, and control systems. The latter three areas are interrelated, and this course forms a cornerstone of the fundamental courses on which the Mechatronic Engineering course at UNSW is built upon. A thorough understanding of the control of dynamical mechanical systems to achieve desired motions is essential for the design and development of any sophisticated Mechatronic System. Using the fundamental classical control system knowledge gained in the third year, this course builds your knowledge on designing and implementing computer-controlled systems. Control systems provide a methodical way of carrying out the motion control that also needs programming and computing. As such the contributions from this course to the Mechatronic Engineering degree program are essential and vital.

### Student learning outcomes

This course is designed to address the learning outcomes below and the corresponding Engineers Australia Stage 1 Competency Standards for Professional Engineers as shown. The full list of Stage 1 Competency Standards may be found in Appendix A.

After successfully completing this course, you should be able to:

Learning Outcome		EA Stage 1 Competencies
1.	Develop an understanding of the purpose of control systems and their use.	PE1.1
2.	Be able to understand that a plant is given and a control system is to be designed to satisfy performance specifications.	PE1.1
3.	Be thoroughly conversant with the available design methodologies and have the ability to choose the appropriate design methods to design a control system.	PE2.2
4.	Have a thorough understanding of the control system application environment and be able to implement the designed control systems.	PE2.3

## 4. Teaching strategies

Teaching of this course is through lectures, demonstrations and laboratory sessions. All laboratory work is individual work and attendance is essential.

The tutorial sessions are designed to help you use tools such as Matlab to solve complex control system problems. The tutorials will be partially introduced in the class and will be continued in the computer labs. Though not essential, you are encouraged to bring your own computer with Matab installed (student version is sufficient) so that you can maintain a

seamless continuation of your learning. The provision of the learning environment in the laboratory is to facilitate developing confidence in managing laboratory tasks as projects. The content delivered in the lectures will be used to design controllers and then to apply them to control real-life systems. Demonstrators in the laboratories are there to provide you all the guidance and assistance is managing the laboratory tasks.

## 5. Course schedule

Week	Topic	Location	Suggested Readings
1	Introduction and How Control Systems Work	Colombo Theatre A	Refer to the week 1 on Moodle and watch the videos if any
2	Modelling, Transfer Functions and State Space Representation	Colombo Theatre A	Refer to the week 2 on Moodle and watch the videos if any
3	Root Locus followed by Introduction to Discrete-Time Systems	Colombo Theatre A	Refer to the week 3 on Moodle and watch the videos if any
4	z-transforms and Discrete-Time Transfer Functions	Colombo Theatre A	Refer to the week 4 on Moodle and watch the videos if any
5	Stability followed by Discrete Equivalent of Continuous-time Systems	Colombo Theatre A	Refer to the week 5 on Moodle and watch the videos if any
6	Flexibility Week		
7	Direct Design: Discrete Controller Design Using Root Locus	Colombo Theatre A	Refer to the week 7 on Moodle and watch the videos if any
8	Direct Design: Discrete Controller Design Using Direct Analytical Method	Colombo Theatre A	Refer to the week 8 on Moodle and watch the videos if any
9	Indirect Design: Discrete Controller Design Using Bode Method	Colombo Theatre A	Refer to the week 9 on Moodle and watch the videos if any
10	State Feedback Controllers and Observers	Colombo Theatre A	Refer to the week 10 on Moodle and watch the videos if any

## 6. Assessment

### Assessment overview

Task	Assessment	Group Project?	Length	Weight	Learning outcomes assessed	Assessment criteria	Due date and submission requirements	Deadline for absolute fail	Marks returned
T1	Pendulum experiment†	No	A full report as per submission specifications.	10%	1 and 2	Refer to laboratory specification for exact details.	Submit electronically to Moodle submission site by 11.59 pm of 27 March 2020 (Week 6 Friday)	11.59 pm of 2 April 2020	By midnight of Friday of week 7
T2	Speed Control Experiment†	No	A full report as per submission specifications.	15%	3 and 4	Refer to laboratory specification for exact details.	Submit electronically to Moodle submission site by 11.59 pm of 24 April 2020 (Week 10)	11.59 pm of 29 April 2020	By midnight of Friday of week 11
T3	Position Control Experiment†	No	A full report as per submission specifications.	20%	3 and 4	Refer to laboratory specification for exact details.	Submit electronically to Moodle submission site by 11.59 pm of 8 May 2020 (week 12)	11.59 pm of 13 May 2020	By midnight of Friday of week 13
T4	Quiz* (Parts 1, 2 &3)	No	10, 10 and 25 MCQ/Short answer questions	55% (10%+10%+25%+10% respectively)	1,2,3 and 4	Content of weeks 1-3, 4-6, 7-10	From Mondays 9 am to 10 am of weeks 4, 7 and 11 (supervised)	N/A	Immediately
	Lecture video quizzes	No	10 weekly lecture video quizzes			Content for Weeks 1-10	Weekly at the start of the lecture (unsupervised)	N/A	immediately

† The laboratory experiment specifications will be available from week 2 onwards in Moodle.

\*Parts 1, 2 & 3 of the Quiz must be taken under supervised conditions in the demonstration computer labs. The duration allowed for all quizzes are timed. The students may use books, internet resources and lecture notes except personal help. Some questions may require use of MATLAB.

## **Assignments**

### *Presentation*

During experimentations, each student will collect his/her own personalized data. It is essential that each student use his/her personalized data in his/her reports.

All submissions are expected to be neat and clearly set out. Your results are the pinnacle of all your hard work and should be treated with due respect. Presenting results clearly gives the marker the best chance of understanding your method, even if the numerical results are incorrect.

### *Submission*

Work submitted late without an approved extension by the course coordinator or delegated authority is subject to a late penalty of 20 percent (20%) of the maximum mark possible for that assessment item, per calendar day.

The late penalty is applied per calendar day (including weekends and public holidays) that the assessment is overdue. There is no pro-rata of the late penalty for submissions made part way through a day.

Work submitted after the 'deadline for absolute fail' is not accepted and a mark of zero will be awarded for that assessment item.

For some assessment items, a late penalty may not be appropriate. These are clearly indicated in the course outline, and such assessments receive a mark of zero if not completed by the specified date. Examples include:

- a. Weekly online tests or laboratory work worth a small proportion of the subject mark,  
or
- b. Online quizzes where answers are released to students on completion, or
- c. Professional assessment tasks, where the intention is to create an authentic assessment that has an absolute submission date, or
- d. Pass/Fail assessment tasks.

### *Marking*

Marking guidelines for assignment submissions will be provided at the same time as assignment details to assist with meeting assessable requirements. Submissions will be marked according to the marking guidelines provided.

## **Examinations**

You must be available for all quizzes. This course has no final examination.

### *Calculators*

You will need to provide your own calculator of a make and model approved by UNSW for

the examinations. The list of approved calculators is available at [student.unsw.edu.au/exam-approved-calculators-and-computers](http://student.unsw.edu.au/exam-approved-calculators-and-computers)

It is your responsibility to ensure that your calculator is of an approved make and model, and to obtain an “Approved” sticker for it from the [Engineering Student Support Services Centre](#) prior to the examination. Calculators not bearing an “Approved” sticker will not be allowed into the examination room.

### **Special consideration and supplementary assessment**

If you have experienced an illness or misadventure beyond your control that will interfere with your assessment performance, you are eligible to apply for Special Consideration prior to submitting an assessment or sitting an exam.

**Please note** that UNSW now has a [Fit to Sit / Submit rule](#), which means that if you sit an exam or submit a piece of assessment, you are declaring yourself fit enough to do so and cannot later apply for Special Consideration.

For details of applying for Special Consideration and conditions for the award of supplementary assessment, please see the information on UNSW’s [Special Consideration page](#).

## **7. Expected resources for students**

### **Recommended Textbooks**

1. Dorsey, J., “Continuous and Discrete Control Systems”, McGraw Hill
2. Golten, J. and A. Verwer, “Control System Design and Simulation” McGraw Hill

### **Additional Readings**

Worked solutions to computer lab exercises will be made available in the Moodle page for MTRN3020.

UNSW Library website: <https://www.library.unsw.edu.au/>

Moodle: <https://moodle.telt.unsw.edu.au/login/index.php>

## **8. Course evaluation and development**

Feedback on the course is gathered periodically using various means, including the UNSW myExperience process, informal discussion in the final class for the course, and the School’s Student/Staff meetings. Your feedback is taken seriously, and continual improvements are made to the course based, in part, on such feedback.

In this course, recent improvements resulting from student feedback include complete digital uplifting of the course.

## 9. Academic honesty and plagiarism

UNSW has an ongoing commitment to fostering a culture of learning informed by academic integrity. All UNSW students have a responsibility to adhere to this principle of academic integrity. Plagiarism undermines academic integrity and is not tolerated at UNSW. *Plagiarism at UNSW is defined as using the words or ideas of others and passing them off as your own.*

Plagiarism is a type of intellectual theft. It can take many forms, from deliberate cheating to accidentally copying from a source without acknowledgement. UNSW has produced a website with a wealth of resources to support students to understand and avoid plagiarism, visit: [student.unsw.edu.au/plagiarism](http://student.unsw.edu.au/plagiarism). The Learning Centre assists students with understanding academic integrity and how not to plagiarise. They also hold workshops and can help students one-on-one.

You are also reminded that careful time management is an important part of study and one of the identified causes of plagiarism is poor time management. Students should allow sufficient time for research, drafting and the proper referencing of sources in preparing all assessment tasks.

If plagiarism is found in your work when you are in first year, your lecturer will offer you assistance to improve your academic skills. They may ask you to look at some online resources, attend the Learning Centre, or sometimes resubmit your work with the problem fixed. However more serious instances in first year, such as stealing another student's work or paying someone to do your work, may be investigated under the Student Misconduct Procedures.

Repeated plagiarism (even in first year), plagiarism after first year, or serious instances, may also be investigated under the Student Misconduct Procedures. The penalties under the procedures can include a reduction in marks, failing a course or for the most serious matters (like plagiarism in an honours thesis) even suspension from the university. The Student Misconduct Procedures are available here:

[www.gs.unsw.edu.au/policy/documents/studentmisconductprocedures.pdf](http://www.gs.unsw.edu.au/policy/documents/studentmisconductprocedures.pdf)

## 10. Administrative matters and links

All students are expected to read and be familiar with UNSW guidelines and policies. In particular, students should be familiar with the following:

- [Attendance](#)
- [UNSW Email Address](#)
- [Special Consideration](#)
- [Exams](#)
- [Approved Calculators](#)
- [Academic Honesty and Plagiarism](#)
- [Equitable Learning Services](#)

# Appendix A: Engineers Australia (EA) Competencies

## Stage 1 Competencies for Professional Engineers

	<b>Program Intended Learning Outcomes</b>
<b>PE1: Knowledge and Skill Base</b>	PE1.1 Comprehensive, theory-based understanding of underpinning fundamentals
	PE1.2 Conceptual understanding of underpinning maths, analysis, statistics, computing
	PE1.3 In-depth understanding of specialist bodies of knowledge
	PE1.4 Discernment of knowledge development and research directions
	PE1.5 Knowledge of engineering design practice
	PE1.6 Understanding of scope, principles, norms, accountabilities of sustainable engineering practice
<b>PE2: Engineering Application Ability</b>	PE2.1 Application of established engineering methods to complex problem solving
	PE2.2 Fluent application of engineering techniques, tools and resources
	PE2.3 Application of systematic engineering synthesis and design processes
	PE2.4 Application of systematic approaches to the conduct and management of engineering projects
<b>PE3: Professional and Personal Attributes</b>	PE3.1 Ethical conduct and professional accountability
	PE3.2 Effective oral and written communication (professional and lay domains)
	PE3.3 Creative, innovative and pro-active demeanour
	PE3.4 Professional use and management of information
	PE3.5 Orderly management of self, and professional conduct
	PE3.6 Effective team membership and team leadership
